The Last Unexplored Place on Earth: Investigating the Ocean Floor with Alvin the Submersible Aly Brown,2023-10-17 Dive into the world of Alvin the Submersible as award winning journalist Aly Brown shares the stories of what lies beneath the waves including lost hydrogen bombs underwater volcanoes storied shipwrecks and hundreds of new species Humans have explored the far reaches of the globe from the top of Mount Everest to Badwater Basin a stretch of land 282 feet below sea level But for most of our time on this planet the ocean has been a huge mystery It s only in the last 50

years that scientists have really started studying the ocean floor with the help of one amazing creation Alvin the submersible. A deep sea vessel that can sink miles below the surface with three people inside Alvin and its crew have uncovered a treasure trove of information in the last fifty years. From tracking down lost hydrogen bombs to exploring underwater volcanoes to capturing footage of storied shipwrecks there is so much waiting to be discovered beneath the waves. Join award winning journalist Aly Brown as she dives into the wonders of Alvin's world and see for yourself what lies in the last unexplored place on earth.

Lake Biwa: Interactions between Nature and People Hiroya Kawanabe, Machiko Nishino, Masayoshi Maehata, 2020-08-25

Although the first edition had a similar focus more than five years have passed since its publication and the biological and social circumstances of the lake have drastically changed due to for example the further expansion of alien species the decrease of indigenous species the progress of integrated watershed management by the Union of the Kansai Government which was established in 2010 the legislation of the Conservation and Restoration Act of Lake Biwa in 2015 and more. The new edition will therefore feature updated and new information on the above and more topics as well as updated and revised data based on the latest research. Inventories of respective taxa especially those of small animals are also revised based on the latest studies. Furthermore this volume covers the characteristics of the biota of this ancient lake but at the same time it will also approach it as a culture ancient lake. Other topics also include water pollution lakeshore development the effects of global warming in the past and present the influence of people and countermeasures by local and national governments. Moreover the volume also provides a comprehensive view on the future of Lake Biwa and that of its residents. Miraculously enough this ancient lake has kept its water quality clear even until today despite the fact of more than 14 million people living on its shores. Finally the book also gives indispensable information to those engaged in improving and conserving water regimes of lakes and other water bodies all over the world and to those interested in the culture and history of Japan. Lake Biwa is not only one of the rarest ancient lakes of the world but the people's involvement with the lake also goes back a long way. This is shown in the diverse culture developed in this area and in the various archaeological finds that date back as early as the Jomon Period nearly 10 000 years ago. Today Lake Biwa fulfills an important role as a water resource by providing domestic commercial industrial and agricultural water for over 14 million residents living around the Lake Biwa Yodo River drainage basin. This updated volume focuses on the geological and biological features of the lake as well as on the long term interactions between the people and the lake.
