Swords and Sustenance Robert Legvold, Celeste A. Wallander, 2004-02-20 The stability of the former Soviet states is threatened by their precarious geopolitical position within a turbulent economic and political environment *Swords and Sustenance* explores the complex economic dimension of national security for two key post Soviet countries Belarus and Ukraine that is how they have dealt with the challenges posed by internal economic and political reform and their relationships with Russia and the West The book first examines how differing commitments to economic and political reform is largely absent in Belarus affect Belarusian and Ukrainian approaches to security It then considers the central role of Russia and how Russian interests and policies toward Belarus and Ukraine limit the two countries foreign and domestic policy choices Two chapters discuss the national security implications for Belarus and Ukraine of two key economic factors in their foreign policy energy trade in the form of oil gas and pipelines and military industrial cooperation including the sale of arms Finally the book considers the relationships of Belarus and Ukraine with regional and global institutions and explores the policies of the EU NATO and the United States toward Belarus and Ukraine

Swords and Sustenance Andrew Wilson, 2004 **Export Pipelines from the CIS Region** Andreas Heinrich, 2014-04-01 This timely collection offers fresh perspectives to the analysis of the New Great Game the fight for access to the Caspian Sea region s energy resources To date the export of the Caspian crude oil and natural gas has only been assessed geopolitically which oversimplifies the political dynamics of the region and neglects to acknowledge the Caspian countries as actors in their own right

Belarus under Lukashenka Matthew Frear, 2018-09-03 This book explores the nature of the regime of Aliaksandr Lukashenka who has ruled Belarus since 1994 and who is often characterized as the last dictator in Europe It discusses how Lukashenka came to power providing a survey of politics in Belarus in early post Soviet times examines how power became personalized under his regime and considers how he coerced opponents whilst maintaining good popular support The book discusses all aspects of politics including presidential power the ruling elites elections the opposition and civil society The author characterizes Lukashenka s rule as adaptive authoritarianism and demonstrates how the regime s avoidance of any ideology even nationalism permits great freedom of manoeuvre enabling pragmatic adaptation to changing circumstances

Democracy Assistance from the Third Wave Paulina Pospieszna, 2014-02-28 The role of Western NGOs in the transition of postcommunist nations to democracy has been well documented In this study Paulina Pospieszna follows a different trajectory examining the role of a former aid recipient Poland newly democratic itself and its efforts to aid democratic transitions in the neighboring states of Belarus and Ukraine Belarus is widely regarded as the most authoritarian state in the region while Ukraine is witnessing a slow if often troubled democratic consolidation Each state presents a different set of challenges to outside agencies As Pospieszna shows Poland is uniquely positioned to offer effective counsel on the transition to democracy With similarities of language and culture and a shared history combined with strong civic activism and success within the

European Union Poland's regional policies have successfully combined its need for security and a motivation to spread democracy as primary concerns Pospieszna details the founding internal workings goals and methods of Poland's aid programs She then compares the relative degrees of success of each in Belarus and Ukraine and documents the work yet to be done As her theoretical basis Pospieszna analyzes current thinking on the methods and effectiveness of NGOs in transitions to democracy particularly U S and European led aid efforts She then views the applicability of these methods to the case of Poland and its aid recipients Overwhelmingly Pospieszna finds the greatest success in developmental programs targeting civil society workers intellectuals teachers students and other NGO actors Through extensive interviews with government administrators and NGO workers in Poland and the United States coupled with archival research Pospieszna assembles an original perspective on the mitigation of the postcommunist divide Her work will serve as a model for students and scholars of states in transition and it provides an overview of both successful and unsuccessful strategies employed by NGOs in democracy assistance

The Russian Military Steven E. Miller, Dmitri Trenin, 2004-08-27 Russian military capacity remains a major consideration for global security even in the post Soviet era This book assesses today's Russian military and analyzes its possible future direction The contributors experts on the subject from both Russia and the West consider not only how Russia has built its military capacity but also the policies and doctrines that have shaped Russia's defense posture They discuss such topics as the downsizing of the Russian military Russia's use of military power in regional conflicts and the management of Russia's nuclear weapons For more than a decade Russian leaders have struggled to formulate security and defense policies that protect Russia's borders and project Russia's influence The contributors to *The Russian Military* find that the choices Russian leaders have made have been significantly influenced by the military reforms Russia has attempted to implement since the collapse of the Soviet Union The protracted and intense debate over military reform has been and will continue to be decisive in shaping Russian military capacity

Are Resources a Curse? Andrea Gawrich, Anja Franke, Jana Windwehr, 2010-12-20 Energy as a Curse The analysis of rentierism in Post soviet states which this book presents underscores the need for further research as rentier state concepts have mainly been applied to older rentier states like African Latin American and Arab countries An important contribution to a topical discussion During the last 30 years many resource rich countries have experienced economic and political stagnation resource curse They have developed deficient political systems in which the process of modern state formation is being undercut rentier state as well as economic structures in which sectors that provide strong incentives for the accumulation of physical and human capital are underrepresented Dutch disease This is very much the same in many of the post Soviet states with high resource incomes since the mid 1990s These incomes present opportunities for reducing poverty and promoting economic growth But instead of taking advantage of these opportunities many of them present authoritarian regimes with high levels of corruption low political freedom and rent seeking elites The book gives a detailed analysis of rentierism in Post soviet states

