Taking Command:

Taking Command David Richards, 2014-10-09 General Sir David Richards is one of the best known British generals of modern times. In 2013 he retired after over forty years of service in the British Army and a career that had seen him rise from junior officer with 20 Commando to Chief of the Defence Staff, the professional head of the British Armed Forces. He served in the Far East, Germany, Northern Ireland, and East Timor. He was the last Governor of Berlin's Spandau Prison when Rudolf Hess, Hitler's deputy, was its sole prisoner. In 2005 he was appointed Commander of the Allied Rapid Reaction Corps in Afghanistan and as commander of NATO forces became the first British General to command US Forces in combat since the Second World War. In 2000 Richards won acclaim when he brought together a coalition of forces in Sierra Leone to stop the ultra-violent Revolutionary United Front from attacking the capital Freetown. In so doing he ended one of the bloodiest civil wars to bedevil the region. He did so without the official sanction of London and failure could have cost him his career. As Chief of the Defence Staff he advised the government during the crises and interventions in Libya and Syria and oversaw the controversial Strategic Defence and Security Review. **Taking Command** is Richards' characteristically outspoken account of a career that took him into the highest echelons of military command and politics. Written with candour and often humour, his story reflects the changing reality of life for the modern soldier over the last forty years and offers unprecedented insight into the readiness of our military to tackle the threats and challenges we face today.

Taking Haiti Mary A. Renda, 2004-07-21 The US invasion of Haiti in July 1915 marked the start of a military occupation that lasted for nineteen years and fed an American fascination with Haiti that flourished even longer. Exploring the cultural dimensions of US contact with Haiti during the occupation and its aftermath, Mary Renda shows that what Americans thought and wrote about Haiti during those years contributed in crucial and unexpected ways to an emerging culture of US imperialism. At the heart of this emerging culture, Renda argues, was American paternalism, which saw Haitians as wards of the United States. She explores the ways in which diverse Americans, including activists, intellectuals, artists, missionaries, marines, and politicians, responded to paternalist constructs, shaping new versions of American culture along the way. Her analysis draws on a rich record of US discourses on Haiti, including the writings of policymakers, the diaries, letters, songs, and memoirs of marines stationed in Haiti, and literary works by such writers as Eugene O'Neill, James Weldon Johnson, Langston Hughes, and Zora Neale Hurston. Pathbreaking and provocative, **Taking Haiti** illuminates the complex interplay between culture and acts of violence in the making of the American empire.
