philosophical psychological and curatorial implications of the sketchbook the book addresses emergent digital practices by way of examining contemporary developments in sketchbook productions and pedagogical applications Consequently these more recent developments question the validity of the sketchbook as both an instrument of practice and creativity and as an educational device International in scope it not only explores European intellectual and artistic traditions but also intercultural and cross cultural perspectives including reviews of practices in Chinese artworks or Islamic calligraphy and situational contexts that deal with historical examples such as Roman art or modern practices in geographical cultural regions like Pakistan
