A guide for collectors and modelers packed with photos technical information practical advice and history The origins of 1 1250 and 1 1200 scale models can be traced back to the first years of the twentieth century and their use as identification aids by the military during the First World War When peace came the manufacturers aimed their increasingly sophisticated products at collectors and ever since then acquiring enhancing modifying or scratch building miniature ship models has been an avidly pursued hobby around the world This new book focuses on models of the ships of the Second World War and the author addresses all the practical issues that might confront collectors who like to enhance convert and modify their models or even scratch build models of ships not commercially available The book covers both Allied and Axis warships naval airplanes merchant conversions and even an Italian armed schooner and provides historic and technical information on the ships represented as well as practical advice on modeling them including twenty five chapters covering everything from initial production techniques such as spin casting silicon mold casting resin casting die casting plastic mold injection and 3D printing through techniques for enhancing and modifying models to eventually researching and scratch building an uncommon ship or type The focus is always on particular vessels and the vast array covered builds into a fascinating panorama of the vessels that fought across the world s oceans in that era The combination of intriguing background and historical information combined with detailed practical information and more than 300 stunning photographs makes this book irresistible to collectors modelers or anyone with an interest in the navies of the Second World War The Merchant Seamen's War Tony Lane,1990 Who Sank the Sydney? Michael

Montgomery,1983-01-01 In February 1941 HMAS Sydney a glamour ship of the Royal Australian Navy in World War II returned from the Mediterranean to a tumultuous welcome in Australia The Sydney had crowned her service in that theatre of operations with the Royal Navy by sinking the Italian ship Bartolomeo Colleoni described as the fastest cruiser in the world Nine months later the Sydney had disappeared off the coast of Western Australia following an action against the German raider Kormoran Three hundred and eight men from the Kormoran were eventually requested but the Sydney s entire complement of six hundred and forty five men was lost making her the largest ship in the whole course of the War to go down with all hands Survivors from the Kormoran at first talked of rowing towards her in the hope of being picked up and then seeing her blow up but when they were reunited with their officers their story began to change In Who Sank The Sydney Michael Montgomery has pieced together hundreds if items of evidence gathered in four years research to provide solutions

to the hitherto unanswered questions surrounding what the American historian Hanson Baldwin has described as the most curious incident of the seas Why were there no survivors from the Sydney and how did all trace of the cruiser disappear so quickly How was the raider able to destroy the much larger and much more heavily armed cruiser Was a Japanese submarine involved Why did the Navy disown a body found three months later in a Carley float from the Sydney Since this book was first published in Australia in 1981 much more evidence has come to light to support Michael Montgomery s theories of a major cover up in high places In particular he demonstrates that the Navy suspected the Japanese involvement almost immediately and that on November 26ty Churchill sent Roosevelt a telegram which coursed him to break off negotiations with Japan Pearl Harbour followed a fortnight later was the Sydney thus the Lusitania of World War II
