## **Symbols Of Jesus A Christology Of Symbolic Engagement:**

**Symbols of Jesus** Robert C. Neville, 2001 Symbols of Jesus is a systematic theology focusing on what makes Jesus important in Christianity

**Theology in Global Context** Amos Yong, Peter G. Heltzel, 2016-10-06 Robert Cummings Neville has been a consistent advocate for the necessity of global theology Early in his career he realized that the philosophical framework of the West alone was inadequate for a truly global theology Since then he has sought to develop theology creatively and responsibly within the world context The original essays in this volume written in his honour by fellow theologians participate in and model the kind of dialogical global theology embodied in Neville's work

Christology and Science F. LeRon Shults, 2021-11-18 The dialogue between theology and science has blossomed in recent decades but particular beliefs about Jesus Christ have not often been brought to the forefront of this interdisciplinary discussion even in explicitly Christian contexts This book breaks new ground by explicitly bringing the specific themes of Christology into dialogue with contemporary science It engages recent developments in late modern philosophy of science in order to articulate the Christian beliefs about Jesus Christ in a way that responds to challenges and opportunities that have arisen in light of various scientific discoveries The main chapters deal with Incarnation Atonement and Parousia After a brief treatment of the history of the shaping of these ideas the author traces developments in some of the sciences that have challenged these formulations evolutionary biology cultural anthropology and physical cosmology Each chapter also summarises some of the popular constructive responses to these developments After clarifying the way in which the Christian understanding of God and of humanity shape the task of reforming Christology each chapter concludes with a programmatic outline of ways in which we might articulate the identity agency and presence of Jesus Christ in dialogue with late modern science and culture

**The Scandal of Pentecost** Wolfgang Vondey, 2023-10-19 Through a systematic analysis of the conflicts emerging when the public church encounters the public world The Scandal of Pentecost argues that the public advent of the church stands in continuity with the public scandal of the incarnate and crucified Christ The book traces the contours of this scandal in the confrontation of the dominant ruling hermeneutic of authority with a Christian hermeneutic of resistance This highlights the brokenness of the human condition manifested by the church in the drunkenness of the disciples the speaking in other tongues the baptism with the Spirit the empowerment of the flesh and its public witness to a scandalized world The effects of the scandal transform both the disciples individual and communal witness and their public recognition as the church Through the lens of a symbolic hermeneutic the public witness of the church at Pentecost reveals a Christian scandal of anthropological proportions with the outpouring of the Spirit on all flesh the church emerges as the symbol of humanity

*The Making of American Liberal Theology* Gary J. Dorrien, 2006-01-01 In this first of three volumes Dorrien identifies the indigenous roots of American liberal theology and demonstrates a wider longer running tradition than has been thought The tradition took shape in the nineteenth century motivated by a desire to map a modernist third way

between orthodoxy and rationalistic deism atheism It is defined by its openness to modern intellectual inquiry its commitment to the authority of individual reason and experience its conception of Christianity as an ethical way of life and its commitment to make Christianity credible and socially relevant to modern people Dorrien takes a narrative approach and provides a biographical reading of important religious thinkers of the time including William E Channing Ralph Waldo Emerson Horace Bushnell Henry Ward Beecher Elizabeth Cady Stanton and Charles Briggs Dorrien notes that although liberal theology moved into elite academic institutions its conceptual foundations were laid in the pulpit rather than the classroom

**Divine Communion** Jay Emerson Johnson, 2013-10-01 Food sex and God these intertwine at the heart of Christian faith and practice This book invites Christian communities to reflect theologically and spiritually on the desire for God and the desire for sexual intimacy as the same fundamental desire for communion This is likewise God's own desire to be in communion with us which Christians celebrate whenever we share a simple meal of bread and wine at the Eucharistic table The longing for intimacy and its disruptions echo throughout our political contestations economic systems racial and ethnic conflicts and ecological crises In no small measure the vitality of Christian witness to the Gospel in the twenty first century depends on exploring the depths of desire itself in the ancient hope for Divine Communion made new

