Berke, New Orleans Academy of Ophthalmology, 1962 **Clinical Strabismus Management** Arthur L. Rosenbaum, Alvina Pauline Santiago, 1999

Symposium on Strabismus, 1971 **Diagnosis and Management of Ocular Motility Disorders** Alec M. Ansons, Helen Davis, 2014-01-28 This comprehensive clinically grounded textbook now in its fourth edition supports orthoptists and ophthalmologists in decision making through the patient care process from presentation to discharge Written by authors with extensive experience in teaching and research **Diagnosis and Management of Ocular Motility Disorders** offers a clear and practical overview of assessment and management principles and further explores the clinical features of specific disorders from amblyopia and infantile strabismus to supranuclear and infranuclear disorders as well as other miscellaneous disorders of ocular movement A brand new chapter on congenital cranial dysinnervation disorders reflects recent advances in gene mapping and increased understanding of this condition and a new appendix provides surgical dose tables for easy reference Now in full colour throughout with additional diagrams and photographs of surgical techniques this remains the key reference text for orthoptic and ophthalmic professionals managing patients with eye movement disorders *Surgical Ophthalmology* F.C. Blodi, Günter Mackensen, Hellmut Neubauer, 2012-12-06 These two volumes of *Surgical Ophthalmology* represent the fruits of a long standing cooperation among a number of experts in the various subspecialties of ophthalmology The editors have attempted to harmonize the individual contributions The illustrations are of a more or less uniform character and present in didactic sketches the individual steps of the most important operations This should be of benefit not only for the neophyte but also for the expert The text has in a similar way been integrated so that the whole work though written by a number of contributors presents an organic unit and not a patchwork of different parts In addition this work is a monument to the spirit of German American collaboration The two German editors have since the end of WWII stressed the advantages of such collaborative efforts They have established close personal contacts with many American ophthalmologists They have participated in and contributed to many American congresses meetings and symposia The American editor on the other hand as a product of the Viennese school has always stressed the important contributions by German speaking ophthalmologists and the value of the German literature Strabologie Marie-Andrée

Screening in Child Health Care Micha De Winter, 2018-04-19 Child surveillance is a subject of increasing scientific, social and political debate in many countries of the world. In the UK, protocols for effective action are based on a government report 'Health for all children'. The research which gave rise to these protocols has been developed further in the Netherlands, and drawing on the experience of other health care systems, has produced conclusions which challenge some widely accepted assumptions about appropriate procedures. This book reviews the international research and recommendations of the Dutch working party. It presents an authoritative and practical survey of the contents and frequency of child health surveillance programmes, procedures for quality control and improvement possibilities for parental involvement, and the levels of expertise necessary to run programmes effectively. It offers a clear vision of a more sophisticated approach to child health care and is therefore an important reference for
