Shatter the glass ceiling in stilettos. In *Tread Loudly*, Kristine Cherek shares her experiences as a female professional in a male-dominated culture. Through her two-decade journey as a female attorney, corporate executive, and college professor, Cherek has cultivated a plethora of wisdom and poignant guidance to share about how to persevere in the biased world of business and life in general. Cherek is here to tell you that as women in the workforce and in broader society, you are not alone. She dispels the myth of having it all and uses personal stories and relatable examples to convey how you can dream big, take risks, and go for what you want. In this inspiring call to action, Cherek shines a light on the bias, gender discrimination, and inequities that women still face in the workplace. She calls on business leaders to make the changes necessary to level the playing field and invites you to join in the fight for equality. She wants you to be empowered to demand equal treatment and speak out against wrongs. She wants you to know, believe, and live the truth that you do not have to dim your light to fit into a predetermined role in society. You not only have the power to succeed in your career, but you also have the power to change the workplace culture for women who will come after you. **The Science of Boredom** Sandi Mann, 2017-11-02. Are we living in an age where we are more boredom-prone? Or are other people boring us? Or could we be that boring person? In our current information age, we are constantly connected to technology and have so many varied ways to spend our leisure time that we should all surely never know what boredom feels like. Yet boredom appears to be on the rise; it seems that the more we have to stimulate us, the more stimulation we crave. In a quest to relieve our boredom, we engage in dangerous risk-taking, from extreme sports to drugs to gambling to anti-social behaviour, or we overindulge in shopping or eating. *The Science of Boredom* explores the causes and consequences of boredom in the fast-paced twenty-first century. Parents are desperate to keep their children entertained during every waking moment; the education system is geared towards interactivity, and

attention spans are dropping as we use multiple devices at all times But the world of work can be increasingly repetitive and routine and we are losing the ability to tolerate this everyday tedium Using Sandi Mann s own ground breaking research into boredom this book tells the story of how we act react and cope when we are bored and argues that there is a positive side to boredom It can be a catalyst for humour fun reflection creativity and inspiration The radical solution to the boredom problem is to harness it rather than try to avoid it Allowing yourself time away from constant stimuli can enrich your life We should all embrace our boredom and see the upside of our downtime
