**Environmental Crisis: Pollution and Governance** Dongfei Han, Mukesh Khare, Siyue Li, 2025-08-04 This book presents cutting edge research findings on environmental pollution and remediation covering key areas such as pollution analysis and monitoring as well as pollution control and restoration At the 2024 UN Environment Assembly environmental pollution and remediation were once again defined as one of the three major crises facing the planet The global environmental pollution issue remains severe despite the efforts of many countries and regions the situation is still far from optimistic Issues such as heavy metals and radioactive contamination in seawater are gradually becoming significant topics in environmental pollution Accurate composition analysis and effective remediation strategies are essential in addressing pollution and enhancing the accuracy of pollutant source analysis and the effectiveness of harmless pollution management are key subjects of discussion in this book Furthermore the book aims to facilitate the exchange of scientific information among scholars from leading universities research centers and high tech enterprises around the world This book will be highly beneficial to scholars engineers and researchers in the fields of environmental engineering and environmental remediation **Urban Rainfall**

**Runoff Pollution Control Technology and Application** Dezhi Sun, Fei Qi, 2025-06-14 This book comprehensively presents rapid progress and development in urban rainfall runoff pollution control technology in China since the 11th Five Year Plan period It covers many aspects of the research including background summary assessment methods control technology and various case studies to the validation of the control theory and the development of sponge city construction The book appeals to scholars and graduates majoring in environmental engineering and water supply engineering It is also suitable for practitioners engaged in urban drainage system *SAEQ Issue 10*, 2016-12-30 Issue 10 October November December 2016 **Assessment Of Material Strength Properties Of One Scale Level Transferred From Test Data At Another Level** A M Pashayev A Kh Janahmadov M Y Javadov The paper examines the forecast methods of failure process dynamics at one scale level based on parameters defined at another level The industrial forecast methods were developed suited for engineering practice The specific scale levels of fracturing are considered on the basis of the dynamic process characteristics and the space time approach **Space Time Scale Invariance At Dynamic Fragmentation Of Quasi Brittle Materials** N G Javadov M I Aliyev The paper examines the fractured quasi brittle materials and the scale invariance with respect to time and space variables It confirms that the large scale clustering in the ensemble of defects accompanying the transition from the dispersed to the microscopic resolution have the signs of phenomena that is characteristic to non equilibrium critical systems It demonstrates that with respect to the quasi brittle materials the dissipative ability is associated with the scenarios of formation and interaction of the multi scale collective defect modes in conditions of the specific type of the critical events the structural scaling transitions **Nano Tribological Processes At Electric Discharge Of Discrete Ohmic Contacts Of Metal Polymer Pairs** A Kh Janahmadov A I Volchenko E S Pirverdiyev The paper examines the nano tribological processes at the electrical discharge

in the discrete ohmic contacts of the metal polymer pairs of tribosystem The nature of destructive processes in the polymeric film of pads is explained

**Adjusting The Starting Pressure Of Gas Lift Well To The Switching Lifting Device Of The Reverse Valves System** O H Mirzayev The results of starting pressure change by switching injection direction of working agent from circular annulus to the central part in gas lift wells have been given The valves are placed on the pipe surface in definite depth under liquid column As a result of investigation it has been determined that the application of the method in the wells with big depth and high liquid column gives an opportunity to reduce starting pressure Application of the method in complicated exploitation conditions gives effective results

**Comparative Analysis Of Trading Systems Performances With Respect To Transaction Cost Part 2** E J Janahmadov The purpose of this paper is to compare and analyze the performance of trading rules applied to the underlying and derivative products Three different trading market indicators were chosen from the range of trading rules according to their performance relatively to Dow Jones Industrial Average On the basis of these technical indicators the automated trading systems were developed and then applied to the underlying instrument such Dow Jones Industrial Average The performances of trading systems and profit loss indexes were compared and analyzed The results are compared with buy and hold strategy and performance of underlying security The results of the research intend to show the effect of the transactions costs on the performance of trading systems and optimal could be applied to invest into underlying or derivatives of underlying

**Ferroelectricity at the Nanoscale** Vladimir Fridkin, Stephen Ducharme, 2013-10-25 The investigation of nanosized ferroelectric films and ferroelectric nanocrystals has attracted much attention during the past 15 20 years There is interest in the fundamental and applied aspects The theoretical basis is connected with the development of the Landau Ginzburg Devonshire LGD mean field and the first principles theories to the ultrathin ferroelectric films with thickness in the vicinity of critical size Important potential applications are possible nanosize ferroelectric films in non volatile memories microelectronics sensors pyroelectric and electro optic devices This new area of research of ferroelectricity is still in impetuous development and far from completion Many topics elucidated need generalization The book contains theory and experimental data for a wide range of ferroelectric materials

