This thoroughly researched and sharply opinionated biography presents a nuanced portrait of the renowned 18th century navigator Captain James Cook. The age of discovery was at its peak in the eighteenth century with bold adventurers charting the furthest reaches of the globe. Foremost among these explorers was Captain James Cook of the British Royal Navy. Recent writers have viewed Cook through the lens of colonial exploitation regarding him as a villain. While they raise important issues many of these critical accounts overlook his major contributions to science navigation and cartography. In *Captain Cook* Frank McLynn re creates the voyages that took the famous navigator from his native England to the outer reaches of the Pacific Ocean. Although Cook died in a senseless avoidable conflict with the people of Hawaii McLynn illustrates that to the men with whom he served Cook was master of the seas and nothing less than a titan. McLynn reveals Cook's place in history as a brave and brilliant yet tragically flawed man. *Drawing Investigations* Sarah Casey, Gerry Davies, 2020-06-11 Using close visual analysis of drawings artist interviews critical analysis and exegesis *Drawing Investigations* examines how artists use drawing as an investigative tool to reveal information that would otherwise remain unseen and unnoticed. How does drawing add shape to ideas? How does the artist accommodate to challenges and restraints of a particular environment? To what extent is a drawing complementary and continuous with its subject and where is it disruptive and provocative? Casey and Davies address these questions while focusing on artists working collaboratively and the use of drawing in challenging or unexpected environments. *Drawing Investigations* evaluates the emergence of a way of thinking among an otherwise disconnected group of artists by exploring commonalities in the application of analytical drawing to the natural world urban environment social forces and lived experience. Examples represent a spectrum of research in international contexts: an oceanographic Institute in California the archives of Amsterdam's Rijksmuseum the Antarctic Survey geothermal research in Japan and the Kurdish diaspora in Iraq. Issues are situated in the contemporary theory and practice of drawing including relationships to historical precedents. By exploring drawing's capacity to capture and describe experience to sharpen visual faculties and to bridge embodied and conceptual knowledge *Drawing Investigations* offers a fresh critical perspective on contemporary drawing practice. **The Old Country** George Seddon, 2005-10-04 We are a nation of gardeners and we take pleasure in tending our backyards. But this pleasure sits uneasily with our knowledge that the places where most of us live are running out of water. We suspect that our lawns and many of our plants from the damp climates of northern European gardens are too demanding of scarce supplies but can't imagine our streets and gardens without them. *The Old Country* opens our eyes and minds to other possibilities. It does so by telling us stories about our natural landscape. George Seddon believes that the better we understand the delicacy and beauty of our natural environment the more at home we will feel as Australians. This passionate wise and witty book enriched with breathtakingly beautiful illustrations suggests that the answers to our water problems lie here at home. **Imagining The Pacific** Bernard Smith, 2018-06-01 In this book Bernard Smith explores in more depth the issues first dealt with in his classic

European Vision and the South Pacific He continues his careful examination of how European artists and scientists travelling to the Pacific during the time of Cook s voyages were stimulated to see the world in new and creative ways In analysing intensely personal responses to a new accessible environment Bernard Smith shows how science topography and travel had an impact on current pictorial genres Among many surprising findings he argues that the obligation science placed on art to provide information was a factor in the triumph of Impressionism during the late nineteenth century With its breadth of vision and attention to detail its exploration of the complex relationship between the pursuit of knowledge and the exercise of power Imagining the Pacific takes its place alongside Bernard Smith s earlier work as a milestone in historical scholarship
