Miola, 1993-09-02 This volume constitutes the proceedings of the International Symposium on Design and Implementation of Symbolic Computation Systems DISCO 93 held in Gmunden Austria in September 1993 The growing importance of systems for symbolic computation has greatly influenced the decision of organizing this third conference in the series DISCO 93 focuses mainly on the most innovative methodological and technological aspects of the design and implementation of hardware and software systems for symbolic and algebraic computation automated reasoning geometric modeling and computation and automatic programming The general objective of DISCO 93 is to present an up to date view of the field and to serve as a forum in symbolic computation for the scientific exchange among academic industrial and user communities Besides invited talks by Buchberger Monagan Omodeo and Hong the volume contains 28 contributions carefully selected by a highly competent international program committee from a total of 56 submissions **Numerical and Symbolic**

**Computation** Maria Amélia Ramos Loja, Joaquim Infante Barbosa, 2020 This book is a comprehensive set of articles reflecting on the application of symbolic and or numerical computation in a range of scientific areas within the fields of engineering and science These articles constitute extended versions of communications presented at the 4th International Conference on Numerical and Symbolic Computation SYMCOMP 2019 that took place in Porto Portugal from 11 to 12 April 2019 The different chapters present diverse perspectives on the existing effective connections between mathematical methods and procedures and other knowledge areas The intrinsic multidisciplinary character is visible throughout the whole book as a result of the applicability of the scope and the applications considered The reader will find this book to be a useful

resource for identifying problems of interest in different engineering and science areas and in the development of mathematical models and procedures used in the context of prediction or verification computational tools as well as in the aided learning teaching context This book is a must read for anyone interested in the recent developments and applications of symbolic and numerical computation for a number of multidisciplinary engineering and science problems **Symbolic**
