**In Defense of Informal Logic** D.S. Levi, 2013-03-09 My impulse when I decided to collect into a single volume the essays on topics in logical theory and related subjects that I have written in the last fifteen years was to borrow from the title of a work by Sextus Empiricus and call my collection Against the Logicians Although the essays address a variety of problems that interest me the thread that runs through them is a scepticism about how logicians see things So the title appealed to me However I had second thoughts and chose instead a title of one of my own essays In Defense of Informal Logic which emphasizes my support for other approaches Although my criticisms of logical theory are designed to cut deeply I do not want to be unresponsive to the needs that it is supposed to satisfy However my position that we have adequate resources for critically analyzing a particular argument and do not need a theory of argumentation will not completely satisfy those who think that there is a need for it So I want them to know that I am taking their concerns seriously

**Discrete Mathematics with Ducks** Sarah-marie Belcastro, 2018-11-15 Discrete Mathematics with Ducks Second Edition is a gentle introduction for students who find the proofs and abstractions of mathematics challenging At the same time it provides stimulating material that instructors can use for more advanced students The first edition was widely well received with its whimsical writing style and numerous exercises and materials that engaged students at all levels The new expanded edition continues to facilitate effective and active learning It is designed to help students learn about discrete mathematics through problem based activities These are

created to inspire students to understand mathematics by actively practicing and doing which helps students better retain what they've learned. As such, each chapter contains a mixture of discovery-based activities, projects, expository text, in-class exercises, and homework problems. The author's lively and friendly writing style is appealing to both instructors and students alike and encourages readers to learn. The book's light-hearted approach to the subject is a guiding principle and helps students learn mathematical abstraction. Features: The book's Try This sections encourage students to construct components of discussed concepts, theorems, and proofs. Provided sets of discovery problems and illustrative examples reinforce learning. Bonus sections can be used by instructors as part of their regular curriculum for projects or for further study. **On the**

**Logos: A Naïve View on Ordinary Reasoning and Fuzzy Logic** Enric Trillas, 2017-05-05. This book offers an inspiring and naïve view on language and reasoning. It presents a new approach to ordinary reasoning that follows the author's former work on fuzzy logic. Starting from a pragmatic scientific view on meaning as a quantity and the common-sense reasoning from a primitive notion of inference which is shared by both laypeople and experts, the book shows how this can evolve through the addition of more and more suppositions into various formal and specialized modes of precise, imprecise, and approximate reasoning. The logos are intended here as a synonym for rationality which is usually shown by the processes of questioning, guessing, telling, and computing. Written in a discursive style and without too many technicalities, the book presents a number of reflections on the study of reasoning together with a new perspective on fuzzy logic and Zadeh's computing with words grounded in both language and reasoning. It also highlights some mathematical developments supporting this view. Lastly, it addresses a series of questions aimed at fostering new discussions and future research into this topic. All in all, this book represents an inspiring read for professors and researchers in computer science and fuzzy logic, in particular, as well as for psychologists, linguists, and philosophers.

**An Aristotelian Account of Induction** Louis Groarke, 2009. Through a study of argument, science, art, and human intelligence, Louis Groarke explores and builds on a line of Aristotelian thought that traces the origins of logic and knowledge to a mental creativity that is able to leap to insightful and truthful conclusions on the basis of restricted evidence. In *An Aristotelian Account of Induction*, Groarke discusses the intellectual process through which we access the first principles of human thought, the most basic concepts, the laws of logic, the universal claims of science and metaphysics, and the deepest moral truths. Following Aristotle and others, Groarke situates the first stirrings of human understanding in a creative capacity for discernment that precedes knowledge, even logic. Relying on a new historical study of philosophical theories of inductive reasoning from Aristotle to the twenty-first century, Groarke explains how Aristotle offers a viable solution to the so-called problem of induction while offering new contributions to contemporary accounts of reasoning and argument and challenging the conventional wisdom about induction. In recovering and developing philosophical ideas that have been largely overlooked or misrepresented by more recent sources, *An Aristotelian Account of Induction* makes a major contribution to the historical study of philosophy and to critical debate. **The Three Failures of**