Great Games, Local

Rules Alexander Cooley,2012-07-23 The struggle between Russia and Great Britain over Central Asia in the nineteenth century was the original great game But in the past quarter century a new great game has emerged pitting America against a newly aggressive Russia and a resource hungry China all struggling for influence over the same region now one of the most volatile areas in the world the long border region stretching from Iran through Pakistan to Kashmir In *Great Games Local Rules* Alexander Cooley one of America s most respected international relations scholars explores the dynamics of the new competition for control of the region since 9 11 All three great powers have crafted strategies to increase their power in the area which includes Afghanistan and the former Soviet republics of Turkmenistan Uzbekistan Kyrgyzstan and Kazakhstan Each nation is pursuing important goals basing rights for the US access to natural resources for the Chinese and increased political influence for the Russians However overlooked in all of the talk about this new great game is fact that the Central Asian governments have proven themselves critical agents in their own right establishing local rules for external power involvement that serve to fend off foreign interest As a result despite a decade of intense interest from the United States Russia and China Central Asia remains a collection of segmented states and the external competition has merely reinforced the sovereign authority of the individual Central Asian governments A careful and surprising analysis of how small states interact with great powers in a vital region *Great Games Local Rules* greatly advances our understanding of how global politics actually works in the contemporary era *The Russian Military Today and Tomorrow* . ,2010 **Ukraine's**

Euromaidan David R. Marples,Frederick V. Mills,2014-04-01 The papers presented in this volume analyze the civil uprising known as Euromaidan that began in central Kyiv in late November 2013 when the Ukrainian president Viktor Yanukovych opted not to sign an Association Agreement with the European Union and continued over the following months The topics include the motivations and expectations of protesters organized crime nationalism gender issues mass media the Russian language and the impact of Euromaidan on Ukrainian politics as well as on the EU Russia and Belarus An epilogue to the book looks at the aftermath including the Russian annexation of Crimea and the creation of breakaway republics in the east leading to full scale conflict The goal of the book is less to offer a definitive account than one that represents a variety of aspects of a mass movement that captivated world attention and led to the downfall of the Yanukovych presidency *The EU and Russia in Their 'Contested Neighbourhood'* Laure Delcour,2016-12-19 The literature on the European Union influence s in its Eastern neighbourhood has tended to focus on EU level policies and prioritize EU related variables This book seeks to overcome this EU centric approach by connecting EU policy transfer to the domestic and regional environment in which it unfolds It looks at the way in which the EU seeks to influence domestic change in the post Soviet countries participating in the European Neighbourhood Policy Eastern Partnership and domestic receptivity to EU policies and templates It seeks to disentangle the various dynamics behind domestic change or lack thereof in Eastern Partnership countries including EU policy mechanisms domestic elites preferences and strategies regional interdependences and Russia s

policies Based upon extensive empirical investigation on EU policies in four countries Armenia Georgia Moldova and Ukraine and in two pivotal policy sectors the book provides systematic and nuanced understanding of complex forces at work in the policy transfer process This text will be of key interest to scholars and students of international relations European studies democratization studies and East European Politics and area studies particularly post Soviet Eurasian studies *Taiwan and China* Lowell Dittmer,2017-09-26 At publication date a free ebook version of this title will be available through Luminos University of California Press s Open Access publishing program Visit www.luminosoa.org to learn more China s relation to Taiwan has been in constant contention since the founding of the People s Republic of China in October 1949 and the creation of the defeated Kuomintang KMT exile regime on the island two months later The island s autonomous sovereignty has continually been challenged initially because of the KMT s insistence that it continue to represent not just Taiwan but all of China and later because Taiwan refused to cede sovereignty to the then dominant power that had arisen on the other side of the Taiwan Strait One thing that makes Taiwan so politically difficult and yet so intellectually fascinating is that it is not merely a security problem but a ganglion of interrelated puzzles The optimistic hope of the Ma Ying jeou administration for a new era of peace and cooperation foundered on a landslide victory by the Democratic Progressive Party which has made clear its intent to distance Taiwan from China s political embrace The Taiwanese are now waiting with bated breath as the relationship tautens Why did it fail and what chance does Taiwan have without it Contributors to this volume focus on three aspects of the evolving quandary nationalistic identity social economy and political strategy *Snakes in Myth, Magic, and History* Diane Morgan,2008-09-30 The snake is one of humankind s most powerful and ambiguous symbols it has at various times represented immortality and death male and female deity and demon circle and line killer and healer the highest wisdom and the deepest subconscious By virtue of its mysterious movement potent poison fearful grip unblinking gaze and lightning quick strike the power and image of the snake has wound its way into every culture Whether snakes are worshipped as gods feared as devils or handled in religious ceremonies to test faith snakes have played a critical role in the human heritage This book explores the cult of the snake in world history religion and folklore Fascination with snakes has been around since the dawn of time Even today images of snakes attract attention fear disgust or admiration Morgan examines that obsession with this mysterious creature covering in vivid details such topics as mythical snakes like the Plumed Serpent serpent iconography tall tales as well as the psychological symbolism that has attached itself to snakes Cultures as diverse as pre Columbian America India Egypt China sub Saharan Africa Celtic Europe and the United States have all accorded the serpent a special place in their culture apparently regardless of whether or not real snakes play an important part in the life of the people Here the mysterious nature of the snake unfolds enchanting readers with a colorful and lively discussion of its place in our history stories religions and cultures **Power, Energy, and the New Russian Imperialism** Anita Orban,2008-09-30 Russia is the world s foremost energy superpower rivaling Saudi Arabia as the world s

