Syntactic Derivation Of Tagalog Verbs:

Syntactic Derivation of Tagalog Verbs Videia P. de Guzman, 1900 *Syntactic Derivation of Tagalog Verbs*, 1976 Xiv 413 leaves ill **Syntactic Derivation of Tagalog Verbs** Videia Pena de Guzman, 1981 *Phrase Structure and Grammatical Relations in Tagalog* Paul Kroeger, 1993-07-30 Over the last twenty years or so most of the work on the syntax of Philippine languages has been focused on the question of whether or not these languages can be said to have grammatical subjects and if so which argument of a basic transitive clause should be analysed as being the subject Paul Kroeger's contribution to this debate asserts that grammatical relations such as subject and object are syntactic notions and must be identified on the basis of syntactic properties rather than by semantic roles or discourse functions A large number of syntactic processes in Tagalog uniquely select the argument which bears the nominative case On the other hand the data which have been used in the debate to assert the ambiguity of subjecthood are best analysed in terms of semantic rather than syntactic constraints Together these facts support an analysis that takes the nominative argument as the subject Kroeger examines the history of the subjecthood debate and uses data from Tagalog to test the theories that have been put forth His conclusions entail consequences for certain linguistic concepts and theories and lead Kroeger to assert that grammatical relations are not defined in terms of surface phrase structure configurations contrary to the assumptions of many approaches to syntax including the Government Binding theory Paul Kroeger is presently doing fieldwork in Austronesian languages and teaching linguistics to fieldworkers from around the world **Bibliography of Morphology, 1960–1985**, 1988-01-01 Rather than an attempt at an exhaustive bibliography of morphology this is a collection of major and selected minor works of theoretical interest in the broadest sense The area of morphology represented here exhaustively is contemporary generative theoretical morphology interpreted broadly enough to include theoretically interesting structuralist works works aimed at explaining deep motivations of morphology or pertinent to contemporary theoretical morphology Selected descriptive works have been included as well it is not at all simple to draw a line between descriptive works of theoretical interest and fundamentally theoretical works and in addition we hope to provide entry points into a variety of languages for morphologists seeking language specific evidence for general hypotheses **Ay-Inversion in Tagalog** Patrick Nuhn, 2021-10-11 Tagalog an Austronesian language is widely spoken and understood throughout the Philippine archipelago where it served as the basis for the national language Filipino The language is often cited for its many unusual linguistic properties Drawing on both spoken fieldwork data and written data from novels this study investigates several phenomena at Tagalog's interface of information structure and morphosyntax Aside from the default predicate initial word order the Tagalog language has several information structurally marked constructions that allow other constituents to appear in the sentence initial position One of these constructions is ay inversion Although it is often labeled a topic marking construction it is actually far more versatile This book aims to explore some of its many facets The investigation of ay inversion begins with a survey of its various uses

that appear in the data including some that have to date received very little if any attention in the literature such as reversed ang inversion which combines two of the language s inversion constructions Selected observations are then modeled in Role and Reference Grammar and their implications for Tagalog syntax are explored Finally the role of ay inversion in anaphora resolution is investigated and selected processes are modeled in a frame based account Kokota Grammar Bill Palmer,2008-10-31 This work describes the grammar of Kokota a highly endangered Oceanic language of the Solomon Islands spoken by about nine hundred people on the island of Santa Isabel After several long periods among the Kokota Dr Palmer has written an unusually detailed and comprehensive description of the language Kokota has never before been described so this work makes an important contribution to our knowledge of the Oceanic languages of island Melanesia Kokota Grammar examines the phonology of the language and includes a lengthy section on stress assignment It continues with chapters on nouns and noun phrases minor participant types possession argument structure the verb complex clause structure imperative and interrogative constructions and subordination and coordination including verb serialization The typological interest of Kokota along with its degree of endangerment and the paucity of information on Northwest Solomonian languages in general combined with the level of detail given in the volume make this a work of considerable interest to Austronesian linguists typologists syntacticians phonologists and all who are involved in describing and documenting endangered languages *Valence, Semantic Case, and Grammatical Relations* Werner Abraham,1978-01-01 The papers in this volume have been grouped in three thematic parts Valence which plays a key concept in the syntactic classification of verbs and adjectives provides a necessary link for decoding and encoding grammatical relations and is an important requisite for the evaluation of formal languages for the purpose of describing and explaining phenomena of natural language The second group of papers concerns the notion of deep case and the implications of tracing a grammatical theory on semantic case The final series of papers is distinguished by the degree of accent it puts on the link between linguistic surface phenomena including semantic case and grammatical relations in the sense that it has been postulated by Universal Grammar The Oxford Handbook of Ergativity Jessica Coon,Diane Massam,Lisa deMena Travis,2017-06-15 This volume offers theoretical and descriptive perspectives on the issues pertaining to ergativity a grammatical patterning whereby direct objects are in some way treated like intransitive subjects to the exclusion of transitive subjects This pattern differs markedly from nominative accusative marking whereby transitive and intransitive subjects are treated as one grammatical class to the exclusion of direct objects While ergativity is sometimes referred to as a typological characteristic of languages research on the phenomenon has shown that languages do not fall clearly into one category or the other and that ergative characteristics are not consistent across languages Chapters in this volume look at approaches to ergativity within generative typological and functional paradigms as well as approaches to the core morphosyntactic building blocks of an ergative construction related constructions such as the anti passive related properties such as split ergativity and word order and extensions and

