Listen Again David Wulstan, 2015-10-29 How do you tell the key of a piece without looking at a score How do you know when a musical work ended before an audience applauds or a radio announcer returns on air Was there in fact a breakdown of tonality in the nineteenth and twentieth centuries These questions and others are the focus of David Wulstan's *Listen Again: A New History of Music* He also shows where the *nuove musiche* of the early Baroque era came from and what the two critical but unlinked chords in the middle of Bach's Brandenburg Concerto No III signify Previous literature in music does not properly address these questions and innumerable others In *Listen Again* Wulstan illustrates how music from Bach to Bartók was far less revolutionary than customarily imagined and that the inversionist doctrine of Rameau and kindred acoustical misconceptions courtesy of Heinrich Schenker and other analysts solve fewer problems than their purveyor claim In *Listen Again* Wulstan takes to task early theorists who were mostly clerics who ignored non ecclesiastical music and their modern equivalents who consider only the blinding white of the written or printed score whilst ignoring music as heard and interpreted by the ear and brain Instead Wulstan enquires into the musical activities of the common folk to addressing key issues that early and modern theorists have regularly overlooked The book will appeal anyone who has dismissed harmony theory and the like as alien in effect to practical music Readers will find in *Listen Again* that the true history of music has far more practical relevance for performers than the aridity of music theory coursework demonstrating by example how this work is a book about music not as in the case of so much theoretical work a book about books

Kern Holoman provides the first full biography of this giant of twentieth century music tracing his dramatic survival in occupied Paris his triumphant arrival at the Boston Symphony Orchestra and his later years when he was a leading cultural figure in the United States a man known and admired by Presidents Truman Eisenhower and Kennedy

Twentieth-century Music in Western Europe Arthur Cohn, 1965 Arthur Cohn turns his attention to thirty composers of this century in Western Europe defining this century as beginning where Debussy ends The discussion is based on attentive study of their compositions that have been recorded Mr Cohn discusses each man's aesthetic criteria and follows with critical essays on each composition The second section of the book rates some 2000 recordings with notations on instruments performing organizations and artists conductors labels comparisons when more than one recording of the same work exists

Arthur Honegger Harry Halbreich, 1999 Arthur

Honegger 1892 1955 Swiss by nationality French by education and residence was a major composer of the 20th century Although he earned popular acclaim early in his career in his later years his consistently tonal musical language was considered outmoded His most significant works include five symphonies a large body of chamber music and several large scale oratorios that combine choral and instrumental writing with declaimed narrative in a uniquely effective way