**Human Identity at the Intersection of Science, Technology and Religion** Dr Christopher C Knight, Professor Nancey Murphy, 2013-06-28 Humans are unique in their ability to reflect on themselves Recently a number of scholars have pointed out that human self conceptions have a history Ideas of human nature in the West have always been shaped by the interplay of philosophy theology science and technology The fast pace of developments in the latter two spheres neuroscience genetics artificial intelligence biomedical engineering call for fresh reflections on what it means now to be human and for theological and ethical judgments on how we might shape our own destiny in the future The leading scholars in this book offer fresh contributions to the lively quest for an account of ourselves that does justice to current developments in theology science technology and philosophy

**God and the World of Signs** Andrew Robinson, 2010-09-24 Christianity has been described as a religion seeking a metaphysic Drawing on the philosophy of C S Peirce Robinson develops a metaphysical framework centred around a semiotic model of the Trinity The model invites a fresh approach to the claim that Jesus was the incarnate Word of God and suggests a new way of understanding how nature may bear the imprint of the Triune Creator in the form of vestiges of the Trinity in creation Scientific spin offs include a new perspective on the problem of the origin of life and a novel hypothesis about the evolution of human distinctiveness The result is an original contribution to Trinitarian theology and a bold new way of integrating philosophy science and religion

**Seasons of the Christian Life** Robert Cummings Neville, 2016-07-04 Once liberal Christianity was preached in ways that defined it in the public eye Now Christianity is identified almost exclusively with its conservative expressions Seasons of the Christian Life presents a series of sermons articulating a liberal Christianity over against its conservative neighbors They were preached at the University Church Marsh

Chapel at Boston University save for one preached in Memorial Church at Harvard during the 2004 2005 academic year when President George W Bush was reelected and the country was at war in Iraq and Afghanistan and at war with terrorists wherever they could be imagined The sermons follow the Revised Common Lectionary and focus on biblical interpretation as it is applied to the then current spiritual cultural social and political situation The author is a professor of theology and at the time was Dean of Marsh Chapel and Chaplain of the University *Human Identity at the Intersection of Science, Technology and Religion* Christopher C. Knight, 2016-05-13 Humans are unique in their ability to reflect on themselves Recently a number of scholars have pointed out that human self conceptions have a history Ideas of human nature in the West have always been shaped by the interplay of philosophy theology science and technology The fast pace of developments in the latter two spheres neuroscience genetics artificial intelligence biomedical engineering call for fresh reflections on what it means now to be human and for theological and ethical judgments on how we might shape our own destiny in the future The leading scholars in this book offer fresh contributions to the lively quest for an account of ourselves that does justice to current developments in theology science technology and philosophy **The Spirit Poured Out on All Flesh** Amos Yong, 2005-07-01 The Pentecostal movement has had an incredible impact on the shape of worldwide Christianity in the past century Estimates are that Pentecostals and charismatics make up approximately one fourth of Christians worldwide and the numbers are only expected to grow With these developments comes the need for thoughtful Christians of all persuasions to better understand Pentecostal theology In fact Amos Yong believes that Pentecostal theology can be a great gift to the church at large Yong presents a thoroughly Pentecostal theology of salvation the church the nature of God and creation He also provides a fascinating survey of the state of worldwide Pentecostalism examining how Pentecostal theology is influencing Christian churches in other countries *A Companion to Comparative Theology*, 2022-08-22 *A Companion to Comparative Theology* offers a unique survey of a rapidly developing field of modern theology in 32 chapters coordinated by five editors Its first part discusses some of the main historical developments in theology and religious studies before 1985 that are relevant for understanding contemporary approaches in comparative theology The main part of the companion traces developments in five specific areas of comparative research starting with classical approaches by Christian comparative theologians and continuing with responses by scholars from Jewish Islamic Hindu Buddhist and Chinese religious comparative perspectives The final part of the companion highlights a number of new avenues in comparative theology discussing new methods new forms of awareness new partnerships with other fields of study and finally some preliminary conclusions Contributors are Nadeen Mustafa A Alsulaimi Mar a Enid Barga Bede Benjamin Bidlack Andr van der Braak Francis X Clooney Catherine Cornille Jonathan Edelmann Marianne Farina James L Fredericks Rouyan Gu Paul Hedges Holly Hilgardner Daniel Joslyn Siemiatkoski Louis Komjathy Christian S Krokus LAI Pan chiu Kristin Johnston Largen John Makransky Jerry L Martin Vahid Mahdavi Mehr Marianne Moyaert Emmanuel Nathan Robert Cummings Neville Hugh