***Switched Linear Systems*** Zhendong Sun, 2006-03-30 Switched linear systems have enjoyed a particular growth in interest since the 1990s The large amount of data and ideas thus generated have until now lacked a co ordinating framework to focus them effectively on some of the fundamental issues such as the problems of robust stabilizing switching design feedback stabilization and optimal switching This deficiency is resolved by this book which features nucleus of constructive design approaches based on canonical decomposition and forming a sound basis for the systematic treatment of secondary results theoretical exploration and logical association of several independent but pivotal concerns in control design as they pertain to switched linear systems controllability and observability feedback stabilization optimization and periodic switching a reliable foundation for further theoretical research as well as design guidance for real life engineering applications through the integration of novel

ideas fresh insights and rigorous results      **Stability Theory of Switched Dynamical Systems** Zhendong Sun, Shuzhi Sam Ge, 2011-01-06 There are plenty of challenging and interesting problems open for investigation in the field of switched systems Stability issues help to generate many complex nonlinear dynamic behaviors within switched systems The authors present a thorough investigation of stability effects on three broad classes of switching mechanism arbitrary switching where stability represents robustness to unpredictable and undesirable perturbation constrained switching including random within a known stochastic distribution dwell time with a known minimum duration for each subsystem and autonomously generated with a pre assigned mechanism switching and designed switching in which a measurable and freely assigned switching mechanism contributes to stability by acting as a control input For each of these classes this book propounds detailed stability analysis and or design related robustness and performance issues connections to other control problems and many motivating and illustrative examples      *Government and Codeswitching* Helena Halmari, 1997-01-01 Bilingual codeswitching is a complex multifaceted phenomenon which calls for explanations on several different linguistic levels This volume focuses on one such level the level of syntax An explanation for the regularities and consistencies in the codeswitching patterns of American Finns in their spontaneous conversations is sought for in the Universal Grammar based principle of government as realized in case assignment and agreement relations A bulk of the Finnish English intrasentential data get their explanation on the structural hierarchical level but this level of syntax is found to be interestingly intertwined with sociolinguistic psycholinguistic and discourse levels which all contribute to variation in codeswitching patterns The proposed principle of government is seen as one important explanation in typologically certain kinds of language pairs such as Finnish and English however this principle is not treated as a monolithic constraint but rather as the leading tendency which is occasionally overridden by other than syntactic forces The volume is intended as a complement not as a contradiction to earlier explanations of codeswitching phenomena Its main message is while all linguistic levels contribute to the construction of bilingual speech the importance of syntax can not be ignored      *NBS Technical Note* , 1974-03      **Lasers, Molecules, and Methods, Volume 73** Joseph O. Hirschfelder, Robert E. Wyatt, Rob D. Coalson, 2009-09-08 Based on a symposium on lasers molecules and methods held at the Los Alamos Center for Nonlinear Studies held in July 1986 Contributors present recent advances in theoretical and experimental research on a diversity of dynamical and optical phenomena resulting from the interactions of laser beams with molecules They describe the predictive results of sophisticated mathematical models the equipment involved in experiments and reveal new insights into molecular structure and behavior      **Operations Research Proceedings 2024** Lukas Glomb, 2025-09-12 This book contains a selection of peer reviewed papers presented at the International Conference on Operations Research OR 2024 held at the Technical University of Munich Germany from September 3 to 6 2024 Over 650 scientists from all over the world attended the OR 2024 in Munich Three plenaries and nine semi plenaries covered theoretical aspects of Operations Research applications and real world practices In addition more

than 500 presentations were held over three days in up to 23 parallel sessions Covering a wide range of topics the book highlights cutting edge research and practical applications across various domains of modern operations research It places a special emphasis on the theme Data Learning and Optimization exploring how data driven approaches machine learning techniques and optimization strategies are shaping decision making processes and operational efficiency The contributions in this book reflect the diversity and innovation in the field making it a valuable resource for researchers practitioners and academics alike *Proceedings of the International Field Exploration and Development Conference 2023* Jia'en

Switching Well: Bestsellers in 2023 The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the fascinating narratives that have captivated audiences this year. Switching Well : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Switching Well : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Switching Well : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