**Creationism** Walter Fitch,2012-03-05 Walter M Fitch a pioneer in the study of molecular evolution has written this cogent overview of why creationism fails with respect to all the fundamentals of scientific inquiry He explains the basics of logic and rhetoric at the heart of scientific thinking shows what a logical syllogism is and tells how one can detect that an argument is logically fallacious and therefore invalid or even duplicitous Fitch takes his readers through the arguments used by creationists to question the science of evolution He clearly delineates the fallacies in logic that characterize creationist thinking and explores the basic statistics that creationists tend to ignore including elementary genetics the age of the Earth and fossil dating His book gives readers the tools they need for detecting and disassembling the ideas most frequently repeated by creationists Digital Revolution Supplement for For All Practical Purposes, Sixth Edition COMAP,2004-06

imperative to question the modern divorce of economics from ethics While the domains of economics and ethics were from antiquity through at least the eighteenth century understood in many cultures to be coterminous and mutually entailing the modern assumption has been that the goal of maximizing human prosperity and the aim of justly enhancing our lives as persons and as communities were functionally and practically distinct Working from a wide array of perspectives the contributors to this volume offer a set of challenges to the assumed independence of the quantitative and qualitative dimensions of human and planetary well being Reflecting on the complex interrelationship among economics justice and equity the book resists one size fits all approaches and struggles to revitalize the marriage of economics and ethics by activating cultural differences as the basis of mutual contribution to shared human flourishing The publication of this important collection will stimulate or extend critical debates among scholars and students working in a number of disciplines in the social sciences and humanities including philosophy history environmental studies economics and law Contributors Roger T Ames James Behuniak Jr Steve Bein Nalini Bhushan Purushottama Bilimoria Steven Burik Amita Chatterjee Baoyan Cheng Gordon Davis Jay L Garfield Steven F Geisz Peter D Hershock Larry A Hickman Kathleen M Higgins Heidi M Hurd Thomas P Kasulis Workineh Kelbessa Lori Keleher Oliver Leaman James McRae Jin Y Park James Peterman Naoko Saito May Sim Robert Smid Paul Standish Kenneth W Stickers Karsten J Struhl Meera Sushila Viswanathan Wu Shiu Ching Xu Di T Yamauchi Yang Liuxin

**Madhyamaka and Yogacara** Jay L. Garfield, Jan Westerhoff, 2015-03-16 Madhyamaka and Yogacara are the two principal schools of Mahayana Buddhist philosophy While

Madhyamaka asserts the ultimate emptiness and conventional reality of all phenomena. Yogacara is usually considered to be idealistic. This collection of essays addresses the degree to which these philosophical approaches are consistent or complementary. Indian and Tibetan doxographies often take these two schools to be philosophical rivals. They are grounded in distinct bodies of sutra literature and adopt what appear to be very different positions regarding the analysis of emptiness and the status of mind. Madhyamaka-Yogacara polemics abound in Indian Buddhist literature and Tibetan doxographies regard them as distinct systems. Nonetheless, scholars have tried to synthesize the two positions for centuries. This volume offers new essays by prominent experts on both these traditions who address the question of the degree to which these philosophical approaches should be seen as rivals or as allies. In answering the question of whether Madhyamaka and Yogacara can be considered compatible, contributors engage with a broad range of canonical literature and relate the texts to contemporary philosophical problems.

Talking God: Philosophers on Belief Gary Gutting, 2016-11-22 Through interviews with twelve distinguished philosophers including atheists, agnostics, and believers, *Talking God* works toward a philosophical understanding and evaluation of religion. Along the way, Gary Gutting and his interviewees challenge many common assumptions about religious beliefs. As tensions simmer and often explode between the secular and the religious forces in modern life, the big questions about human belief press ever more urgently: Where does belief or its lack originate? How can we understand and appreciate religious traditions different from our own? Featuring conversations with twelve skeptics, atheists, agnostics, and believers including Alvin Plantinga, Philip Kitcher, Michael Ruse, and John Caputo, *Talking God* offers new perspectives on religion, including the challenge to believers from evolution, cutting-edge physics, and cosmology; arguments both for and against atheism; and meditations on the value of secular humanism and faith in the modern world. Experts offer insights on Islam, Buddhism, and Hinduism as well as Judaism and Christianity. Topical and illuminating, *Talking God* gives readers a deeper understanding of faith today and how philosophers understand it.

From *Talking God*: Some say Buddhism is not a religion because Buddhists don't believe in a supreme being. This simply ignores the fact that many religions are not theistic in this sense. Chess is a game despite the fact that it is not played with a ball, after all. Jay Garfield from chapter 10: Buddhism: Religion Without Divinity. Why think that the creator was all-knowing and omnipotent? Maybe the creator was a student god and only got a B minus on this project. Louise Antony from chapter 2: A Case for Atheism. There are a large number, maybe a couple of dozen, of pretty good theistic arguments. None is conclusive, but each or at any rate the whole bunch taken together is about as strong as philosophical arguments ordinarily get. Alvin Plantinga from chapter 1: A Case for Theism. If you cease to believe in a particular religious creed like Calvinism or Catholicism, you have changed your mind and adopted a new position. But if you lose faith, everything is lost. You have lost your faith in life, lost hope in the future, lost heart, and you cannot go on. John Caputo from chapter 3: Religion and Deconstruction.
