The American University in a Postsecular Age Douglas Jacobsen, Rhonda Jacobsen, 2008-02-27 For much of the twentieth century it was assumed that higher education was and ought to be a secular enterprise but that approach no longer suffices. The culture has shifted and contemporary college and university students are increasingly bringing religious and spiritual questions to campus. In response, college and university leaders are exploring anew the relationship between religion and higher education. *The American University in a Postsecular Age* grapples with key questions: How religious or irreligious are faculty and students today? What level of religious literacy should be expected from students? Can religion be allowed into the classroom without being disruptive? Should colleges and universities help students reflect on their own faith? Is religion antithetical to critical inquiry? Can religion have a positive role to play in higher education? This is a state-of-the-art introduction to the national discussion about religion and higher education. Leading scholars and top educators express a wide spectrum of opinions that reflect the best current thinking. Introductory and concluding essays by the editors describe the postsecular character of our age and propose a comprehensive framework intended to facilitate ongoing conversation.

The book is targeted as a handbook for academics as well as a text for graduate courses in technology and innovation management.

Chinese Student Migration and Selective Citizenship Lisong Liu, 2015-08-20 Since China began its open door and reform policies in 1978, more than three million Chinese students have migrated to study abroad and the United States has been their top destination. The recent surge of students following this pattern along with the rising tide of Chinese middle and upper classes emigrating out of China have aroused wide public and scholarly attention in both China and the US. This book examines the four waves of Chinese student migration to the US since the late 1970s, showing how they were shaped by the profound

changes in both nations and by US China relations It discusses how student migrants with high socioeconomic status transformed Chinese American communities and challenged American immigration laws and race relations The book suggests that the rise of China has not negated the deeply rooted American dream that has been constantly reinvented in contemporary China It also addresses the theme of selective citizenship a way in which migrants seek to claim their autonomy proposing that this notion captures the selective nature on both ends of the negotiations between nation states and migrants It cautions against a universal or idealized dual citizenship model which has often been celebrated as a reflection of eroding national boundaries under globalization This book draws on a wide variety of sources in Chinese and English as well as extensive fieldwork in both China and the US and its historical perspective sheds new light on contemporary Chinese student migration and post 1965 Chinese American community Bridging the gap between Asian and Asian American studies the book also integrates the studies of migration education and international relations Therefore it will be of interest to students of these fields as well as Chinese history and Asian American history more generally
