Taking Care Of Strangers The Rule Of Law In Doctor Patient Relations:

Taking Care of Strangers Robert A. Burt, 1979 *Taking Care* President's Council on Bioethics (U.S.), 2005 *Clinical Ethics* Robert M. Timko, 2001 In *Clinical Ethics* Robert Timko argues that the moral dilemmas of clinical medical practice can best be resolved within a framework of prima facie duties and that the most stringent duty is that of nonmaleficence Timko shows that respect for individual autonomy and the principle of beneficence are inadequate for the moral practice of medicine since simple adherence to either principle may be insufficient for the provision of due care *The Psychiatrist in the Courtroom* Jacques M. Quen, 2013-05-13 Over the course of an illustrious career the late Bernard Diamond established himself as the preeminent forensic psychiatrist of the century *The Psychiatrist in the Courtroom* brings together in a single volume Diamond's pivotal contributions to a variety of important issues including the nature of diminished capacity the fallacy of the impartial expert the predictability of dangerousness and the unacceptability of hypnotically facilitated memory in courtroom proceedings Ably introduced and edited by Jacques M Quen M D a close colleague of Diamond's and leading historian of forensic psychiatry these writings enable experts and neophytes alike to track Diamond's evolving positions while clarifying where current legal and psychiatric opinion converge and diverge on a host of critical topics For the forensic specialist *The Psychiatrist in the Courtroom* is not only an invaluable reference work but a compassionate reminder of the clinician's obligation to protect patients in legal proceedings And in an age when clinicians are increasingly called into court the book will be no less valuable to psychoanalysts and other mental health professionals eager for an introduction to the intricacies of judicial reasoning Then too owing to Diamond's clinical acumen the book is a compelling human document With great erudition and deep compassion Diamond tackles these and other knotty questions always with an eye to clarifying the legal and clinical implications of the answers By combining superb clinical gifts with an incisive understanding of legal principle Diamond produced a seminal corpus whose relevance to discussions of therapeutic ethics and to legal debates will continue well into the next century **Stories of Sickness** Howard Brody, 2002-10-31 To understand the human meaning of illness we must turn to the stories we tell about illness suffering and medical care This book explores the many dimensions of what illness means to the sufferers and to those around them drawing on depictions of illness in great works of literature as well as on non-fiction accounts For this revised edition *Stories of Sickness* has been extensively updated and expanded especially with new material on narrative studies and on narrative ethics **A Right to Die?: Teachers Guide** David Andersen, Robert Cavalier, Preston Covey, 2003-09-02 A 96 page guide to the background program uses for and contact time needed with the CD ROM *A Right to Die* The Dax Cowart Case This guide is supplied free with every multi user copy of the CD ROM and will prove invaluable for all those planning to use the program in a classroom setting This guide is not available to purchase separately Remainder of Their Days Carolyn J. Friedman, 2004-05-06 Medicine and the media exist in a unique symbiosis Increasingly health care consumers turn to media sources from news reports to Web sites to tv shows for information about diseases treatments pharmacology and important health issues And just as the media scour the medical terrain for news stories and plot lines those in the health care industry use the media to publicize legitimate stories and advance particular agendas The essays in Cultural Sutures delineate this deeply collaborative process by scrutinizing a broad range of interconnections between medicine and the media in print journalism advertisements fiction films television shows documentaries and computer technology In this volume scholars of cinema studies philosophy English sociology health care education women's studies bioethics and other fields demonstrate how the world of medicine engages and permeates the media that surround us Whether examining the press coverage of the Jack Kevorkian euthanasia controversy pondering questions about accessibility accountability and professionalism raised by such films as Awakenings The Doctor and Lorenzo's Oil analyzing the depiction of doctors patients and medicine on E R and Chicago Hope or considering the ways in which digital technologies have redefined the medical body these essays are consistently illuminating and provocative Contributors Arthur Caplan Tod Chambers Stephanie Clark Brown Marc R Cohen Kelly A Cole Lucy Fischer Lester D Friedman Joy V

