## **Sydney Australia's First City:**

*Governance and Planning of Mega-City Regions* Jiang Xu, Anthony Yeh, 2010-09-13 Neoliberalism's market revolution has had a tremendous effect on contemporary mega city regions. The negative consequences of market oriented politics for territorial growth have been recognized. While a lot of attention has been given to how planners and policy makers are fighting back political fragmentation through innovative governance and planning, little has been done to reveal such practices through an international comparative perspective. *Governance and Planning of Mega City Regions* provides a comparative treatment and examination of how new approaches in governance and planning are reshaping mega city regions around the world. The contributors highlight how European mega city regions are evolving and how strategic intervention is being redefined to enable the integration of urban qualities in a multi level governance environment. How traditional federal countries in North America and Australia see the promise of major policies and development initiatives finally moving ahead to herald a more strategic intervention at national and regional scales and how transitional economies in China witness the rise of state strategies to control the articulation of scales and to reassert the functional importance of state in a growing diffused power context. This book offers case studies written from a variety of theoretical and political perspectives by world leading scholars. It will appeal to upper level undergraduates, postgraduates, researchers and policymakers interested in urban and regional planning, geography, sociology, public administrations and development studies.

**The Origins of Australia's Capital Cities** Pamela Statham, 1989 *The Origins of Australia's Capital Cities* is a comprehensive survey well illustrated with maps and plans which aims to answer two questions. First, why Australia's eight capital cities are situated where they are and second, how they were established. Pairs of chapters on each of the State capitals: Sydney, Hobart, Perth, Adelaide, Melbourne and Brisbane are accompanied by studies of Canberra as the federal capital and Darwin as a territorial capital. A capital is the administrative centre of a political entity and in Australia, unlike many overseas countries, a uniquely high proportion of the population resides in the capitals. Companion chapters examine the causes of initial European settlement in each area and reasons for the actual establishment of each capital city. Attention is given to such topics as planning and layout, the basis of growth, potential rivals, the social nature of the cities and the nature of their spread. While there have been no other volumes covering all the capitals to seek answers to the same basic questions, this will therefore be an invaluable source book and provide a stimulus to further enquiry in the social history of Australia. An introduction by the editor pulls together the general strands which link the chapters and highlights the ways in which the Australian experience contrasts with the urban experience overseas.

**Aboriginal Protection and Its Intermediaries in Britain's Antipodean Colonies** Samuel Furphy, Amanda Nettelbeck, 2019-06-12 This collection brings together world leading and emerging scholars to explore how the concept of protection was applied to Indigenous peoples of Britain's antipodean colonies. Tracing evolutions in protection from the 1830s until the end of the nineteenth century, the contributors map the changes and

continuities that marked it as an inherently ambivalent mode of colonial practice In doing so they consider the place of different historical actors who were involved in the implementation of protective policy who served as its intermediaries on the ground or who responded as its intended beneficiaries These included metropolitan and colonial administrators Protectors or similar agents government interpreters and church affiliated missionaries settlers with economic investments in the politics of conciliation and the Indigenous peoples who were themselves subjected to colonial policies Drawing out some of the interventions and encounters lived out in the name of protection the book examines some of the critical roles it played in the making of colonial relations      Planning in Indigenous Australia Sue Jackson, Libby Porter, Louise C. Johnson, 2017-07-28 Planning in settler colonial countries is always taking place on the lands of Indigenous peoples While Indigenous rights identity and cultural values are increasingly being discussed within planning its mainstream accounts virtually ignore the colonial roots and legacies of the discipline s assumptions techniques and methods This ground breaking book exposes the imperial origins of the planning canon profession and practice in the settler colonial country of Australia By documenting the role of planning in the history of Australia s relations with Indigenous peoples the book maps the enduring effects of colonisation It provides a new historical account of colonial planning practices and rewrites the urban planning histories of major Australian cities Contemporary land rights native title and cultural heritage frameworks are analysed in light of their critical importance to planning practice today with detailed case illustrations In reframing Australian planning from a postcolonial perspective the book shatters orthodox accounts revising the story that planning has told itself for over 100 years New ways to think and practise planning in Indigenous Australia are advanced Planning in Indigenous Australia makes a major contribution towards the decolonisation of planning It is essential reading for students and teachers in tertiary planning programmes as well as those in geography development studies postcolonial studies anthropology and environmental management It is also vital reading for professional planners in the public private and community sectors

Sydney's Food Landscapes Joshua Zeunert, Alys Daroy, 2025-06-20 The story of Sydney s metropolitan food landscapes is one of dramatic transformations of First Nations land amidst jostles for power and wealth This book unearths Sydney s lost commercial agriculture since colonisation in 1788 to assess its fragile food futures Richly illustrated 270 images are encapsulated within 110 figures including an array of original metropolitan scale mappings Discussion traverses the city s diverse cultural influences from Indigenous land management to British pastoralism Chinese cultivation of Sydney s backyard vegetable garden and southern European farming spawning billion dollar empires The region has further been shaped by a vast array of cultural and ideological factors and material practices with relevance to planning policy ethics geography heritage art design and technology This book is the first to bring Sydney s disparate post colonial food histories together in one volume to explore the dynamics and tensions between urban growth and food production The relevance of Sydney s food landscapes therefore extends far wider than the city itself with implications for countless regions worldwide in a time of
