Psychiatric Presentations of Medical Illness R.C.W. Hall, 2012-12-06 When my colleagues and I began the task of assembling this volume several difficult questions arose For whom were we writing Was the purpose to elucidate psychiatric or medical presentation Should references reflect specific to particular areas or lead the reader to a more general view of a particular topic Would a symptom or system approach best serve the reader Should the volume cover a few areas in detail or attempt to survey a larger area of knowledge The present text reflects an attempt to answer these questions It is designed for the student of medicine who desires a broader understanding of those medical illnesses that produce psychiatric aberration We hope it will be of assistance to the medical student or house officer studying medicine neurology family practice pediatrics or psychiatry as well as to the practicing clinician who wishes a refresher on this subject or a reference for his library The text is intended to strike a useful balance between medicine and psychiatry by providing a list of differentials for specific symptoms or conditions as well as suggestions for medical evaluation References have been chosen which we hope

will assist the reader in further study We have attempted to diversify them and list a spectrum of articles that deal with both academic and practical treatment considerations The initial volume is divided into four sections that address both a symptom and system approach **Current Catalog** National Library of Medicine (U.S.),1983 First multi year cumulation covers six years 1965 70 National Library of Medicine Current Catalog National Library of Medicine (U.S.),
