Body and Mind in Motion Glenna Batson, Margaret Wilson, 2014-06-01 Western contemporary dance and body mind education have engaged in a pas de deux for more than four decades The rich interchange of somatics and dance has altered both fields but scholarship that substantiates these ideas through the findings of twentieth century scientific advances has been missing This book fills that gap and brings to light contemporary discoveries of neuroscience and somatic education as they relate to dance Drawing

from the burgeoning field of embodiment itself an idea at the intersection of the sciences humanities arts and technologies

Body and Mind in Motion highlights the relevance of somatic education within dance education dance science and body mind studies Engaging the Senses: Object-Based Learning in Higher Education Helen J. Chatterjee, Leonie Hannan, 2016-03-09

The use of museum collections as a path to learning for university students is fast becoming a new pedagogy for higher education Despite a strong tradition of using lectures as a way of delivering the curriculum the positive benefits of active and experiential learning are being recognised in universities at both a strategic level and in daily teaching practice As museum artefacts specimens and art works are used to evoke provoke and challenge students engagement with their subject so transformational learning can take place This unique book presents the first comprehensive exploration of object based learning as a pedagogy for higher education in a broad context An international group of authors offer a spectrum of approaches at work in higher education today They explore contemporary principles and practice of object based learning in higher education demonstrating the value of using collections in this context and considering the relationship between academic discipline and object based learning as a teaching strategy Back Pain - A Movement Problem Josephine Key, 2010-03-08

Back Pain a movement problem is a practical manual to assist all students and clinicians concerned with the evaluation diagnosis and management of the movement related problems seen in those with spinal pain disorders It offers an integrative model of posturomovement dysfunction which describes the more commonly observed features and related key patterns of altered control This serves as a framework guiding the practitioner s assessment of the individual patient Examines aspects of motor control and functional movement in the spine its development and explores probable reasons why it is altered in people with back pain Maps the more common clinical patterns of presentation in those with spinal pain and provides a simple clinical classification system based upon posturomovement impairments Integrates contemporary science with the insights of extensive clinical practice Integrates manual and exercise therapy and provides guiding principles for more rational therapeutic interventions which patterns of movement in general need to be encouraged which to lessen and how to do so Abundantly illustrated to present concepts and to illustrate the difference between so called normal and dysfunctional presentations Written by a practitioner for practitioners Experiencing Dance Helene Scheff, Marty Sprague, Susan McGreevy-Nichols, 2005
