Syntax Of Sentence Text A Festschrift:

The Syntax of Sentence and Text Světlá, František, 1994-01-01 This is a collection of papers inspired by the work of František Danes and is published in honour of his 75th birthday. Danes' international contribution to the development of Prague School functionalism, the theory of functional sentence perspective, discourse studies and semantics is reflected in the 27 papers collected in four thematic sections of this volume. **Prague Linguistic Circle Papers** Eva

Hájířová, Petr Sgall, Jirí Hana, Tomáš Hoskovec, 2002-06-27 The fourth volume of the revived series of Travaux du Cercle linguistique de Prague brings three contributions by J. Vachek, O. Leška and V. Skalička connected with the classical period of the Prague School as well as papers delivered at the conference Function, Form and Meaning: Bridges and Interfaces held in Prague in 1998. Some of the contributions concern issues of grammar of different languages including a syntactic annotation of a large Czech text corpus, a comparison of Hebrew conditionals with English, a characterization of the typology of the Indo-European verb. A further part focuses on topic focus articulation, information sentence structure, functional sentence perspective with a concept of perspective introduced as close to but distinct from topic and with three different viewpoints on the semantics of information structure. Two broader essays on the nature of language are then presented while the last section analyzes the structure of free verse. The volume represents a contribution to the continuing fruitful interaction between the work of the Prague School and the more and less closely related approaches of linguists in other countries.

Coherence in Spoken and Written Discourse Wolfram Bublitz, Uta Lenk, Eija Ventola, 1999-06-15 Until very recently coherence unlike cohesion was widely held to be a rather mystical notion. However, taking account of new trends representing a considerable shift in orientation, this volume aims at helping to relieve coherence of its mystifying aura. The general bibliography which concludes the book bears witness to this intriguing development and the rapidly changing scene in coherence research. Preceding this comprehensive up-to-date Bibliography on Coherence are 13 selected papers from the 1997 International Workshop on Coherence at the University of Augsburg, Germany. They share a number of theoretical and methodological assumptions and reflect a trend in text and discourse analysis to move away from reducing coherence to a product of formally represented cohesion and/or semantically established connectivity. Instead they start from a user and context-oriented interpretive understanding and rely on authentic data throughout in relating micro-linguistic to macro-linguistic issues. The first group of papers looks at the re-creation of coherence in inter alia reported speech, casual conversation, argumentative writing, news reports and conference contributions. The second group describes the negotiation of coherence in oral examinations, text summaries and other situations that require special efforts on the part of the recipient to overcome misunderstandings and other disturbances. The third group discusses theoretical approaches to the description of coherence. **Foundations of Pragmatics** Wolfram Bublitz, Neal R. Norrick, 2011-06-30 Open publication. Opening the 9 volume series Handbooks of Pragmatics, this handbook provides a comprehensive overview of the foundations of pragmatics.

It covers the central theories and approaches as well as key concepts and topics characteristic of mainstream pragmatics i.e. the traditional and most widespread approach to the ways and means of using language in authentic social contexts The in depth articles provide reliable orientational overviews useful to researchers students and teachers They are both state of the art reviews of their topics and critical evaluations in the light of subsequent developments Topics are thus considered within their scholarly context and also critically evaluated from current perspectives The five major sections of the handbook are dedicated to the Conceptual and Theoretical Foundations with a historiographic overview of the establishment and subsequent development of pragmatics Key Topics investigating indexicality reference and other concepts that were the first to make their way from grammar into pragmatics and mainstream notions like speech acts types of inference the Place of Pragmatics in the Description of Discourse delimiting pragmatics from grammar semantics prosody literary criticism and Methods and Tools Language and Function Josef Hladký, 2003-04-17 The present volume originally prepared to celebrate Jan Firbas 80th birthday unfortunately is presented only belatedly to commemorate one of the most outstanding personalities of functional and structural linguistics Its contributors have been inspired by the richness and penetrating invention of Firbas contained in his analysis of functional sentence perspective and of many other aspects of sentence and discourse

Academic Writing Eija Ventola, Anna Mauranen, 1996-03-15 Writing is crucial to the academic world It is the main mode of communication among scientists and scholars and also a means for students for obtaining their degrees The papers in this volume highlight the intercultural generic and textual complexities of academic writing Comparisons are made between various traditions of academic writing in different cultures and contexts and the studies combine linguistic analyses with analyses of the social settings in which academic writing takes place and is acquired The common denominator for the papers is writing in English and attention is given to native English writers and non native writers problems in different disciplines The articles in the book introduce a variety of methodological approaches for analyses and search for better teaching methods and ways of improving the syllabi of writing curricula The book as a whole illustrates how linguists strive for new research methods and practical applications in applied linguistics *Handbook of Research on Educational Communications and Technology* David H. Jonassen, 2004 This edition of this handbook updates and expands its review of the research theory issues and methodology that constitute the field of educational communications and technology Organized into seven sectors it profiles and integrates the following elements of this rapidly changing field **Language, Education and Discourse** Joseph Foley, 2005-12-05 This collection of essays by leading functional linguists presents the latest perspectives on language and discourse in educational settings The book questions the idea of discourse to reveal that the social processes of learning are imbued with the ideologies of the society and education system within which learning takes place The contributors take into account the historical and cross cultural perspectives of both classroom practices and the student's own awareness of the ideological meanings of language activities Language Education and Discourse is divided into

two sections Part one covers early childhood and the growing development of a language system from the basic semiotic system of the infant This is followed by an analysis of the beginnings of literacy in kindergarten the introduction to writing in primary school and the ideological content of reading material Part two furthers this analysis by looking at discourse in secondary and tertiary education The contributors pose questions about the role and importance of teaching grammar in the school system and finally examine how to refine the discourse of education This book will be useful to academics interested in the latest functional perspectives on language as it is used in education

Light Verb Constructions as Complex Verbs
 Anna Pompei, Lunella Mereu, Valentina Piunno, 2023-10-24 The notion of light verb constructions has been traditionally related to the insignificance of the verb which is described as a grammatical item only codifying TAM system and features whereas the whole predicative content is thought to be conveyed by the noun This book deals with the light verb constructions as instances of complex verbs intended as multi predicational but monoclausal structures This allows to deepen the actual verb lightness the effective noun predicativity as well as their effect on the cohesion of the construction The papers in this volume reflect on the concrete contribution of noun and verb to the event and argument structure and on the relevance of semantically different noun classes for the verb selection From different theoretical approaches data of a great variety of languages are investigated such as Indo European languages both modern Germanic Slavic Romance and Iranian languages and ancient Latin and Ancient Greek but also Mandarin Chinese and different polysynthetic languages e g Ket Nivkh Murrinh Patha Kiowa Biniñ Gun wok Ainu The range of topics languages and perspectives presented in this book make it of great interest to both theoretical and applied linguists
