Syntax Of Silence Sluicing Islands And In The Theory Of Ellipsis:

The Syntax of Silence Jason Merchant, 2001 A primary goal of contemporary theoretical linguistics is to develop a theory of the correspondence between sound or gesture and meaning This sound meaning correspondence breaks down completely in the case of ellipsis and yet various forms of ellipsis are pervasive in natural language words and phrases which should be in the linguistic signal go missing How this should be possible is the focus of Jason Merchant's investigation He focuses on the form of ellipsis known as sluicing a common feature of interrogative clauses such as in Sally's out hunting guess what and Someone called but I can't tell you who It is the most frequently found cross linguistic form of ellipsis Dr Merchant studies the phenomenon across 24 languages and attempts to explain it in linguistic and behavioural terms *The Syntax of Silence* Jason Merchant, 1999 *Sluicing: Cross-Linguistic Perspectives* Jason Merchant, Andrew Simpson, 2012-05-03 This book of new research by leading experts expands our current understanding of the ways in which languages allow for ellipsis of the sluicing type to occur and shows how sluicing constructions reveal important information about the general architecture of grammar *The Blackwell Companion to Syntax* Martin Everaert, Henk Van Riemsdijk, 2008-04-15 Pre Order The Wiley Blackwell Companion to Syntax second edition publishing December 2017 Find out more at www.companiontosyntax.com This long awaited reference work marks the culmination of numerous years of research and international collaboration by the world's leading syntacticians There exists no other comparable collection of research that documents the development of syntax in this way Under the editorial direction of Martin Everaert and Henk van Riemsdijk this 5 volume set comprises 70 case studies commissioned specifically for this volume The 80 contributors are drawn from an international group of prestigious linguists including Joe Emonds Sandra Chung Susan Rothstein Adriana Belletti Jim Huang Howard Lasnik and Marcel den Dikken among many others A unique collection of 70 newly commissioned case studies offering access to research completed over the last 40 years Brings together the world's leading syntacticians to provide a large and diverse number of case studies in the field Explores a comprehensive range of syntax topics from an historical perspective Investigates empirical domains which have been well documented and which have played a prominent role in theoretical syntax at some stage in the development of generative grammar Serves as a research tool for not only theoretical linguistics but also the various forms of applied linguistics Contains an accessible alphabetical structure with an index integral to each volume featuring keywords and key figures Each multi volume set is also accompanied by a CD Rom of the entire Companion Like the prestigious Blackwell Handbooks in Linguistics series this multi volume work in the new The Wiley Blackwell Companions to Linguistics series can be relied upon to deliver the quality and expertise with which Blackwell Publishing's linguistics list is associated **The Wiley Blackwell Companion to Syntax, 8 Volume Set** Martin Everaert, Henk Van Riemsdijk, 2017-12-26 An invaluable reference tool for students and researchers in theoretical linguistics The Wiley Blackwell Companion to Syntax Second Edition has been updated to incorporate the last 10 years of syntactic

research and expanded to include a wider array of important case studies in the syntax of a broad array of languages A revised and expanded edition of this invaluable reference tool for students and researchers in linguistics now incorporating the last 10 years of syntactic research Contains over 120 chapters that explain analyze and contextualize important empirical studies within syntax over the last 50 years Charts the development and historiography of syntactic theory with coverage of the most important subdomains of syntax Brings together cutting edge contributions from a global group of linguists under the editorship of two esteemed syntacticians Provides an essential and unparalleled collection of research within the field of syntax available both online and across 8 print volumes This work is also available as an online resource at www.companionstosyntax.com

Deriving Syntactic Relations John Bowers, 2018-04-19 A pioneering new approach to a long debated topic at the heart of syntax what are the primitive concepts and operations of syntax This book argues appealing in part to the logic of Chomsky's Minimalist Program that the primitive operations of syntax form relations between words rather than combining words to form constituents Just three basic relations definable in terms of inherent selection properties of words are required in natural language syntax projection argument selection and modification In the radically simplified account of generative grammar Bowers proposes there are just two interface levels which interact with our conceptual and sensory systems and a lexicon from which an infinite number of sentences can be constructed The theory also provides a natural interpretation of phase theory enabling a better formulation of many island constraints as well as providing the basis for a unified approach to ellipsis phenomena

Verb Doubling and Dummy Verb Johannes Hein, 2020-06-22 This monograph provides the first cross linguistic study of repair strategies in verbal fronting verb doubling and do support addressing both typological properties and theoretical aspects First it brings together data hitherto scattered across the empirical and theoretical literature and adds newly collected data from two African languages For each of the 47 languages the properties of verbal fronting are documented in detail Based on this sample the empirical part establishes two novel typological generalizations regarding the interaction between the size of the fronted category and the type of repair strategy used The first of these identifies a systematic typological gap No language that allows both verb and verb phrase fronting has do support with the former and verb doubling with the latter In the theoretical part it is shown that previous theories of verb doubling do support are unable to account for both generalizations A new approach within the Copy Theory of the Minimalist Framework is developed that rests on the interaction of head movement copy deletion and the properties of different movement types The book thus provides the first comprehensive empirical and theoretical overview of repair patterns in verbal fronting

Repairs Patrick Brandt, Eric Fuß, 2013-03-01 Grammatical structures connect systems of thought and articulation the conditions of which hardly seem to fit each other Repairs are productive mechanisms that solve translation problems between modules or levels by adapting derivations or representations to requirements that have to be met unconditionally Compensating for derivational and interpretive defects repairs determine core properties of natural

language grammars and their interfaces **The size of things I** Zheng Shen, Sabine Laszakovits, 2021 This book focuses on the role size plays in grammar Under the umbrella term size fall the size of syntactic projections the size of feature content and the size of reference sets The contributions in this first volume discuss size and structure building The most productive research program in syntax where size plays a central role revolves around clausal complements Part 1 of Volume I contributes to this program with papers that argue for particular structures of clausal complements as well as papers that employ sizes of clausal complements to account for other phenomena The papers in Part 2 of this volume explore the interaction between size and structure building beyond clausal complements including phenomena in CP vP and NP domains The contributions cover a variety of languages many of which are understudied The book is complemented by Volume II which discusses size effects in movement agreement and interpretation Information Structure and Agreement Victoria Camacho-Taboada, Ángel L. Jiménez-Fernández, Javier Martín-González, Mariano Reyes-Tejedor, 2013-01-30 This collection consists of thirteen contributions focusing on the latest trends of information structure and agreement couched in the most current developments of Minimalism Cartography and Optimality Some chapters focus on the syntax of information structure in relation with the position occupied by different constituents in the CP domain and their interpretation such as the distinction between contrastive and corrective focus the inclusion of given information in focus the interplay of information structure and binding the relative position of complementisers and discourse based constituents in the left periphery Information structure is also analysed with regards to prominence phenomena at word level Other chapters deal with the notion of agreement and its role in the syntax of specific constructions such as applicatives correlatives or different types of CP like relatives or embedded interrogatives This selection of papers was originally presented at the 21st Colloquium on Generative Grammar held at the University of Seville in April 2011
