Symbols Of Democracy Hoover Institute Studies:

Symbols of Democracy Ithiel de Sola Pool, 1952 **Hoover Institute Studies** Hoover Institution on War, Revolution, and Peace, 1955 **Harold D. Lasswell: An Annotated Bibliography** Rodney Muth, Mary M. Finley, Marcia F. Muth, 1990-07-31 *Politics in Wired Nations* Ithiel de Sola Pool, 2018-04-17

Ithiel de Sola Pool was a pioneering social scientist, a distinguished scholar of the political process, and one of the most original thinkers in the development of the social sciences. Passionately engaged in politics, he continued his role of leadership throughout his life, building the MIT Political Science Department into an outstanding group. He organized international teams of social scientists and collaborated widely to develop the understanding of social change. He was a frequent adviser to governments as consultant and in-house critic and a successful advocate of limits on government regulation. *Politics in Wired Nations* presents his writings on the social and political impact of different communication systems and new telecommunications technology. Included in this volume is the first study of trends in a global information society and the first study of social networks and the small world phenomenon that creates new relationships and routes of informal influence and political power both domestic and international. Pool's essays on the politics of foreign trade, the influence of American businessmen on Congress, and changeable, unnatural institutions of the modern world, e.g., bureaucracies, mega-cities, and nation-states, are herein contained. Pool describes a nonviolent revolution in freedom and political control that is possible as the world changes from the era of one-way mass communications targeted to national audiences to a new era of abundant, high-capacity, low-cost, interactive, and user-controlled communications on a global scale. He discusses policy choices for freedom, the battlegrounds ahead, and the risks of government involvement in the regulation of new telecommunication technologies.

Nation Building in Comparative Contexts William Foltz, 2017-07-12

What is and what makes a nation? What forces work for and against the emergence of new nations? What does the emergence of a nation mean to its people, and what does it mean to international stability? *Nation Building in Comparative Contexts* answers these questions. Nine leading area specialists compare and analyze the long history of nationalism in Europe with its shorter histories in the Americas, Asia, and Africa. The result is an outstanding contribution to understanding the problems confronting today's emerging nations, one that remains of importance to the field. The essays in this book provide the tools for comparison and analysis across continents and centuries. The chapters dealing with Europe, where the political and historical evidence is richest, stress the broadest outlines of the nation-making process. The chapter on Asia concentrates on revolutionary war; the two chapters on Africa, where the creation or failure of nation-states is a matter of the political situation of the moment, raise the largest number of concrete problems. Investigators have discovered that the making and breaking of nations is a process that must be studied in its general and uniform aspects, especially if the unique features of each country and epoch are to be understood better. The essays in this book are first steps in the comparison and analysis across the continents and centuries. To some degree, each combines concerns of the historian