largest oil producer and accounting for a quarter of the world's exports of natural gas Russia's energy reserves account for half of the world's probable oil reserves and a third of the world's proven natural gas reserves Whereas military might and nuclear weapons formed the core of Soviet cold war power since 1991 the Russian state has viewed its monopolistic control of Russia's energy resources as the core of its power now and for the future Since 2005 the international news has been filled with Russia's repeated demonstrations of its readiness to use price transit fees and supply of gas and oil exports as punitive policy instruments against recalcitrant states that were formerly part of the Soviet Union striking in turn the Ukraine Georgia Azerbaijan Armenia Belarus and Lithuania Orban reveals for the first time in *Power Energy and the New Russian Imperialism* Russia's readiness to wield the same energy weapon against her neighbors on the west all of them former Soviet satellite states but now EU and NATO member nations the three Baltic nations and the five East European nations of Poland Slovakia Hungary the Czech Republic and Slovenia Orban shows how the Kremlin since 1991 has systematically used Russian energy companies as players in a concerted neo mercantilist energy based foreign policy designed to further Russia's neo imperial ambitions among America's key allies in Central East Europe Her unprecedented analysis is key to predicting Russia's strategic response to American negotiations with Poland and the Czech Republic to host the US missile shield She also reveals the economic and diplomatic modus operandi by which Russia will increasingly apply its energy clout to shape and coerce the foreign policies of the West European members of the EU as Russia's contribution to EU gas consumption increases from a quarter today to three quarters by 2020 Orban proves that Russia's neo mercantilist energy strategy in East Europe is not at all dependent on the person of Putin but began under Yeltsin and continues under Medvedev the former chairman of Gazprom

Strategic Culture in Russia's Neighborhood Katalin Miklóssy, Hanna Smith, 2019-07-24 This book explains the complex relations and entanglements of Russia and its neighboring countries an area that changed dramatically after the collapse of communism and the end of the Cold War The chapters discuss how the strategic cultures of different countries display common characteristics rooted in this special geopolitical space that has been subjected to simultaneous changes over a longer time Shared historical experiences provide a common ground to interpret outside threats The spatial context is relevant in this volume because the focus is on a geopolitical in between ness The position in between two ideologically politically or economically divergent entities affects the states security considerations maneuvering space and policy perspectives By cross examining competing Russian and Western influences Miklosy and Smith create a persuasive context of regional political choices

The Russian Military Today and Tomorrow Stephen Blank, Richard Weitz, 2010 Given the stakes involved in achieving a correct understanding of Russian and Chinese defense policies and military developments the magnitude of Mary Fitzgerald's enlightening accomplishments in this regard becomes clear However the problems that we have outlined in this volume were not unfamiliar to students of the Soviet Union Indeed they are enduring strategic issues for Russian policymakers as well as those who analyze or contribute to foreign policies toward the Russian

military despite the magnitude of the tremendous changes that have occurred since 1989 when the Soviet empire began to collapse Even more importantly Mary and her colleagues recognized that the issues outlined here are not just tasks relevant for the general study of Russia but by addressing these strategic issues and their underlying implications policymakers will engage in the essential tasks necessary for the creation of an enduring structure of peace

Russia and the European Union Cynthia A. Roberts,2007 Russia and the West have avoided renewed confrontation despite many post Cold War crises but illiberal trends in Russia rule out any prospect of developing a mutual agenda for closer integration Russian engagement with the leading Euro Atlantic institutions on a special but still subordinate nonmember basis remains a clever yet suboptimal substitute Such relationships as this monograph about Russia and the European Union explains tend to produce shallow collaboration symbolic summitry and costly standoffs Closer cooperation is blocked by an ongoing dispute over terms which is rooted in asymmetries in power ambivalent preferences uncertainty about the distributional costs and benefits of deeper engagement and Russia s continued unwillingness or inability to lock in the liberal domestic structures necessary to make credible commitments Moscow s renewed self confidence and geopolitical ambitions bolstered by sustained economic growth and high energy prices complicate the bargaining and further strain these special relationships which persist for lack of a realistic superior alternative