Kay Toombs, David Barnard, Ronald Alan Carson, 1995-07-22 excellent Choices Choice on Dying Newsletter Toombs Barnard and Carson have organized and edited a valuable series of papers that provide a rare perspective on the impact of chronic illness Beginning with the person who is experiencing the chronic condition they are able to weave an important blend of personal social and policy themes Choice This volume of collected essays is a solid contribution to the medical humanities literature on chronic illness the contributors have produced a cohesive systematic and sensitive examination of issues in chronic illness and disability Medical Humanities Review Although it may seem to be intended largely for health care providers this thought provoking volume has much that will interest a wider lay audience Medical and Health Annual An often moving exploration of the human moral and policy aspects of a health issue that affects each of us Through first person accounts and the perspectives of literature medicine philosophy and religion this book explores what it means to live with chronic illness and the implications of this experience for social policy health care bioethics and the professions *Psychosocial Scenarios for Pediatrics* Paul V. Trad, 2012-12-06 My interest in writing this book was sparked several years ago when I served as a psychiatric liaison on a pediatric unit of a major urban hospital I was asked to assess a 7 year old Hispanic boy who had been admitted to the hospital several days earlier with complaints of chronic abdominal pain Comprehensive physical evaluations of the child had revealed no organic abnormality or disease process and the pediatricians assigned to the case had begun to suspect that the little boy's symptomatology stemmed from an emotional problem After meeting with the child for several sessions I learned that his abdominal pains had persisted for approximately 3 years preventing him from attending school on a regular basis or from engaging in other activities A detailed clinical history revealed that roughly 4 years earlier the child's mother had remarried and this stepfather had moved into the home The child's comments with respect to this man were highly ambivalent Nor was the nature of these conflicting feelings apparent to me at the time Several days later however when the child had been told the date of his discharge from the hospital I was informed that his anxiety had increased dramatically **From Newton's Sleep** Joseph Vining, 2023-11-14 What the presence of law tells us about our beliefs our language and the world around us In a strikingly original work intended not only for practicing lawyers but for anyone interested in the modern dilemma of the loss of meaning Joseph Vining invites us to reconsider law as a unique form of thought inseparably connected to everything in the world that makes up human identity Oliver Wendell Holmes asserted at the end of the nineteenth century that human law is ultimately a phenomenon in quantitative relations to its causes and effects and many have been left with an impression of law as a set of processes and rules Vining takes issue with this and with various reductionist attempts in scientific thought today to express the universe in a single mathematical description of forces as well as with post structuralist speculation that

there are no valid truth claims and that human interaction can be reduced to analysis of power relationships Law he argues is an independent discourse not reducible to any other that exists only in human interaction and reflects continuing human worth Vining's search to reinstate the spiritual dimension in public discourse brings him head on with a wide array of powerful academic forces linguistics theory political science the new historicism and the traditional teaching of law This book consists of a collection of what Vining calls amplifications of the implied text of the law impressions commentaries vignettes poems and dialogues which illustrate aspects of conventional legal language and logic and the subjects legal practice regularly deals with such as promises death and crime Throughout we see that law reaches deeply into the way we know ourselves and other persons all of whom speak through law as law connects language to person and person to action The texts generated by legal method constitute the living record of social acquaintance and contest speaking across cultures and across centuries It is the close reading of legal texts and contexts Vining argues that provides the present source of the transcendental in modern secular life But unlike the other academic arts of interpretation law alone is directly connected with the most real the most particular and at the same time the most universal facts of social life From Newton's Sleep casts doubt on the certainties past and present and creates new grounds for skepticism and conviction The fragmentary form of the book mirrors its subject It is intended to be picked up and read as occasion allows by lawyers and anyone interested in law

The Fiction of Bioethics Tod Chambers, 2015-12-22 Tod Chambers suggests that literary theory is a crucial component in the complete understanding of bioethics *The Fiction of Bioethics* explores the medical case study and distills the idea that bioethicists study real life cases while philosophers contemplate fictional accounts