permutations of ergativity including nominalizations and voice systems The volume also includes results from experimental investigations of ergativity a relatively new area of research A wide variety of languages are represented both in the theoretical chapters and in the 16 case studies that are more descriptive in nature attesting to both the pervasiveness and diversity of ergative patterns *The Austronesian Languages of Asia and Madagascar* K. Alexander Adelaar, Nikolaus Himmelmann, 2005 An essential source of reference for this linguistic community as well as for linguists working on typology and syntax **Functional Descriptions** Ruqaiya Hasan, Carmel Cloran, David Butt, 1996-01-01 This volume focuses on the relation between theory and description by examining aspects of transitivity in different languages Transitivity or case grammar to use the popular term has always occupied a centre stage position in linguistics not least because of its supposedly privileged relation to states of affairs in the real world Using a systemic functional perspective the ten papers in this volume make a contribution to this scholarship by focusing on the transitivity patterns in language as the expression of the experiential metafunction Through a study of different languages English Dutch German Finnish Chinese and Pitjantjatjara the contributors provide functional descriptions of the various categories of process their participants and circumstances including phenomena such as di transitivity causativity the get passive etc With the relation between theories and descriptions running through the ten chapters of this volume as sometimes an overt and sometimes a covert theme the chapters point to the nature of the linguistic fact which is linked ineluctably on the one hand to the nature of the theory and on the other to the speakers experience of the world in which they live The majority of papers included in the volume derive from the 19th International Systemic Functional Congress at Macquarie University *FILIPINIANA BIBLIOGRAPHY* Jean-Paul G. POTET, 2019-05-25 This book is the list of printed documents I have collected about the Philippines in general and the Tagalog language in particular The entries are followed by an index of the themes involved Cognitive Linguistics and Non-Indo-European Languages Eugene H. Casad, Gary B. Palmer, 2008-08-22 This book applies the theory of cognitive linguistics to the analysis of a variety of grammatical phenomena in non Indo European languages In previous studies of languages from non Indo European families cognitive linguistics has been remarkably useful in explaining non prototypical structures as well as more common ones The book expands that effort into a new set of families and languages **The Oxford Guide to the Malayo-Polynesian Languages of Southeast Asia** Alexander Adelaar, Antoinette Schapper, 2024-10-17 This volume presents the most wide ranging treatment available today of the Malayo Polynesian languages of Southeast Asia and their outliers a group of more than 800 languages belonging to the wider Austronesian family It brings together leading scholars and junior researchers to offer a comprehensive account of the historical relations typological diversity and varied sociolinguistic issues that characterize this group of languages including current debates in their prehistories and descriptive priorities for future study The book is divided into four parts Part I deals with historical linguistics including discussion of human genetics archaeology and cultural history Chapters in Part II explore language

contact between Malayo Polynesian and unrelated languages as well as sociolinguistic issues such as multilingualism language policy and language endangerment Part III provides detailed overviews of the different groupings of Malayo Polynesian languages while Part IV offers in depth studies of important typological features across the whole linguistic area The Oxford Guide to the Malayo Polynesian Languages of Southeast Asia will be an essential reference for students and researchers specializing in Austronesian languages and for typologists and comparative linguists more broadly

