ADHD and Anxiety: Causality Sequences Through a Biopsychosocial Model Hongbao Cao, Shaolei Teng, Sha Liu, 2025-08-18 ADHD Attention Deficit Hyperactivity Disorder and anxiety disorders are two of the most common psychiatric conditions often co existing in the same individuals The relationship between these disorders is complex and multifactorial in nature The biopsychosocial model postulates that biological psychological and social factors all play a significant role in human functioning in the context of disease or illness which includes these disorders Evidence suggests that ADHD can predispose individuals to anxiety and vice versa However the causality sequences as explored in the literature remains limited It is possible that ADHD symptomology causes anxiety or the genetics behind ADHD causes anxiety symptoms Current research has adopted a more complex nuanced understanding of both disorders acknowledging the unique interactions of biological psychological and social factors and large datasets e g Dunedin datasets may help with developing a stronger causality sequence It s also noteworthy that severe anxiety can look like ADHD but the treatment is totally different as ADHD meds Stimulants can make anxiety worse *Conduct and Oppositional Defiant Disorders* Cecilia A.
