*Implementation and Redesign of Catalytic Function in Biopolymers* Franz P. Schmidtchen,2003-07-03 Improvement of the catalytic properties of biological catalysts is equally important in the optimization of industrial processes as in the fundamental understanding of the catalytic machinery at the molecular level The approaches taken are diverse and span from purely result oriented but nevertheless methodologically subtle making and screening of combinatorial libraries to highly sophisticated tailoring of the environment of active sites This volume illustrates four different concepts for modifying a given biocatalyst framework or create novel functions using Nature s basic building blocks Summing up the state of the art biocatalyst engineering it serves as an orientational landmark and a platform for the specialist and non expert alike to keep abreast of developments in this rapidly evolving field

**Rural Development in the**

**Digital Age** Martin Pěluča, Edward Kasabov, 2019-10-24 Rural Development in the Digital Age explores current theoretical and policy developments in EU rural policy during the 4 0 period The book offers an analysis of the contradictory and complex drivers and multiple impacts of Period 4 0 policy within the specific territorial context of its implementation It is commonly agreed within academic and policy circles that the contexts trends drivers and impacts which are currently morphing have the potential to determine the nature and boundaries of rural areas in the longer term The authors examine inconsistencies in the design and implementation of EU rural development policy driven largely by intensifying neo productivist pressures The importance and novelty of the book lie in defining and critically examining the territorial impacts of neo productivism as an ideology a practice and a set of policy imperatives during the EU s 2014 2020 programming period The authors argue that such a paradigm shift in EU rural policy may reduce its effectiveness and ability to meet its goals of balanced territorial development and cohesion This book will be of interest to advanced students researchers and policymakers in rural policy regional studies economic geography and EU policy

The Physics of Protein Structure and Dynamics Reinhard Schweitzer-Stenner, 2024-09-23 The Physics of Protein Structure and Dynamics looks at various aspects of protein structure and dynamics from a physico chemical point of view It goes into some depth regarding the description of non covalent forces that determine the relative stability of folded and unfolded proteins Anharmonic protein dynamics involving motions between different minima of a rugged Gibbs energy landscape is described in great detail The book combines various aspects of the protein folding unfolding processes with an overview of intrinsically disordered proteins which have attracted considerable interest of the protein community over the last 25 years but are thus far underrepresented in classroom oriented textbooks The book looks at protein folding and intrinsically disordered proteins as heavily interrelated topics that need to be viewed together Furthermore it presents some basic physico chemical aspects of protein peptide self assembly into nanoscale fibrils Intrinsically disordered peptides and proteins play a major role particularly in aggregation and self assembly processes that lead to various diseases Alzheimer Parkinson Huntington Mad Cow Therefore the relevance of protein disorder for protein self assembly deserves a closer look Protein self assembly cannot be separated from protein folding since it is frequently the

product of misfolding With regard to modern theories the folding processes are linked to insights on protein dynamics and the discovered relationship between proteins and spin glasses The readers will benefit from being provided with an in depth overview of the physical concepts that govern different aspects of protein folding disorder and self assembly By emphasizing the relationship between these issues the approach adds a holistic character to the book The book is to a major extent mathematically based Mathematics is part of the language of physicists and physical chemists which cannot be properly substituted by words For instructors the book will offer a unique source for her his teaching of current protein physics issues The way how the book will be constructed multiple references to primary literature with DOI links literature based problem sets and topics for discussion will facilitate a learning process suitable for research oriented students Problem solving frequently requires the writing of short computer programs something that is underemphasized in chemistry and biochemistry education with the exception of computationally trained students of course

**The IGF System** Ron G. Rosenfeld, Charles T. Roberts, 1999-06-01 It has been over 40 years since the original report by Salmon and Daughaday demonstrating that the ability of GH to stimulate sulfation of cartilage was mediated by a sulfation factor In the ensuing decades it has become apparent that this sulfation factor activity encompasses a complex system of ligands IGFs receptors and carrier proteins that are in turn responsible for a wide array of cellular actions The IGF system has been demonstrated to be critically involved in both intrauterine and postnatal growth and to have important implications in cancer biology as well owing to the ability of the IGFs to function in endocrine paracrine and autocrine modes and given the wide distribution of IGFs in virtually every organ system The contributions to The IGF System reflect the wide span of interest in the IGF system and its implications for normal and abnormal growth and metabolism The chapters have been divided into four broad sections I Molecular biology of the IGF system II Biological actions of the IGFs III IGF physiology and IV Clinical aspects of the IGFs We have made every effort to highlight the major contemporary themes in IGF biology but as is inevitable in such a fast moving field perspectives will continue to change as new information is accumulated
