Gipe-Lazarou, Konstantinos Moraitis, 2024-08-22 Tales of terror mythoi of the macabre phobic fantasies and numinous narratives have played an integral role in collective cultural expression since antiquity It was however in 19th century Europe that weird fiction reached its first apogee as a cultural and political antithesis to the adverse conditions of modern life It expressed Western society's collective disappointment with the Enlightenment's unrealized promises for a better world capturing the agony of urban populations in suffocating industrial cities the suffering caused by centuries of ongoing military confrontation and the hopelessness of the common citizen in the wake of rapid and complex technological and political change This volume presents a rational demystification of irrational cultural expressions with the dual intention of being used as both an academic reference and a popular guide into the realm of chimeric cultural visions It analyzes the correlation of urban mythologies and their concurrent cultural paradigms tracing the impact of the collective subconscious through literature comic strips cinematography music architecture and art

Non-Plan: Essays on Freedom, Participation and Change in Modern Architecture and Urbanism Jonathan Hughes, Simon Sadler, 2013-01-11 Non Plan explores ways of involving people in the design of their environments a goal which transgresses political categories of right and left Attempts to circumvent planning bureaucracy and architectural inertia have ranged from free market enterprise zones to self build housing and from squatting to sophisticated technologies of prefabrication Yet all have shared in a desire to let people shape the built environment they want to live and work in How can buildings better reflect the needs of their inhabitants How can cities better facilitate the work and recreation of their many populaces Modernism had promised a functionalist approach to resolving the architectural needs of the twentieth century yet the design of cities and buildings often appears to confound the needs of those who use them their design and layout being highly regulated by restrictive legislation planning controls and bureaucracy Non Plan considers the theoretical and conceptual frameworks within which architecture and urbanism have sought to challenge entrenched boundaries of control focusing on the architectural history of the post war period to the present day This provocative book will be of interest to architects planners and students of architecture design town planning and architectural history Its contributors include architects critics and historians including many whose work helped shape the Non Plan debate during the period List of contributors Cedric Price Benjamin Franks Elizabeth Lebas Eleonore Kofman Ben Highmore Yona Friedman Paul Barker Clara Greed Barry Curtis Colin Ward Ian Horton John Beck Chinedu Umenyilora and Malcolm Miles

Milieus of Minutiae Elizabeth Brogden, Christiane Frey, 2024-12-19 The long history of tiny

matters in the sciences thought and culture From catastrophic weather and steady warming caused by the accumulation of carbon particles in the Earth's atmosphere to societies brought to a standstill by microscopic viruses the new millennium has reminded us of how the minutest of phenomena can have outsized effects This notion is one that has preoccupied the European and Anglo American cultural imaginary since at least early modernity Milieus of Minutiae brings together an interdisciplinary group of scholars to investigate various forms and appearances of minutiae prior to and beyond the advent of magnification The collection illuminates connections between the empirical practices and technologies with which minutiae have come to be associated and the broader more diffuse discourses from the philosophical to the artistic that have attended theories of smallness before and after Hooke's Micrographia Placing essays on Renaissance poetry Romantic fiction and matters of punctuation alongside essays on early modern germ theory and the optics of microscopic technology this rigorously framed volume extends from sixteenth century pathology to twentieth century architectural theory natural science to literature and art

Architecture and Violence Bechir Kenzari, 2011 In today's turbulent times few subjects deserve a closer scrutiny than the interactions between violence and constructed environment Modernity's contradictory histories laid bare the fact that it is impossible to consider architecture simply a benign passive victim of humanity's violent vices Built space is as capable of incarnating violent acts as enacting them disciplining and silencing the subject in the process In this compelling volume some of the most incisive thinkers of contemporary architectural theory make manifest the intricacies of interrelations between architecture and violent events Employing a wide variety of perspectives and methodical approaches the authors examine some of the most dramatic and unexpected instances of these vexing relations Back cover

Can Architecture Be an Emancipatory Project? Nadir Z. Lahiji, 2016-03-25 Can architectural discourse rethink itself in terms of a radical emancipatory project And if so what would be the contours of such a discourse

Walter Benjamin and Architecture Gevork Hartoonian, 2009-10-27 The essays compiled in this book explore aspects of Walter Benjamin's discourse that have contributed to the formation of contemporary architectural theories Issues such as technology and history have been considered central to the very modernity of architecture but Benjamin's reflection on these subjects has elevated the discussion to a critical level The contributors in this book consider Walter Benjamin's ideas in the context of digitalization of architecture where it is the very technique itself that determines the processes of design and the final form This book was published as a special issue of Architectural Theory Review

