Institutions and the Environment Arild Vatn, 2007-01-01 Vatn has prepared a vast feast for his readers Hopefully this book will become one of the core textbooks both in institutional

economics and in resource economics As a political scientist I can recommend it to social scientists more generally I must confess I enjoyed it all Elinor Ostrom 2009 Nobel Laureate Land Economics Institutions and the Environment indeed serves as a first rate starting point for students and researchers regardless of whether they are mainly interested in institutions in general or environmental governance and ecological economics in particular Charlotta S derberg Environmental Politics This timely book is about institutions how they develop how they function and how they solve problems This book exemplifies the fine institutionalist tradition of using knowledge to solve pressing problems in fact institutionalists will find little here to criticize The scope of this book is wide policy makers government officials institutionalists environmentalists and the general public will all benefit from reading this book Keep this book handy you ll want to make frequent references as the global warming policy debate unfolds Jack Reardon Journal of Economic Issues Vatn s book addresses the urgent question of environmental policy and shows that an understanding of the role of institutions is vital in this area It incorporates insights on institutions from both mainstream and heterodox traditions of thought Magisterial and comprehensive it is both a textbook and an inspiring pioneering monograph Geoffrey M Hodgson University of Hertfordshire UK This is an excellent book which can be read at different levels I very much enjoyed reading this book and would recommend it to anyone interested in these issues I feel it is likely to become one of the core text books on the topic Neil Powe Newcastle University UK We have here an encompassing work of remarkable clarity and coherence demonstrating the enduring pertinence of classical institutional economics to the vexing issues of our time While most of the illustrative examples come from the realm of environmental problems the reach of this fine book goes far beyond this particular issue and informs how we ought to think about all aspects of public policy Daniel W Bromley University of Wisconsin Madison US This is a superb book on institutional economics and environmental policy Vatn has written the definitive exposition of the theory and policy approaches of modern institutional economics It not only builds on the work of the best institutional economists from Veblen to Bromley and Hodgson it also incorporates the extremely relevant and exciting research now being done in contemporary mainstream economics With the demise of Walrasian economics and the current drive for the unification of the behavioral sciences the time is ripe for institutional economics to once again become a dominant school of economic thought Vatn s book shows the way John Gowdy Rensselaer Polytechnic Institute US This important text develops an institutional response to the core issues raised in public policy making and develops a distinct understanding of the role of institutions not least in the study of environmental problems It questions how are conflicting interests shaped and taken into account in policy making How should they be accounted for What motivates the behaviour of firms and individuals and how is it possible to change these motivations to produce the favoured common outcomes The author addresses these questions by integrating elements from classical institutional economics neoclassical economics sociology and ecological economics He argues that public policy in general and environmental policy in particular are best examined from an institutional perspective In this

way the author presents a distinct and consistent alternative to standard neoclassical economics for students and scholars who

Social Movements in Iran Simin Fadaee, 2012-04-27. Despite the growing significance of social movements worldwide, scholarship on the subject remains largely Western in nature, with studies written primarily by Western scholars and based on the experiences of Western cultures and societies. This book makes an important contribution to the study of social movements in non-Western societies by examining their development in Iran. With a particular focus on the recent environmental movement, the author sheds new light on the implications and significance of these movements. Drawing on in-depth original research, the case study of the environmental movement is integrated into a historical and comparative analysis. Implementing the new social movement theory of Touraine and Melucci

in the Iranian context the author shows that although the reform movement of Iran is unique in some aspects it is a continuation of the past social movements She places emphasis on the role of women in recent Iranian social movements exploring the significance of social movements in civil society and in instigating social change Using the case of Iran to offer a critical framework for studying social change and transformation of non European countries this book fills an important gap in the existing literature on the topic As such it will be of great interest to scholars and students of sociology political science and Middle Eastern studies
