Mosse,1998-10-08 What does it mean to be a man What does it mean to be manly How has our notion of masculinity changed over the years In this book noted historian George L Mosse provides the first historical account of the masculine stereotype in modern Western culture

tracing the evolution of the idea of manliness to reveal how it came to embody physical beauty courage moral restraint and a strong will This stereotype he finds originated in the tumultuous changes of the eighteenth century as Europe s dominant aristocrats grudgingly yielded to the rise of the professional bureaucratic and commercial middle classes Mosse reveals how the new bourgeoisie faced with a bewildering rapidly industrialized world latched onto the knightly ideal of chivalry He also shows how the rise of universal conscription created a soldierly man as an ideal type In bringing his examination up to the present Mosse studies the key historical roles of the so called fairer sex women and unmanly men Jews and homosexuals in defining and maintaining the male stereotype and considers the possible erosion of that stereotype in our own time

Nineteenth-Century Narratives of Contagion Allan Conrad Christensen,2007-04-11 This intriguing book examines the ways contagion or disease inform and shape a wide variety of nineteenth century texts and contexts Christensen dissects the cultural assumptions concerning disease health impurity and so on before exploring different perspectives on key themes such as plague nursing and the hospital environment and focusing on certain key texts including Dicken s Bleak House Gaskell s Ruth and Zola s Le Docteur Pascal

Healing Spaces, Modern Architecture, and the Body Sarah Schrank,Didem Ekici,2016-07-15 Healing Spaces Modern Architecture and the Body brings together cutting edge scholarship examining the myriad ways that architects urban planners medical practitioners and everyday people have applied modern ideas about health and the body to the spaces in which they live work and heal The book s contributors explore North American and European understandings of the relationship between physical movement bodily health technological innovation medical concepts natural environments and architectural settings from the nineteenth century through the heyday of modernist architectural experimentation in the 1920s and 1930s and onward into the 1970s Not only does the book focus on how professionals have engaged with the architecture of healing and the body it also explores how urban dwellers have

strategized and modified their living environments themselves to create a kind of vernacular modernist architecture of health in their homes gardens and backyards This new work builds upon a growing interdisciplinary field incorporating the urban humanities geography architectural history the history of medicine and critical visual studies that reflects our current preoccupation with the body and its corresponding therapeutic culture Gender, Sport, Science J.
