Children In Families Julia Brannen, Margaret O'Brien, 2002-11-01 Much academic work on families and households has focused in the past on the adult members However a surge of interest in children s issues has occurred recently in the social sciences A key theoretical assumption in this area of research is that children s relationships and cultures are worthy of study in their own right and that children play an active part in the construction of these cultures and relationships This work provides perspectives on children in their family contexts It shows that children s needs and wishes have often been neglected in the social sciences especially in the areas of law social policy and sociology The authors present empirical research on children and young people in contemporary family settings and offer theoretical insights which challenge existing thinking on modern childhood They draw on international comparisons between the condition of childhood and children s welfare putting forward an argument for future research and policy initiatives needing to concentrate on and even privilege children

Pregnancy and Parenthood Christine McGuire, Judith Corlyon, 1999-01-01 Presents the experiences of pregnant young women in public care and examines how they were prepared and supported once became a parent *Inter-professional Approaches to Young Fathers* Jane Reeves, 2008 With one of the highest teenage pregnancy rates in Europe young fatherhood as a site of economic and personal adversity has become a focus of concern in Britain during the late 1990s However despite this policy interest there is surprisingly little British empirical evidence to review One of the aims of the book is to draw together contemporary research evidence social theory and policy which may effect how practitioners students and academics conceptualise and work with young fathers Consequently each chapter illustrates the points it makes using discrete evidence from that particular field Moreover in order to make this process more user friendly each chapter provides a summary of this literature and evidence Finally in order to make the book come alive it draws on case studies which are drawn variously from two studies conducted by the editor *Family Relationships* Catherine A. Salmon, Todd K. Shackelford, 2008 Kinship ties the close relationships found within the family have been a central focus of evolutionary biological analyses of social behavior ever since biologist William Hamilton extended the concept of Darwinian fitness to include an individual's actions benefiting not only his own offspring but also collateral kin Evolutionary biologists consider organisms not only reproductive strategists but also nepotistic strategists If a person's genes are just as likely to be reproduced in her sister as in her daughter then we should expect the evolution of sororal investment in the same way as one expects maternal investment This concept has revolutionized biologists understanding of social interaction and developmental psychologists understanding of the family However kinship ties have largely been ignored in other areas of psychology particularly social psychology Family Relationships brings together leading theorists and researchers from evolutionary psychology and related disciplines to illustrate the ways in which an evolutionary perspective can inform our study and understanding of family relationships The contributors argue that family psychology is relationship specific the relationship between mother and daughter is different from that between father and daughter or that between brother and sister or sister and sister In other words humans have evolved specialized mechanisms for processing information and motivating behavior that deal with the distinct demands of being a mate father mother sibling child or grandparent Such an evolutionary perspective on family dynamics provides a unique insight into human behavior This volume will be an

indispensable resource for psychologists sociologists and anthropologists as well scholars of family marriage and animal behavior

Inhabited by Stories Nancy A. Barta-Smith, Danette DiMarco, 2012-11-30 Intertextuality has signaled change appropriation adaptation and derivation It has focused readers on irresolvable questions of influence and origination progressive or regressive movement across continents periods and media Inhabited by Stories Critical Essays on Tales Retold takes a different approach What would a model of literary study look like that steps out of time s river and embraces not only the presence and proximity of the world to the senses but also of the past and the future to the present here and now When stories inhabit us imagination and memory extend our ability to see and feel Phenomenological experience is lived not just thought Such a perspective suggests that the past and future inhabit the present increase the depth of sensory perception itself and enrich the range of our affective and ethical responses Grounded in the lived experience of reading this perspective offers an alternative to an idea of intertextuality as simply following lines of influence and appropriation It focuses on the expansion of experience created by telling and retelling stories Ironically for literary theorists and critics perhaps the highest form of both praise and critique is a tale retold since such retellings attest to literature s instructive power and its perennial regeneration
