Six Approaches To Child Rearing:

Six Approaches to Child Rearing Donald Eugene Mead, 1980 **Parents And The Dynamics Of Child Rearing** George W Holden, 2019-07-11 Research into parent child relationships is a diverse field of inquiry attracting investigators from a variety of disciplines and subdisciplines This book integrates and synthesizes the literature by focusing on issues concerning the parent The text is organized around four key questions What determines parental behavior What are the effects of parenting on children What makes some parents more effective than others Why do some parents maltreat their children George Holden adopts a dynamic rather than a static perspective on parenting This dynamic approach reflects parents capacity to modify their behavior as they respond to changes in their children and in their own lives Throughout the text historical antecedents as well as methodological and theoretical issues are highlighted Although the book is designed for advanced courses focusing on the parent child relationship it also provides a good overview for those interested in current research concerning parenting

A Model Mother? Family Policy and Childrearing in Post-Devolution Scotland Tania Wood, 2014-03-17 This book explores childrearing approach as one of the prime sites of the reproduction of social inequality During the latter half of the 2000s UK and Scottish government policy placed increasing emphasis on the importance of parenting and the early years as factors likely to have an impact on health education and employment outcomes Between 2005 and 2008 the timeframe considered by this study a number of policy initiatives emerged which were intended to support better parenting This book argues that what was presented as a model of good parenting was in essence a model of middle class parenting which misunderstood and devalued other parenting approaches In this study Lareau's typology of childrearing approach is used as a means of situating the UK parenting policy discourse within a broader theoretical context and assessing critically the extent to which this policy discourse reflects childrearing approaches in Scotland The book concludes that family policy between 2005 and 2008 did not fully reflect the variety of childrearing approaches in Scotland and that mothers whose circumstances and childrearing approach diverged from the policy model may not have been adequately supported
