**Science Fact and Science Fiction** Brian Stableford, 2006-09-06 Science fiction is a literary genre based on scientific speculation Works of science fiction use the ideas and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human beings Science Fact and Science Fiction examines in one volume how science has propelled science fiction and to a lesser extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As

scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice and disciplines Although the main focus is on literature other forms of science fiction including film and video games are explored and because science is an international matter works from non English speaking countries are discussed as needed

in the United States is the most expensive in the world with real per capita spending growth averaging 4 percent since 1980 This paper examines the role of market power of U S healthcare providers and pharmaceutical companies It finds that markups the ability to charge prices above marginal costs for publicly listed firms in the U S healthcare sector have almost doubled since the early 1980s and that they explain up to a quarter of average annual real per capita healthcare spending growth The paper also finds evidence that the Affordable Care Act and Medicaid expansion were successful in raising coverage and expanding care but may have had the undesirable side effect of leading to labor cost increases Hourly wages for healthcare practitioners are estimated to have increased by 2 to 3 percent more in Medicaid expansion states over a five year period which could be an indication that the supply of medical services is relatively inelastic even over a long time horizon to the boost to demand created by the Medicaid expansion These findings suggest that promoting more competition in healthcare markets and reducing barriers to entry can help contain healthcare costs **The Story of the Great War,**

*Volume 8 (END)* Churchill, Miller, and Reynolds,2016-02-19 World War I WWI or WW1 also known as the First World War or the Great War was a global war centred in Europe that began on 28 July 1914 and lasted until 11 November 1918 More than 70 million military personnel including 60 million Europeans were mobilised in one of the largest wars in history Over 9

million combatants and 7 million civilians died as a result of the war including the victims of a number of genocides a casualty rate exacerbated by the belligerents technological and industrial sophistication and the tactical stalemate caused by trench warfare a grueling form of warfare in which the defender held the advantage It was one of the deadliest conflicts in history and paved the way for major political changes including revolutions in many of the nations involved The war drew in all the world's economic great powers assembled in two opposing alliances the Allies based on the Triple Entente of the United Kingdom British Empire France and the Russian Empire versus the Central Powers of Germany and Austria Hungary Although Italy was a member of the Triple Alliance alongside Germany and Austria Hungary it did not join the Central Powers as Austria Hungary had taken the offensive against the terms of the alliance These alliances were reorganised and expanded as more nations entered the war Italy Japan and the United States joined the Allies while the Ottoman Empire and Bulgaria joined the Central Powers The trigger for the war was the assassination of Archduke Franz Ferdinand of Austria heir to the throne of Austria Hungary by Yugoslav nationalist Gavrilo Princip in Sarajevo on 28 June 1914 This set off a diplomatic crisis when Austria Hungary delivered an ultimatum to the Kingdom of Serbia and entangled international alliances formed over the previous decades were invoked Within weeks the major powers were at war and the conflict soon spread around the world On 28 July the Austro Hungarians declared war on Serbia and subsequently invaded As Russia mobilised in support of Serbia Germany invaded neutral Belgium and Luxembourg before moving towards France leading the United Kingdom to declare war on Germany After the German march on Paris was halted what became known as the Western Front settled into a battle of attrition with a trench line that would change little until 1917 Meanwhile on the Eastern Front the Russian army was successful against the Austro Hungarians but was stopped in its invasion of East Prussia by the Germans In November 1914 the Ottoman Empire joined the Central Powers opening fronts in the Caucasus Mesopotamia and the Sinai Italy joined the Allies in 1915 and Bulgaria joined the Central Powers in the same year while Romania joined the Allies in 1916 followed by United States in 1917 The Russian government collapsed in March 1917 and a subsequent revolution in November brought the Russians to terms with the Central Powers via the Treaty of Brest Litovsk which constituted a massive German victory After a stunning German offensive along the Western Front in the spring of 1918 the Allies rallied and drove back the Germans in a series of successful offensives On 4 November 1918 the Austro Hungarian empire agreed to an armistice and Germany which had its own trouble with revolutionaries agreed to an armistice on 11 November 1918 ending the war in victory for the Allies By the end of the war the German Empire Russian Empire Austro Hungarian Empire and the Ottoman Empire had ceased to exist National borders were redrawn with several independent nations restored or created and Germany's colonies were parceled out among the winners During the Paris Peace Conference of 1919 the Big Four Britain France the United States and Italy imposed their terms in a series of treaties The League of Nations was formed with the aim of preventing any repetition of such a conflict This however failed with economic

depression renewed European nationalism weakened member states and the German feeling of humiliation contributing to the rise of Nazism These conditions eventually contributed to World War II
