Essau,Sara S. LeBlanc,Thomas H. Ollendick,2017-05-19 Emotions are a cardinal component of everyday life affecting one s ability to function in an adaptive manner and influencing both intrapersonal and interpersonal

processes such as self esteem and relationship satisfaction However when emotions are overpowering they can become debilitating and intrusive in daily life In general emotion regulation competencies become differentiated as a function of development Children tend to seek support from adults or use behavioral techniques to regulate their emotions As children reach adolescence they become increasingly self reliant engaging in planful problem solving and utilizing cognitive strategies for example reappraisal more frequently when faced with stressful life events While the majority of children and adolescents will successfully navigate these developmental stages by cultivating adaptive coping skills for some this marks the beginning of lifelong challenges with emotion regulation and resultant dysregulation This book provides a guide to dealing with these problems with contributions from leading experts in the field Divided into 4 sections it starts by providing an introduction to the field of emotion regulation in adolescents touching upon the cultural social biological and developmental issues related to this topic Section two discusses several psychological disorders impacting adolescents such as anxiety depression and conduct problems while also discussing the underlying role emotion regulation plays in the development maintenance and propagation of these disorders In addition this section considers the implication for treatment by discussing the latest evidence based intervention approaches The third section focuses on the role of emotion regulation in specific behaviour populations such as children of abuse and neglect as well as adolescents who engage in nonsuicidal self injury The final section includes an epilogue discussing emergent areas of research answering questions of a theoretical psychological and empirical nature For all those working in the field of mental health whether novice or experienced the book provides a valuable guide to understanding and treating these increasingly common problems

Cardiovascular Health in Children and Adolescents: Present and future Shikai Yu, Shaun Chen ,Zhen-Yu Zhang,2025-01-13 Cardiovascular disease is the most common chronic non infectious disease and ranked as the number one cause of death in the world Although usually manifested at older ages cardiovascular disease may originate from younger ages Massive studies have shown that cardiovascular risk factors tracked from childhood adolescence to adulthood Keeping an ideal cardiovascular health in childhood and adolescence is thus highly important for preventing the development of cardiovascular disease As cardiovascular disease is often perceived as a problem for the older population cardiovascular health in children and adolescents is usually neglected resulting them a long lasting exposure to unhealthy behaviors and factors of cardiovascular risk as well as lower detection and poor management of cardiovascular disease in children and adolescents The incidence and prevalence of cardiovascular disease and its risk factors in young people have been increasing over the past few decades as reported by many studies Recent data based on the National Health and Nutrition Examination Surveys 2005 2010 emphasized the worrying situation of the cardiovascular health in US adolescents More data are needed to reveal the current situation of cardiovascular health and the related organ damage in children and adolescents especially in low and middle income countries Also investigations are warranted to predict future trends and to develop potential intervention strategies
