Taking Care The Changing Roles Of Women In Health Care:

Psychological Aspects of Women's Health Care Nada L. Stotland, Donna E. Stewart, 2008-11-01 In the decade since the first edition of this work was published an incredible array of reproductive technologies and associated issues has emerged Obstetricians and gynecologists are hard pressed to deal with the startling breadth and depth of these issues which require mastery over a daunting combination of ever increasing scientific knowledge technical skills long hours legal liability and exposure to clinical situations of overwhelming emotional intensity Psychiatrists have a vital role to play in helping obstetricians and gynecologists cope with a host of problems whose resolutions require not just technical skill but also knowledge of biology psychology sociology anthropology ethics and law For example to design and implement strategies to reduce the transmission of HIV psychiatrists could work with public health workers to incorporate the psychology sociology and anthropology of female reproductive behavior Psychiatrists could likewise improve the diagnosis and treatment of breast and pelvic malignancies by elucidating the factors that deter women from self examination and regular medical screening and enhance treatment compliance Divided into three sections this clinical and theoretical sourcebook addresses every major area of contemporary concern Pregnancy covers topics from the psychology of normal gestation to physical and psychiatric complications during and after pregnancy including new prenatal diagnostic techniques and the dynamic issues that emerge when abnormalities are detected and the use of psychotropic drugs and electroconvulsive therapy in pregnant and lactating patients Gynecology discusses not only common gynecologic problems but also more controversial issues such as induced abortion and the new reproductive technologies including the role of the menstrual cycle in exacerbating and precipitating psychologic symptoms the psychiatric aspects of menopause the assessment and management of chronic pelvic pain the psychosocial concomitants of gynecologic malignancies and the emotional demands on the oncology team and the special implications of HIV AIDS General Issues offers a broad balanced view of topics rarely found in the literature such as men s reactions to women s reproductive events substance abuse and eating disorders sexual and physical abuse often part of the histories of patients with personality disorders and posttraumatic stress disorders ethical and legal issues and health care for lesbian patients Of special significance is Dr Stotland s chapter on how consultation liaison services are provided to obstetrics and gynecology services This practical and scholarly volume is exceptionally useful as a teaching reference for medical and other health care students and residents in psychiatry and obstetrics and gynecology It also provides a valuable resource for the clinician working to improve the psychological well being of women patients **Public Health Reports**

,1985 **The Changing Face of Medicine** Ann K. Boulis, Jerry A. Jacobs, 2011-06-15 The number of women practicing medicine in the United States has grown steadily since the late 1960s with women now roughly at parity with men among entering medical students Why did so many women enter American medicine How are women faring professionally and personally once they become physicians Are women transforming the way medicine is practiced To answer these questions

The Changing Face of Medicine draws on a wide array of sources including interviews with women physicians and surveys of medical students and practitioners. The analysis is set in the twin contexts of a rapidly evolving medical system and profound shifts in gender roles in American society. Throughout the book Ann K Boulis and Jerry A Jacobs critically examine common assumptions about women in medicine. For example they find that women's entry into medicine has less to do with the decline in status of the profession and more to do with changes in women's roles in contemporary society. Women physicians' families are becoming more and more like those of other working women. Still disparities in terms of specialty practice ownership academic rank and leadership roles endure and barriers to opportunity persist. Along the way Boulis and Jacobs address a host of issues among them dual physician marriages specialty choice time spent with patients altruism versus materialism and how physicians combine work and family. Women's presence in American medicine will continue to grow beyond the 50 percent mark but the authors question whether this change by itself will make American medicine more caring and more patient centered. The future direction of the profession will depend on whether women doctors will lead the effort to chart a new course for health care delivery in the United States. *Congressional Record* United States. Using Evidence to Guide Nursing Practice Mary Courtney, Helen McCutcheon, 2009. Using Evidence to Guide Nursing Practice 2e is an invaluable how-to guide for students and experienced nurses alike. Emphasis is placed on how to develop an evidence-based culture in the workplace, support clinicians to make decisions using the best available evidence, and translating this evidence into practice. This new edition is divided into five concise sections which guide readers from an examination of evidence to developing a workplace culture that supports Evidence-Based Practice. It demonstrates how to locate and appraise evidence, how to evaluate practice, and finally how to translate evidence into practice. A new applied case study included includes two new chapters: Locating and appraising the evidence, and Evidence to inform nursing practice. An applied approach highlights Evidence-based Practice (EBP) initiatives and demonstrates how to develop an evidence-based culture in the workplace. Includes step-by-step guides to undertaking a systematic review, a clinical audit, and a program evaluation. Each chapter will have contributions from experienced academics and clinicians across Australia so as to ensure health industry relevance and academic rigour are addressed.