Describing Morphosyntax Thomas E. Payne, 1997-10-09 Of the 6000 languages now spoken throughout the world around 3000 may become extinct during the next century This guide gives linguists the tools to describe them syntactically and grammatically for future reference

Finding Our Feet Mary Isabelle Bresnahan, 1991 For Westerners and Americans in particular Philippine culture is deceptively familiar Vestiges of Spanish and American colonial culture as well as contemporary American media have created resonances for identifying American culture in Philippine culture This book guides the reader in re examining these assumptions of sameness By taking an unfamiliar text of a noted writer of Tagalog fiction this study restores the sense of wonder in experiencing Tagalog culture on its own terms rather than by tastes dictated from the outside The book also examines the broader Tagalog traditions in which the writer Amado Hernandez wrote

International Encyclopedia of Linguistics William J. Frawley, 2003-05-01 The International Encyclopedia of Linguistics 2nd Edition encompasses the full range of the contemporary field of linguistics including historical comparative formal mathematical functional and philosophical linguistics with special attention given to interrelations within branches of linguistics and to relations of linguistics with other disciplines Areas of intersection with the social and behavioral sciences ethno linguistics sociolinguistics psycholinguistics and behavioral linguistics receive major coverage along with interdisciplinary work in language and literature mathematical linguistics computational linguistics and applied linguistics Longer entries in the International Encyclopedia of Linguistics ranging up to four thousand words survey the major fields of study for example anthropological linguistics history of linguistics semantics and phonetics Shorter entries treat specific topics within these fields such as code switching sound symbolism and syntactic features Other short entries define and discuss technical terms used within the various subfields or provide sketches of the careers of important scholars in the history of linguistics such as Leonard Bloomfield Roman Jakobson and Edward Sapir A major portion of the work is its extensive coverage of languages and language families From those as familiar as English Japanese and the Romance languages to Hittite Yoruba and Nahuatl all corners of the world receive treatment Languages that are the subject of independent entries are analyzed in terms of their phonology grammatical features syntax and writing systems Lists attached to each article on a language group or family enumerate all languages extinct or still spoken within that group and provide detailed information on the number of known speakers geographical range and degree of intelligibility with other languages in the group In this way virtually every known language receives coverage For ease of reference and to aid research the

articles are alphabetically arranged each signed by the contributor supported by up to date bibliographies line drawings maps tables and diagrams and readily accessible via a system of cross references and a detailed index and synoptic outline Authoritative comprehensive and innovative the 2nd edition of the International Encyclopedia of Linguistics will be an indispensable addition to personal public academic and research libraries and will introduce a new generation of readers to the complexities and concerns of this field of study Symmetrical Voice and Linking in Western Austronesian Languages Sonja Riesberg, 2014-08-19 This book is an in depth study of the voice systems of Totoli Balinese Indonesian and Tagalog which shows that the symmetrical nature of these systems poses a problem to current linking theories It provides an analysis of symmetrical linking within two grammatical theories LFG RRG and develops a modified LFG linking mechanism that sheds light on the differences as well as the similarities of symmetrical and asymmetrical voice systems **Linguistic Change and Reconstruction Methodology** Philip Baldi, 2011-06-01 No detailed description available for Linguistic Change and Reconstruction Methodology Applicative Morphology Sara Pacchiarotti, Fernando Zuniga, 2022-10-03 This book is about recurrent functions of applicative morphology not included in typologically oriented definitions Based on substantial cross linguistic evidence it challenges received wisdom on applicatives in several ways First in many of the surveyed languages applicatives are the sole means to introduce a non Actor semantic role into a clause When there is an alternative way of expression the applicative counterpart often has no valence increasing effect on the targeted root Second applicative morphology can introduce constituents which are not syntactic objects and or co occur with obliques Third functions such as conveying aspectual nuances to the predicate intensity repetition habituality or its arguments partitive P highly individuated P narrow focusing constituents and functioning as category changing devices are attested in geographically distant and genetically unrelated languages Further this volume reveals that spatial related morphology is prone to developing applicative functions in disparate languages and phyla Finally several contributions discuss the diachrony of applicative constructions and their non syntactic attested functions including a case of applicatives in the making
