Animals as Disguised Symbols in Renaissance Art Simona Cohen,2008 The relationship between medieval animal symbolism and the iconography of animals in the Renaissance has scarcely been studied Filling a gap in this significant field of Renaissance culture in general and its art in particular this book demonstrates the continuity and tenacity of medieval animal interpretations and symbolism disguised under the veil of genre religious or mythological narrative and scientific naturalism An extensive introduction dealing with relevant medieval and early Renaissance sources is followed by a series of case studies that illustrate ways in which Renaissance artists revived conventional animal imagery in unprecedented contexts investing them with new meanings on a social political ethical religious or psychological level often by applying exegetical methodology in creating multiple semantic and iconographic levels Brill s Studies on Art Art History and Intellectual History vol 2

Emblems and the Natural World Paul J. Smith,Karl A.E. Enenkel,2017-09-11 Since its invention by Andrea Alciato the emblem is inextricably connected to the natural world Alciato and his followers drew massively their inspiration from it For their information about nature the emblem authors were greatly indebted to ancient natural history the medieval bestiaries and the 15th and 16th century proto emblematics especially the imprese The natural world became the main topic of for instance Camerarius s botanical and zoological emblem books and also of the applied emblematics in drawings and decorative arts Animal emblems are frequently quoted by naturalists Gesner Aldrovandi This interdisciplinary volume aims to address these multiple connections between emblematics and Natural History in the broader perspective of their underlying ideologies scientific artistic literary political and or religious Contributors Alison Saunders Anne Rolet Marisa Bass Bernhard Schirg Maren Biederbick Sabine Kalff Christian Peters Frederik Knegt Agnes Kusler Aline Smeesters Astrid Zenker Tobias Bulang Sonja Schreiner Paul Smith and Karl Enenkel

Emblems in the Free Imperial City Mara R. Wade,Christopher D. Fletcher,Andrew C. Schwenk,2024-03-04 Civic virtues were central to early modern N rnberg s visual culture These essays in this volume explore N rnberg as a location from which to study the intersection of art and power The imperial city was awash in emblems and they informed most aspects of everyday life The intent of this collection is to focus new attention on the town hall emblems while simultaneously expanding the purview of emblem studies moving from strict iconological approaches to collaborations across methodologies and disciplines

Studies in seventeenth-century imagery Mario Praz,2001

The European Emblem Bernard F. Scholz, Michael Bath, David Weston, 2024-01-08 The ten papers in this volume were all presented at the first International Conference The European Emblem held in Glasgow in August 1987 under the auspices of the Society for Emblem Studies The conference included papers discussing most of the major European languages in which emblem books flourished and the papers selected for the presented volume represent something of the variety and scope of current scholarship in this field Subjects dealt with include a protoemblematic Latin translation of the Tabula Cebetis the Emblematum Liber by Andreas Alciat the earliest reception of the Ars Emblematica in Dutch the career of Thomas Palmer Daniel Cramers 80 Emblemata moralia nova and the Emblemata of Pollockij The papers selected for this volume demonstrate the vigor and variety of work in this field whilst also suggesting some of the directions and opportunities for further research Reading the Book of Nature in the Dutch Golden Age, 1575-1715 Eric Jorink, 2010-10-25

Traditionally Dutch scientific culture of the Golden Age is regarded as rational pragmatic and utilitarian The role of Christiaan Huygens Johannes Swammerdam and Antoni van Leeuwenhoek in the so called Scientific Revolution was recognised long ago as was the fact that the revolutionary philosophy of René Descartes made its first impact in the Netherlands This book challenges the traditional picture First it shows how nature was regarded as a second book of God next to the Bible For many contemplating investigating representing and collecting natural objects was a religious activity Secondly this book demonstrates that the deconstruction of the old view of nature was partly caused by the pioneering exegetical research conducted in the Dutch Republic more specifically the emergence of radical biblical criticism

Bibliotheca Blandfordiensis. [A Catalogue.] 9 Fasc. (Catalogus Librorum Qui Bibliothecae Blandfordiensis Nuper Additi Sunt. 1814.). George Spencer Churchill (Duke of Marlborough.), 1814 **Catalogue of Manuscripts, of Books Printed Upon Vellum, of Editiones Principes Et Aldinae, and of Books in Foreign Languages** Payne and Foss, 1830 *Bibliotheca rara et curiosa. A catalogue of old books for 1820* Boosey and sons, 1820 *The Look of Van Dyck* John Peacock, 2017-07-05 Based on a close study of Van Dyck's Self portrait with a Sunflower this book examines the picture's context in the symbolic discourses of the period and in the artist's oeuvre The portrait is interpreted as a programmatic statement made in the ambience of the Caroline court after Van Dyck's appointment as Principal Painter of his view of the art of painting This statement formulated in appropriately visual terms characterizes painting as a way of looking and seeing a mode of vision In making such a claim the artist steps aside from the familiar debate about whether painting was a manual or an intellectual discipline and moves beyond any idea of it as simply a means of representing the external world the painter's definitive faculty of vision can reach further than those realities which present themselves to the eye John Peacock analyses the motif of looking the ways in which figures regard or disregard each other throughout Van Dyck's work and the images of the sunflower and the gold chain in this particular portrait to reveal what is essentially an idealist conception of pictorial art He contradicts previous opinions that the artist was pedestrian in his thinking by showing him to be familiar with a range of

ideas current in contemporary Europe about painting and the role of the painter
