Gail Levin,1978 *Inventing Abstraction, 1910-1925* Leah Dickerman,Matthew Affron,2012 This book explores the development of abstraction from the moment of its declaration around 1912 to its establishment as the foundation of avant garde practice in the mid 1920s The book brings together many of the most influential works in abstractions early history to draw a cross media portrait of this watershed moment in which traditional art was reinvented in a wholesale way Works are presented in groups that serve as case studies each engaging a key topic in abstractions first years an artist a movement an exhibition or thematic concern Key focal points include Vasily Kandinskys ambitious Compositions V VI and VII a selection of Piet Mondrians work that offers a distilled narrative of his trajectory to Neo plasticism and all the extant Suprematist pictures that Kazimir Malevich showed in the landmark 0 10 exhibition in 1915 0Exhibition MoMA New York USA 23 12 2012 15 4 2013 *It's Abstraction, Concretely* John McGreal,2017-02-21 John McGreal s three new books It s Abstraction Concretely It s Figuration Groundly and It s Representation Really continue the It Series published by Matador since 2010 They constitute another stage in an artistic journey exploring the visual and audial dialectic of mark word and image that began over 25 years ago Emerging out of the first books on the Bibliograph published in 2016 initiated with It s Nothing Seriously these new texts retain some of the same structural features The Bibliographs contain the same focus on repetition and variation in meaning of their dominant motifs of representation abstraction and figuration which have framed philosophical discourse on epistemology and ontology in aesthetics their chance placement in each Bibliograph interspersed with one another displaying and enhancing similarities and differences At the same time these works constitute a development in the aesthetic form of the Bibliograph In earlier works on Nothing Absence and Silence it was just a question of finding and transferring given textual references from their source to construct their Bibliographs with the focus being on the strategic position of the latter within each book In these new works the concern has been with working on the line and shape of the references themselves with their enhanced spacial form as well as that of each Bibliograph as a whole In shaping and spacing the referential images the place of words and letters became as important as their semantic to read in a new way on diverse contemporary issues across conventional boundaries in the arts and sciences at several levels of physical psychical and social reproduction American Pastels in the Metropolitan Museum of Art Metropolitan Museum of Art (New York, N.Y.),Doreen Bolger,1989 A catalogue and art historical overview of pastel painting in America from 1880 to 1930

Improvision Simon Shaw-Miller,2022-04-07 Central to the development of

abstract art in the early decades of the 20th century was the conception most famously articulated by Walter Pater that the most appropriate paradigm for non figurative art was music. The assumption has always been that this model was most effectively understood as Western art music, classical music. However, the musical form that was abstract art's true twin is jazz, a music that originated with African Americans but which had a profound impact on European artistic sensibilities. Both art forms share creative techniques of rhythm, groove, gesture and improvisation. This book sets out to theorize affinities and connections between and across two seemingly diverse cultural phenomena.
