**Moonstruck** Ernest Naylor,2015-09-23 Throughout history the influence of the full Moon on humans and animals has featured in folklore and myths Yet it has become increasingly apparent that many organisms really are influenced indirectly and in some cases directly by the lunar cycle Breeding behaviour among some marine animals has been demonstrated to be controlled by internal circalunar biological clocks to the point where lunar daily and lunar monthly patterns of Moon generated tides are embedded in their genes Yet intriguingly Moon related behaviours are also found in dry land and fresh water species living far beyond the influence of any tides In Moonstruck Ernest Naylor dismisses the myths concerning the influence of the Moon but shows through a range of fascinating examples the remarkable real effects that we are now finding through science He suggests that since the advent of evolution on Earth which occurred shortly after the formation of the Moon animals evolved adaptations to the lunar cycle and considers whether if Moon clock genes occur in other animals they also might exist in us **Juvenile Law Violators, Human Rights, and the Development of New Juvenile Justice**

**Systems** Eric L Jensen,Jørgen Jepsen,2006-10-04 This volume brings together scholars and practitioners specialising in juvenile justice from the US Europe alongside scholars from Africa and Asia who are working on human rights issues in developing countries or countries in transition The book thus presents two types of papers the first being descriptive and analytical academic papers on whole systems of juvenile justice or certain parts thereof e g aftercare restorative justice etc These topics are presented as essential for the development of new juvenile justice systems The second group of papers deal with efforts to promote reform through international activity PRI DCI DIHR and through efforts to utilise modern theory in

national reforms in developing countries Malawi Nepal and Serbia or in countries experiencing current or recent political and systemic changes or developments South Africa Germany and Poland The volume is also intended to throw light on recent trends in juvenile crime in various countries the relationship between actual developments and popular and political perceptions and reactions to such developments including the efforts to locate effective alternatives to the incarceration of young offenders At the same time as the search for such alternatives is being intensified through international exchange and experimentation the amelioration of harsh measures against juvenile law violators is often countered by political and public outcries for security and demonstrative public intervention against misbehavior A streak of new moralism is clearly discernable as a counteracting force against more humane reform efforts The volume throws light on developments in the actual parameters of juvenile offending public and political demands for security and public intervention and measures to provide interventions which are at the same time compatible with international human rights instruments
