Swords Into Dow Shares Governing The Decline Of The Military Industrial Complex:

Swords Into Dow Shares Rachel Weber, 2018-03-05 Contemporary legal doctrine holds that corporate managers have obligations first and foremost to maximize profits for their shareholders. This doctrine is based on the assumption that shareholders alone bear the financial risks and contribute the equity necessary for production. But what if other groups contribute assets and also risk losing their investments? What if other groups actually shelter shareholders from financial risks? Such is the case with the nation's prime defense contractors. By examining the case of defense contracting where the federal government and indirectly the taxpayers assume most of the risks and costs of producing weaponry, Rachel Weber critiques the assumptions underlying our system of corporate governance. The Department of Defense provides contracts for billions of dollars, specialized components and facilities, interest subsidies, tax breaks, and regulatory relief. These public contributions make the record shareholder returns and executive compensation packages of the early 1990s all the more problematic. This book follows the case of General Dynamics, the nation's largest military shipbuilder and considered a trendsetter in the industry for its explicit shareholder orientation. The behavior of contractors like General Dynamics in the post-Cold War period raises serious concerns about the private stewardship of public funds. How can the government make contractors accountable to other public interests? In *Swords into Dow Shares*, Rachel Weber offers some original suggestions for redirecting defense resources to foster innovation, decrease the tax burden of military spending, and help to retain and create high wage jobs in a civilian industrial economy.

The Military-Industrial Complex and American Society S. Mike Pavelec, 2010-01-18 The first complete reference on the military industrial complex from its Cold War era expansion to the present. *The Military Industrial Complex and American Society* addresses the broad subject of the political economy of defense research and its wide reaching effects on many aspects of American life. Ranging from the massive arms buildup of the Cold War to the influx of private contractors and corporations such as Halliburton, it reveals the interconnectedness of the military industry and government within the history of this public-private enterprise. *The Military Industrial Complex and American Society* offers over 100 alphabetically organized entries on a wide range of significant research bodies and government agencies as well as important people, events, and technologies. In addition, a series of essays looks at such essential topics as propaganda, think tanks, defense budgeting, the defense industry and the economy, and the breakdown of the military industrial complex in Vietnam. With this work, students, policymakers, and other interested readers will understand the ramifications of the relationships between industry, scientific and technological communities, the government, and society.

Legal Control of the Private Military Corporation B. Sheehy, J. Maogoto, Virginia Newell, 2008-12-11 Private military organizations are a new and important feature of the international landscape. They offer control of potential massive violence to the highest bidder with very limited accountability. This book offers critical insights into both the phenomenon and the challenges of and potential for regulation.

The Military and the Market Jennifer Mittelstadt, Mark R. Wilson, 2022-10-11

Throughout its history the U S military has worked in close connection to market based institutions and structures It has run systems of free and unfree labor taken over private sector firms and both spurred and snuffed out economic development It has created new markets for consumer products for sex work and for new technologies It has operated as a regulator of industries and firms and an arbitrator of labor practices And in recent decades it has gone so far as to refashion itself from the inside so as to become more similar to a for profit corporation The Military and the Market covers two centuries of history of the U S military s vast and varied economic operations including its often tense relationships with capitalist markets Collecting new scholarship at the intersection of the fields of military history business history policy history and the history of capitalism the nine chapters feature important new research on subjects ranging from Civil War soldier entrepreneurs to the business of the construction of housing and overseas bases for the Cold War to the U S military s troubled relationships with markets for sex The volume enriches scholars understandings of the depth and complexity of military market relations in U S history and offers today s military policymakers novel insights about the origins of current arrangements and how they might be reimagined Contributors Jessica L Adler Timothy Barker Patrick Chung Gretchen Heefner Jennifer Mittelstadt A Junn Murphy Kara Dixon Vuic Sarah Jones Weicksel Mark R Wilson Daniel Wirls *The Process and Politics of Defense Acquisition* David S. Sorenson, 2008-12-30 The United States government invests billions each year on equipping armed forces with the most advanced military equipment The root of the American defense acquisition system is driven by a combination of national interests and domestic political requirements While fundamentally the defense acquisition system has produced results for the United States military improvements are needed in order to continue to move forward in advancing military tactics and technology Exploring both the systemic and political levels of the system Sorenson argues that the United States will fall behind if the current defense acquisition system is not reformed This book brings together elements of this complicated system such as national security requirements and the changes that are needed in both the structural and political pillars A combination of political interests and the needs of the military serviced by an ever shrinking defense industry make a genuine acquisition reform even more difficult resulting in reform that is more symbolic than genuine *North American Homeland Security* Imtiaz Hussain, Satya R. Pattanayak, Anil Hira, 2008-10-30 Did 9 11 revive a North American guns butter trade off Established in the largest administrative overhaul since World War II the Department of Homeland Security was charged with keeping the United States safe within a wider security community but confronted the Washington Consensus based Western Hemisphere free trade movement beginning with the North American Free Trade Agreement NAFTA and extending to the Central American Free Trade Agreement CAFTA in 2003 to materialize a Free Trade Area of the Americas FTAA compact Whether 9 11 restrictions impeded these trade related thrusts or not embracing neoliberalism permitted Canada and Mexico to pursue their own initiatives such as proposing free trade to the US Canada in 1985 Mexico in 1990 but as during the Cold War security imperatives ultimately prevailed This work investigates

Canada's and Mexico's Department of Homeland Security responses through three bilateral studies of policy responses along comparative lines case studies of security and intelligence apparatuses in each of the three countries and a post 9/11 trilateral assessment Ultimately they raise a broader and more critical North American question Will regional economic integration continue to be trumped by security considerations as during the Cold War era and thereby elevate second best outcomes or rise above the constraints to reassert the unquenchable post Cold War thirst for unfettered markets replete with private enterprises liberal policies and full fledged competitiveness
