A Practicum in TESOL Graham Crookes, 2003-07-14 A Practicum in TESOL is a valuable source book for both teacher educators and classroom teachers It ranges widely across key areas of practice from the nitty gritty of lesson planning and classroom management through conceptual areas such as motivation and observation to crucial if more abstract aspects such as teachers beliefs and values It also delves into the moral and political dimensions of teaching Discussion of these areas though well grounded in relevant academic literatures is also supported by extensive quotes from real teachers working on their practice The treatment is sufficiently challenging to interest the experienced teacher while covering matters of basic practice that would be of concern to the beginner Anyone doing a TESOL practicum will want to use this book whether as an in service teacher or as a teacher longing to further their professional development A Practicum

in TESOL can be used individually or in groups

The Strides of Vishnu Ariel Glucklich, 2008-05-09 Books about Hinduism often begin by noting the immense size and complexity of the subject Hinduism is vast and diverse they say Or it doesn't exist at all Hinduism is merely a convenient and foreign term that masks a plurality of traditions In either case readers are discouraged by the thought that they are getting only a tiny sample or a shallow overview of something huge and uniquely difficult This book is designed to be accessible and sophisticated holding the reader's interest in the dynamic sequence of ideas through time and place Each of the 12 chapters combines historical material with key religious scientific and philosophical ideas supported by substantial quotations from scriptures and other texts Historic places and persons are fleshed out as actors in a narrative about the relation of the sacred to ordinary existence as it is mediated through arts sciences rituals and philosophical ideas Although many books introduce the Hindu tradition this is the first with a broad historical and cultural focus that emphasizes archaeological as well as textual evidence

Science for the Twenty-first Century Ana María Cetto, Unesco, 2000 This volume contains an edited selection of the materials lectures and debates presented at the World Conference on Science which took place in Budapest in 1999 Topics ranging from the value of fundamental research to the public perception of science and ethical issues are presented

Science Studies Meets Colonialism Amit Prasad, 2022-10-06 The field of science and technology studies has long critiqued the idea that there is such a thing as a universal and singular Science that exists independently of human society interpretation and action However the multiple significant ways in which colonial legacies impact and shape this project have often remained out of sight at the edges of the discipline In this important book Amit Prasad seeks to rectify this erasure demonstrating that problematic idealized imaginaries of science scientists and the scientific realm can be traced back to the birth of modern science during European colonialism Such visions of science and technology have undergirded the imagination of the West and thus of its others constructing hierarchies of technological innovation and scientific value but also unexpectedly leaving society vulnerable to contemporary threats of misinformation and conspiracy theories as has been strikingly evident during the COVID 19 pandemic Far from being an indictment of STS this rigorous book seeks to highlight such concerns to make STS engage more carefully with issues of colonialism and thus to enable readers to understand the rapidly changing global topography of science and technology today and into the future

India Romila Thapar, 2001 In this collection of essays edited and with an introduction by Romila Thapar fourteen of India's foremost scholars and specialists in various fields explore the challenges that lie before twenty-first century India in its quest for a democratic and just society Globalization and the IT revolution provide a new context to the problems faced by contemporary India But will globalization ensure rapid economic growth and development in the face of low literacy rising population and the gradual withdrawal of the State from social commitments Will imitation westernization and the consumerism that comes with it further a just society What are the strains that democracy will be subjected to in the empowerment struggle by marginalized groups and the growing social and

economic disparities that are often accompanied by violence and terrorism How will India's multiculturalism be affected by the upsurge of various identities and of exclusionist nationalism Will the family as an institution be transformed to enhance gender justice Will new technology ensure the autonomy of the media Can the mauling of the Indian landscape be halted before India in the early decades of this millennium Popular Literature Rupayan Mukherjee, Jaydip Sarkar, 2022 This volume offers a selection of critical essays on texts that can be broadly categorized as popular literature In addition to critical readings of popular texts such as *The Jungle Book* and *The Hound of the Baskervilles* the book considers populist tendencies in literary classics like *Jane Eyre* and *Frankenstein* East Asian Science, Technology, and Medicine, 1999 Astronomy in India, 1784-1876 Joydeep Sen, 2016-09-12 Indian scientific achievements in the early twentieth century are well known with a number of heralded individuals making globally recognized strides in the field of astrophysics Covering the period from the foundation of the Asiatic Society in 1784 to the establishment of the Indian Association for the Cultivation of Science in 1876 Sen explores the relationship between Indian astronomers and the colonial British He shows that from the mid nineteenth century Indians were not passive receivers of European knowledge but active participants in modern scientific observational astronomy *Bomb, Book and Compass* Simon Winchester, 2008-09-25 Before fate intervened Joseph Needham was a distinguished biochemist at Cambridge University married to a fellow scientist In 1937 he was asked to supervise a young Chinese student named Lu Gwei Djen and in that moment began the two greatest love affairs of his life Miss Lu and China Miss Lu inspired Needham to travel to China where he initially spent three dangerous years as a wartime diplomat He established himself as the pre eminent China scholar of all time firm in his belief that China would one day achieve world prominence By the end of his life Needham had become a truly global figure travelling endlessly and honoured by all though banned from America because of his politics And in 1989 after a fifty two year affair he finally married the woman who had first inspired his passion *The Magnificent Barbarian* is Simon Winchester at his best at once a magnificent portrait of one man's remarkable life and a riveting exploration of the country that so engaged him **The Human Right to Science** Cesare P. Science and the Decolonization of Social Theory Gennaro Ascione, 2016-08-12 This book addresses the ideological figure of modernity its presumed historical significance as an era and its theoretical adequacy as a frame It shows how science is evoked to prevent the sociological imagination from elaborating non Eurocentric categories and terminologies that are more adequate for a global age The idea of modernity should not only be contested but radically unthought in its foundational assumptions These assumptions inform concepts such as secularization emancipation the global and accumulation of capital This book frees these concepts from ethnocentrism and discloses a path toward a new non Eurocentric global social theory Gennaro Ascione explores the transformative potential of decolonizing knowledge through a radical reconsideration of the historical and epistemological role that the intellectual reference to science plays in the construction of concepts This ground breaking work challenges social theorists to think

globally beyond modernity bringing together social theory and science in an unprecedented way. Importantly it makes accessible a new space of missing theorization for further developments and inquiries in the field. **History of**

Technology Volume 29 Ian Inkster, 2016-09-30 The common question from the western point of view is of the sort why did China lose its early leadership of productive technologies to Europe during the early modern period. Answers to this seemingly clear enquiry vary from general cultural inwardness to the interferences of imperial governance. This collection surveys such theories but alters the issue by raising the notion that Chinese technologies did not so much fail as move along a path different from that of Europe. Our second collection on the Mindful Hand also shifts common ground by querying and modifying common views of the links between knowledge and technique in early modern European development. Scientific or related knowledge was not brought to technique as a socio cultural gift from an educated elite to the working man. Rather educated gents, practitioners, instrument makers, craftsfolk and technicians of all kinds intermingled both socially and in terms of the recognition of technical problems as well as in the assemblage of the mental, commercial and cognitive resources required to pursue innovative production projects.
