Symbols of Excellence Grahame Clark, 1986-04-24 Professor Clark explores the reasons of why humans value precious metals gems ivory and pearls so highly The Livery Collar in Late Medieval England and Wales Matthew Ward, 2016 5 Livery Collars in Wales and the Edgecote Connection A Brilliant Commodity Saskia Coenen Snyder, 2023 The first history of Jews in the nineteenth century transatlantic diamond industry A Brilliant Commodity shows how Jews became key players in the trade from its earliest days from South Africa to Amsterdam and London to New York to its place as a lucrative commodity in the global economy Victorian Jewelry, Identity, and the Novel Jean Arnold, 2016-03-16 In this study of Victorian jewels and their representation Jean Arnold explores the role material objects play in the cultural cohesion of the West Diamonds and other gems Arnold argues symbolized the most closely held beliefs of the Victorians and thus can be considered prisms of culture Mined in the far reaches of the empire they traversed geographical space and cultural boundaries representing monetary value and evoking empire class lineage class membership gender relations and aesthetics Arnold analyzes the many roles material objects fill in Western culture and surveys the cross cultural history of the Victorian diamond uncovering how this object became both preeminent and representative of Victorian values Her close readings of Wilkie Collins s The Moonstone George Eliot s Middlemarch William Makepeace Thackeray s The Great Hoggarty Diamond and Anthony Trollope's The Eustace Diamonds show gendered aesthetic economic fetishistic colonial legal and culturally symbolic interpretations of jewelry as they are enacted through narrative Taken together these divergent interpretations offer a holistic view of a material culture s affective attachment to objects As the assigned meanings of jewels turn them into symbols of power personal relationships and valued ideas human interactions with gems elicit emotional responses that bind the materialist culture together Critical Approaches to Ancient Near Eastern Art Brian A. Brown, Marian H. Feldman, 2013-12-13 This volume assembles more than 30 articles focusing on the visual material and environmental arts of the Ancient Near East Specific case studies range temporally from the fourth millennium up to the Hellenistic period and geographically from Iran to the eastern Mediterranean Contributions apply innovative theoretical and methodological approaches to archaeological evidence and critically examine the historiography of the discipline itself Not intended to be comprehensive the volume instead captures a cross section of the field of Ancient Near Eastern art history as its stands in the second decade of the twenty first century The volume will be of value to scholars working in the Ancient Near East as well as others interested in newer art historical and anthropological approaches to visual culture The Routledge Handbook of Critical Resource Geography Matthew Himley, Elizabeth Havice, Gabriela Valdivia, 2021-07-12 This Handbook provides an essential guide to the study of resources and their role in socio environmental change With original contributions from more than 60 authors with expertise in a wide range of resource types and world regions it offers a toolkit of conceptual and methodological approaches for documenting analyzing and reimagining resources and the worlds with which they are

entangled The volume has an introduction and four thematic sections The introductory chapter outlines key trajectories for thinking critically with and about resources Chapters in Section I Un knowing resources offer distinct epistemological entry points and approaches for studying resources Chapters in Section II Un knowing resource systems examine the components and logics of the capitalist systems through which resources are made circulated consumed and disposed of while chapters in Section III Doing critical resource geography Methods advocacy and teaching focus on the practices of critical resource scholarship exploring the opportunities and challenges of carrying out engaged forms of research and pedagogy Chapters in Section IV Resource making world making use case studies to illustrate how things are made into resources and how these processes of resource making transform socio environmental life This vibrant and diverse critical resource scholarship provides an indispensable reference point for researchers students and practitioners interested in understanding how resources matter to the world and to the systems conflicts and debates that make and remake it What is Cultural History? Peter Burke, 2019-07-12 What is Cultural History has established itself as an essential guide to what cultural historians do and how they do it Now fully updated in its third edition leading historian Peter Burke offers afresh his accessible account of the past present and future of cultural history as it has been practised not only in the English speaking world but also in Continental Europe Asia South America and elsewhere Burke begins by discussing the classic phase of cultural history associated with Jacob Burckhardt and Johan Huizinga and the Marxist reaction to it from Frederick Antal to Edward Thompson He then charts the rise of cultural history in more recent times concentrating on the work of the last generation often described as the New Cultural History He places cultural history in its own cultural context noting links between new approaches to historical thought and writing and the rise of feminism postcolonial studies and an everyday discourse in which