Commonwealth Daniel Judah Elazar,2001-01-01 The late Daniel J Elazar was increasingly concerned with the distortions of democracy in contemporary society In Commonwealth he brought together a distinguished group of political scientists to examine the Swiss model of democracy in its original emphasis on community or the commonwealth Contributors to the volume take the Swiss model as a base from which to critique the liberal model best exemplified by the United States While it is admittedly the best contemporary example of liberal democracy or civil society America also displays the problems of this model The modern idea of communal democracy has almost completely disappeared from the United States contributors argue In incisive and cogent essays they suggest that the modern idea of communal democracy may not just be an alternative but a needed antidote to many of the problems with the American system The scholars gathered in this important collection explore the question of how to maintain both community and liberty while at the same time adjusting to changes in the scale of political organization needed for economic prosperity and defense The results yield a unique perspective on contemporary democracy for political theorists and concerned lay readers alike **Switzerland** Heinz K. Meier,Regula A. Meier,1990

Switzerland Mark Honan,2000 This guide includes a section on hiking cycling sailing and skiing It covers scenic train journeys and up to date recommendations on where to stay and eat for every budget Detailed notes include Switzerland s architecture from wood sided chalets to the Gothic Muenster in Bern Basic Data on the Economy of Switzerland William E. Yett,1966 *The Palatine Immigrant* ,1992 **Political Economy of Human Rights** Bas de Gaay Fortman,2011-06-15 The plethora of literature produced over the past decade in response to the perceived failure of the human rights project to deliver results for billions of people living in adverse environments has usually focused on international legal standards and mechanisms with little regard for the root structural realities that constrain their implementation Hence a text that primarily focuses on the major challenge of realisation of human rights in the context of diverse realities is urgently needed This book then provides an analytical as well as inspirational text on human rights from a contextual perspective it offers a reconceptualisation of human rights as not merely legal resources but political tools as well After an introduction that familiarizes the reader with some of the key concepts used throughout the book is divided into six chapters The first two combine a critique of the overly legal use of human rights with a reconceptualisation of their potential as powerful tools outside of the legal context The next two chapters examine the nature of the structural challenges that face realisation both on the global and on the local level The last two chapters analyse two major areas of the human rights deficit the structural non implementation of the rights of the poor and the failing protection of non dominant collectivities Finally a concluding chapter elaborates on the main findings and insights gained The book combines rigorous juridical study with a focus on political economic analysis of rights in context Hence it aims at an interdisciplinary treatment of human rights as opposed to

current texts that have a tendency to be monodisciplinary The book should be of interest to students of human rights political economy law and conflict studies as well as those who work or research in these areas

switch to sustainable energy sources and a circular economy in the hope of preventing environmental problems that threaten life on Earth Each chapter provides an accessible bank of knowledge on which existing theory and practice can be developed and new projects undertaken The book adopts a highly interdisciplinary approach for open science bridging theoretical insights with practical applications and offers a comprehensive perspective that is both informative and actionable so it can be used by academics researchers policy makers and cultural professionals for planning and development within the cultural sector Biljana Mickov is a cultural researcher and professor She holds a PhD from University of Reims Champagne Ardenne