Utopias and Architecture Nathaniel Coleman, 2007-05-07 Utopian thought though commonly characterized as projecting a future without a past depends on golden models for re-invention of what is Through a detailed and innovative re-assessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers Coleman offers the reader a unique perspective of idealism in architectural design With unparalleled depth and focus of vision on the work of Le Corbusier Louis I Kahn and Aldo van Eyck this book persuasively challenges predominant

assumptions in current architectural discourse forging a new approach to the invention of welcoming built environments and transcending the limitations of both the postmodern and hyper modern stance and orthodox modernist architecture **Time, Language, and Visuality in Agamben's Philosophy** J. Doussan, 2013-05-21 Giorgio Agamben a philosopher both celebrated and reviled is among the prominent voices in contemporary Italian thought today His work which touches upon fields as diverse as aesthetics and biopolitics is often understood within a framework of Aristotelian potentiality With this incisive critique Doussan identifies a different tendency in the philosopher s work an engagement with the problem of time that is inextricably bound up with language and visuality Founded in his early writings on metaphysics and continuing to his present occupation with inoperativity Time Language and Visuality in Agamben s Philosophy forges an original path through Agamben s extensive commentary on the linguistic and the visual to illuminate the recurrent temporal theme of capture and evasion the cat and mouse game that bears the foundational violence of not just representation but concept formation itself In the process Doussan both reveals its limit and establishes a ground for future engagements **Urban Maps** Richard Brook, Nick Dunn, 2016-12-05 This book concerns the city and the devices that define the urban environment by their presence representation or interpretation The texts offer an interdisciplinary discourse and critique of the complex systems artifacts interventions and evidences that can inform our understanding of urban territories on surfaces in the margins or within voids The diverse media of arts practices as well as commercial branding are used to explore narratives that reveal latent characteristics of urban situations that conventional architectural inquiry is unable to do The subjects covered are presented within a wider framework of urban theory into which are embedded case study examples that outline the practices processes and interpretations of each theme The chapters provide a contemporary reading of urban socio cultural conditions using mapping as a lens to explore and communicate the social phenomena and lived experiences of the dynamic and temporal city Mapping is developed as a form of critical instrumentality to expose record and contribute to the understanding of the singular essences of space place and networks by thematic cognitive and experiential modes of investigation **Ambient Screens and Transnational Public Spaces** Nikos Papastergiadis, 2016-07-01 Large public screens have now become a ubiquitous part of the contemporary cityscape Far from being simply oversized televisions the media experts contributing to Ambient Screens and Transnational Public Spaces put forward a strong case that such screens could serve as important sites for cultural exchange Advances in digital technology spell the possibilities of conducting mobile modes of interaction across national boundaries and in the process expose the participants to novel sensory experiences giving rise to a new form of public culture Understanding this phenomenon calls for a reconceptualization of public space and ambience as well as connecting the two concepts with each other This pioneering study of the impact of media platforms on urban cultural life presents a theoretical analysis and a history of screens followed by discussions of site specific urban screen practices on five continents There is also a substantial examination of the world s first real time cross cultural exchange via the networking of

large public screens located in Melbourne and Seoul Ambient Screens and Transnational Public Spaces is a provocative interdisciplinary collection that studies public screens in diverse urban contexts ranging from Shanghai to Montreal Taken together these essays redefine commonly held notions about cultural policy information citizenship and the quotidian experiences of the Media City A must read for anyone interested in urban media studies and cultural planning Janine Marchessault Professor of Cinema and Media Studies York University Large screens in public spaces are almost taken for granted in some cities while in others they are barely present This fascinating book provokes new thinking about mediatization as a transformative dimension of urban life The editor and authors deserve to be congratulated for a welcome and timely volume demonstrating how large screens in cities transform public spaces and become a platform for new modes of cultural exchange Lily Kong Lee Kong Chian Chair Professor of Social Sciences Singapore Management University

From a Nation Torn Hannah Feldman, 2014-02-03 From a Nation Torn provides a powerful critique of art history's understanding of French modernism and the historical circumstances that shaped its production and reception Within art history the aesthetic practices and theories that emerged in France from the late 1940s into the 1960s are demarcated as postwar Yet it was during these very decades that France fought a protracted series of wars to maintain its far flung colonial empire Given that French modernism was created during rather than after war Hannah Feldman argues that its interpretation must incorporate the tumultuous decades of decolonization and their profound influence on visual and public culture Focusing on the Algerian War of Independence 1954-1962 and the historical continuities it presented with the experience of the Second World War Feldman highlights decolonization's formative effects on art and related theories of representation both political and aesthetic Ultimately From a Nation Torn constitutes a profound exploration of how certain populations and events are rendered invisible and their omission naturalized within histories of modernity **Experience**

and Conflict: The Production of Urban Space Panu Lehtovuori, 2016-12-05 When designing planning and building urban spaces many contradictory and conflicting actors practices and agendas coexist This book propounds that at present this process is conducted in an artificial reality Concept City characterized by a simplified and outdated conception of space It provides a constructive critique of the concepts underlying the practices of planning and architecture and in order to facilitate more dynamic inclusive and subtle practices it formulates a new theory about space in general and public urban space in particular The central notions in this theory are temporality experiment and conflict which are grounded on empirical observations in Helsinki Manchester and Berlin While the book contextualizes Lefebvre's ideas on urban planning and architecture it is in no way limited to Lefebvrian discourse but allows insights to new theoretical work including that of Finnish and Swedish authors In doing so it suggests and develops exciting new approaches and tools leading to experiential urbanism **The Anaesthetics of Architecture** Neil Leach, 1999 Leach examines the consequences of the growing preoccupation with images and image making in contemporary architectural culture arguing that focusing on images dulls
