*The Chamber of Maiden Thought* (Psychology Revivals) Meg Harris Williams, Margot Waddell, 2013-11-26

Literature is recognised as having significantly influenced the development of modern psychoanalytic thought In recent years psychoanalysis has drawn increasingly on the literary and artistic traditions of western culture and moved away from its original medical scientific context Originally published in 1991 The Chamber of Maiden Thought Keats's metaphor for the awakening of the thinking principle is an original and revealing exploration of the seminal role of literature in forming the modern psychoanalytic model of the mind The crux of the post Kleinian psychoanalytic view of personality development lies in the internal relations between the self and the mind's objects Meg Harris Williams and Margot Waddell show that these relations have their origins in the drama of identifications which we can see played out metaphorically and figuratively in literature which presents the self creative process in aesthetic terms They argue that psychoanalysis is a true child of literature rather than merely the interpreter or explainer of literature illustrating this with some examples from clinical experience but drawing above all on close scrutiny of the dynamic mental processes presented in the work of Shakespeare Milton the Romantic poets Emily Bronte and George Eliot The Chamber of Maiden Thought will encourage psychoanalytic workers to respond to the influence of literature in exploring symbolic mental processes By bringing psychoanalysis into creative conjunction with the arts it enables practitioners to tap a cultural potential whose insights into the human mind are of immense value
