broader field of Semitic languages This situation is changing quickly not only through the continuation of older research traditions but also with the integration of new research fields and perspectives With this expansion comes the danger of specialists in Arabic losing an overview of the field and of leaving non specialists without basic resources for evaluating domains of research which they may be interested in for comparative purposes The Oxford Handbook of Arabic Linguistics will confront this problem by combining state of the art overviews with essays on issues of perspective controversy and point of view In twenty four chapters leading experts from around the world will lay out their own stances on controversial issues The book not only evaluates ways in which questions and theories established in general linguistics and its sub fields elucidate Arabic but also challenges approaches which might result in accommodating Arabic to non Arabic interpretations and brings out the Arabic specificity of individual problems The Handbook in one compact volume gives critical expression to a language which covers large populations and geographical areas has a long written tradition and has been the locus of major intellectual fervor and debate   **In the Shadow of Arabic: The Centrality of Language to Arabic Culture** Bilal Orfali,2011-11-11 The collection of articles in this volume is dedicated to Ramzi Baalbaki of the American University of Beirut on the occasion of his 60th birthday It provides an interesting glimpse into the early medieval and modern traditions related to the Arabic language its grammar historical development and demonstrate its centrality to other fields of study such as qur nic studies adab folk literature sufism and poetry
