*When Students Have Power* Ira Shor, 1996 What happens when teachers share power with students In this profound book Ira Shor the inventor of critical pedagogy in the United States relates the story of an experiment that nearly went out of control Shor provides the reader with a reenactment of one semester that shows what really can happen when one applies the theory and democratizes the classroom This is the story of one class in which Shor tried to fully share with his students control of the curriculum and of the classroom After twenty years of practicing critical teaching he unexpectedly found himself faced with a student uprising that threatened the very possibility of learning How Shor resolves these problems while remaining true to his commitment to power sharing and radical pedagogy is the crux of the book Unconventional in both form and substance this deeply personal work weaves together student voices and thick descriptions of classroom experience with pedagogical theory to illuminate the power relations that must be negotiated if true learning is to take place

**Developing Culturally Responsive Learning Environments in Postsecondary Education** R. Jason Lynch, Charmion B. Rush, 2024-01-01 U S colleges and universities are rapidly diversifying In 2018 the U S Census Bureau estimated that nearly half of undergraduate students were of non white racial identities with that number only increasing for future generations This increase in diversity holds true for many other identity groups Yet faculty demographics remain disproportionately white and male For years

students have called for institutions of postsecondary education to support their success through adopting more culturally relevant practices for teaching and learning. Scholarship on student success in college has also echoed this call. Developing Culturally Responsive Learning Environments in Postsecondary Education was developed to help postsecondary educators answer this call through a multilayered view of student support within the college classroom and beyond. Specifically, this book features twenty-three chapters divided into four parts. Each part corresponds with four thematic areas identified as an important component in developing culturally responsive learning environments: unpacking educator cultural competence, learning experiences of the 21st-century college student, culturally responsive teaching and instruction, and transforming curriculum content and environments. Authors representing diverse backgrounds and institutional contexts come together to offer their own scholarly and practical expertise to tackle issues ranging from combating implicit bias and building cultural competence to exploring specific student experiences and practical ways to implement culturally responsive pedagogies. In addition to each chapter, this volume provides a companion case scenario exercise for you to directly apply the content from the book. Ultimately, we hope this book provides you with a meaningful starting place to help you honor the diversity of your students and support their success within your learning context.
