Constructing Stories, Telling Tales Sarah Corrie,David A. Lane,2018-04-17 Formulation remains one of the most important activities that those using psychological approaches undertake as part of their work Arguably however formulation is an activity that remains poorly understood In a current climate demanding quick fix solutions there is a tendency which the authors refuse towards over simplification Instead this book sets out to explore the challenging complexity of psychological formulation By drawing on a wide range of sources from psychology and the arts the authors find ways to honour the stories clients tell yet offer key psychological insights to facilitate change They provide a clear guide to enable the reader to think about the purpose of their work with clients the perspectives which inform it and the process used to ensure effective outcomes The chapters supported by exercises on key issues examine key debates on the role of formulation in professional practice a framework for developing a systematic approach to formulation and a detailed account of the purpose perspective and process of formulation **Transformative Change and Real Utopias in Early Childhood Education** Peter

Moss,2014-04-24 Early childhood education and care is a major policy issue for national governments and international organisations This book contests two stories both infused by neoliberal thinking that dominate early childhood policy making today the story of quality and high returns and the story of markets stories that promise high returns on investment if only the right technologies are applied to children and the perfection of a system based on competition and individual choice But there are alternative stories and this book tells one a story of democracy experimentation and potentiality in which early childhood centres are public spaces and public resources places where democracy and experimentation are fundamental values community workshops for realising the potentiality of citizens This story calls for transformative change but offers a real utopia both viable and achievable The book discusses some of the conditions needed for the story s enactment and shows what it means in practice in a chapter about project work contributed by a Swedish preschool teacher Critical but hopeful this book is an important contribution to resisting the dictatorship of no alternative and renewing a democratic politics of early childhood education It is essential reading for students and teachers researchers and other academics and for all other concerned citizens **Playwriting** Noël Greig,2005 Playwriting offers a practical guide to the creation of text for live performance It contains a wealth of exercises for amateur and professional playwrights Usable in a range of contexts the book works as a step by step guide to the creation of an individual play a handy resource for a teacher or workshop leader a stimulus for the group devised play The result of Noël Greig s thirty years experience as a playwright actor director and teacher Playwriting is the ideal handbook for anyone who engages with playwriting and is ultimately concerned with creating a story and bringing it to life on the stage
