literature is found not in his social criticism but in his refusal to dissociate himself from his past or to become assimilated into the mainstream of English culture at the expense of his class identity She argues that a clear set of aesthetic principles informs his finest work and provides the first thematic and structural classification of his poetry Focussing on the major vocational poems and selected passages from the prose she shows how Clare formulated the creative ideas and rhetorical techniques that allowed him to give unified expression to both his social and literary concerns Clare s deep involvement with nature and rural England was not only the basis for his poetry but also enabled him to articulate beliefs which opposed the inhumane values of his time
