of what happened in a seedy Southern California town when an enthusiastic and unrepentant heroin addict named Dion Fuller sheltered a U S Marine who d stolen night vision goggles and perhaps a few top secret files from a nearby military base Dion found himself arrested under the ostensible auspices of The Patriot Act for conspiring with international terrorists to smuggle Top Secret military equipment out of Camp Pendleton The fact that Dion had absolutely nothing to do with international terrorists smuggling Top Secret military equipment or Camp Pendleton didn t seem to bother the military He was released from jail after a six day long Abu Ghraib style interrogation Subsequently he believed himself under intense government scrutiny and he suspected the subject of bizarre experimentation involving cloaking electro optical camouflage so extreme it renders observers practically invisible from a distance of some meters by the Department of Homeland Security Hallucination Perhaps except Robert Guffey an English teacher and Dion s friend tracked down and interviewed one of the scientists behind the project codenamed Chameleo experimental technology which appears to have been stolen by the U S Department of Defense and deployed on American soil More shocking still Guffey discovered that the DoD has been experimenting with its newest technologies on a number of American citizens A condensed version of this story was the cover feature of Fortean Times Magazine September 2013 [Connecting Cultures](#) Rebecca L. Over the past 40 years life in Timor Leste has changed radically Before 1975 most of the population lived in highland villages spoke local languages and rarely used money Today many have moved to peri urban lowland settlements and even those whose lives remain dominated by customary ways understand that those of their children will not For the Atoni Pah Meto of Timor Leste's remote Oecussi Enclave the world was neatly divided into two distinct categories the meto indigenous and the kase foreign Now matters are less clear the good things of the globalised world are pursued not through rejecting the meto ways of the village or collapsing them into the kase but through continual crossing between them In this way the people of Oecussi are able to identify in the struggles of lowland life the comforting and often decisive presence of familiar highland spirits

*New Development Strategies* A. Kohsaka, 2004-05-24 This edited volume examines the flaws in the Washington Consensus The missing link identified is the relationship between market and government The East Asian Miracle showed that the market and government are complementary particularly with regard to economic development However the nature of this relationship has not been fully clarified This book assesses development strategies and policy issues in the context of individual and or regional economy's history and political economic reality The relationship may be conditional to these two factors With these perceptions in mind the book focuses on the role and significance of government in economic development in pursuit for new development strategies