the idea of culture plays an increasingly important part The new edition also surveys the latest developments in the field and considers the directions that cultural history has been taking in the twenty first century and may take in the future This landmark book will continue to be essential reading for students of history anthropology cultural studies and literary The Diversity of Hunter Gatherer Pasts Bill Finlayson, Graeme Warren, 2017-06-30 This thought provoking studies collection of new research papers explores the extent of variation amongst hunting and gathering peoples past and present and the considerable analytical challenges presented by this diversity This problem is especially important in archaeology where increasing empirical evidence illustrates ways of life that are not easily encompassed within the range of variation recognized in the contemporary world of surviving hunter gatherers Put simply how do past hunter gatherers fit into our understandings of hunter gatherers Furthermore given the inevitable archaeological reliance on analogy it is important to ask whether conceptions of hunter gatherers based on contemporary societies restrict our comprehension of past diversity and of how this changes over the long term Discussion of hunter gatherers shows them to be varied and flexible but modeling of contemporary hunter gatherers has not only reduced them into essential categories but has also portrayed them as static

and without history It is often said that the study of hunter gatherers can provide insight into past forms of social organization and behavior unfortunately too often it has limited our understandings of these societies In contrast contributors here explore past hunter gather diversity over time and space to provide critical perspectives on general models of hunter gatherers and attempt to provide new perspectives on hunter gatherer societies from the greater diversity present Prehistory at Cambridge and Beyond Grahame Clark, 1989-08-25 Grahame Clark's book examines the development of prehistoric archaeology at Cambridge and the achievements of its graduates placing this theme against the background of the growth of archaeology as an academic discipline worldwide Prehistory in Cambridge began to be taught formally in 1920 and emerged as a full tripos soon after the Second World War From the outset it focused on the aims and methods of archaeological research providing in addition for combinations of study options ranging from early prehistory to the archaeology of the major civilisations of the Old World and the protohistory of Northern Europe The measure of its success is shown by the achievement of Cambridge graduates at home and overseas in both the study and the field A significant outcome of their work has been the widespread recognition of archaeology as a subject of broad educational value not merely for undergraduates but for human beings the world over The Oliphant Avinoam Shalem, 2004-08-01 Setting a group of medieval carved ivory horns in the specific artistic and historical context in which they were manufactured used and re used this book presents a mine of information for the study of medieval history. The first chapters explore such technical aspects as the cutting and carving of oliphants and also the broader issues of the morphology of ivory and its availability in the Mediterranean basin in the Middle Ages On the basis of specific carving methods and varying vocabulary of motifs the oliphants are organized into groups and their probable sites of production are suggested. The core of this volume however is the attempt to place them in their specific historical context The purpose of their mass production namely their patronage and original function is explored but also their reception and new functions in the church treasuries of Latin Europe is Designing for Re-use Tom Fisher, Janet Shipton, 2010 First Published in 2009 Routledge is an imprint of broadly discussed Taylor Francis an informa company **The Royal Hunt in Eurasian History** Thomas T. The mastery of the king over nature served an important purpose in official renderings as a manifestation of his possession of heavenly good fortune he could tame the natural world and keep his kingdom safe from marauding threats human or animal The exchanges of hunting partners cheetahs elephants and even birds became diplomatic tools as well as serving to create an elite hunting culture that transcended political allegiances and ecological frontiers This sweeping comparative work ranges from ancient Egypt to India under the Raj With a magisterial command of contemporary sources literature material culture and archaeology Thomas T Allsen chronicles the vast range of traditions surrounding this fabled Grahame Clark and His Legacy John Coles, Arkadiusz Marciniak, 2010-05-11 Grahame Clark was a major figure in European archaeology for over 50 years and pioneered work in prehistoric economies and ecology in science based archaeology and in a world view of ancient societies In this book a variety of authorities from Europe and beyond assess these major contributions and provide discussions about Clark's own colleagues and contemporaries his major archaeological themes and his varied approaches and his world wide contacts and travels The papers provide surveys and opinions on Clark s role in the development of archaeology in the 20th century and the basis that it provided for archaeological work of today The book will be a valuable source of evidence ideas and references for scholars interested in the development of the Food and Identity in England, 1540-1640 Paul S.
