Cataloging Sound Recordings Deanne Holzberlein, Dolly Jones, 1988 At last a manual that takes the chore out of cataloging sound recordings The author clarifies the AACR2 rules Anglo American Cataloging Rules 2nd edition and literally steps through the thought process used in cataloging a sound recording beginning with what to use as the source for the title through the physical description and series information All the examples of catalog cards presented ranging from the full gamut of 20th century music to spoken records and compact discs show the full level of descriptive cataloging The appendixes make this a practical worker's manual they include order and content of cataloging notes order of parts in a uniform title a glossary of musical terms and acronyms a list of basic reference books and thematic indexes a complete set of catalog cards and the Library of Congress rule interpretations for sound recordings The detailed indexes enhance this important book's utility

Reviving Haydn Bryan Proksch, 2015 By the 1840s Joseph Haydn who died in 1809 as the most celebrated composer of his generation had degenerated into the bewigged Papa Haydn a shallow placeholder in music history who merely invented the forms used by Beethoven In a remarkable reversal Haydn swiftly regained his former stature within the opening decades of the twentieth century Reviving Haydn New Appreciations in the Twentieth Century examines both the decline and the subsequent resurgence of Haydn's reputation in an effort to better understand the forces that shape critical reception on a broad scale No single person or event marked the turning point for Haydn's reputation Instead a broad resurgence reshaped opinion in Europe and the United States in short order The Haydn revival engaged many of the music world's leading figures composers Vincent d'Indy and Arnold Schoenberg conductors Arturo Toscanini performers Wanda Landowska critics Lawrence Gilman and scholars Heinrich Schenker and Donald Tovey each of whom valued Haydn's music for specific reasons and used it to advance particular goals Yet each advocated for a rehearing and rereading of the composer's works calling for a new appreciation of Haydn's music Bryan Proksch is assistant professor of music history at Lamar University in Beaumont Texas where he specializes in the music of the late eighteenth century

Kenneth Birkin,2011-07-07 A detailed study of the life of one of the most important and influential musical figures of the nineteenth century **The Oxford Handbook of Topic Theory** Danuta Mirka,2014 Topics are musical signs that rely on associations with different genres styles and types of music making The concept of topics was introduced by Leonard Ratner in the 1980s to account for cross references between eighteenth century styles and genres While music theorists and critics were busy classifying styles and genres defining their affects and proper contexts for their usage composers started crossing the boundaries between them and using stylistic conventions as means of communication with the audience Such topical mixtures received negative evaluations from North German critics but became the hallmark of South German music which engulfed the Viennese classicism Topic theory allows music scholars to gain access to meaning and expression of this music The Oxford Handbook of Topic Theory consolidates this field of research by clarifying its basic concepts and exploring its historical foundations The volume grounds the concept of topics in eighteenth century music theory aesthetics and criticism Documenting historical reality of individual topics on the basis of eighteenth century sources it relates topical analysis to other methods of music analysis conducted from the perspectives of composers performers and listeners With a focus on eighteenth century musical repertoire The Oxford Handbook of Topic Theory lays the foundation under further investigation of topics in music of the nineteenth twentieth and twenty first centuries **Music as Philosophy** Michael

Spitzer,2021-08-31 Beethoven s late style is the language of his ninth symphony the Missa Solemnis the last piano sonatas and string quartets the Diabelli Variations the Bagatelles as well as five piano sonatas five string quartets and several smaller piano works Historically these works are seen as forging a bridge between the Classical and Romantic traditions in terms of

their musical structure they continue to be regarded as revolutionary Spitzer's book examines these late works in light of the musical and philosophical writings of the German intellectual Theodor Adorno and in so doing attempts to reconcile the conflicting approaches of musical semiotics and critical theory He draws from various approaches to musical linguistic and aesthetic meaning relating Adorno to such writers as Derrida Benjamin and Habermas as well as contemporary music theorists Through analyses of Beethoven's use of specific musical techniques including neo Baroque fugues and counterpoint Spitzer suggests that the composer's last works offer a philosophical and musical critique of the Enlightenment and in doing so created the musical language of premodernism

Structural Novelty and Tradition in the Early Romantic Piano Concerto Stephan D. Lindeman, 1999 Lindeman a musicologist traces and defines the historical development of the concerto form as it passed from Mozart to succeeding generations He then assesses Beethoven's contributions and examines the classical model of the form in the early 19th century by overviewing several early romantic composers works Subsequent chapters analyze and assess the responses of five precursors of Schumann whose work offers a synthesis of radical experiments and traditional tenets He concludes by suggesting that concertos of Liszt offer a road into further developments of the genre in the second half of the century Illustrated with handw portraits of composers and excerpts from musical scores Annotation copyrighted by Book News Inc Portland OR

The Age of Musical Arrangements in Europe, 1780-1830 Nancy November, 2023-09-28 This Element considers the art and culture of arranging music in Europe in the period 1780-1830 using Haydn's London symphonies and Mozart's operas as its principal examples The degree to which musical arrangements shaped the social musical and ideological landscape in this era deserves further attention This Element focuses on Vienna and an important era in the culture of arrangements in which they were widely and variously cultivated and in which canon formation and the conception of musical works underwent crucial development Piano transcriptions for two hands four hands and two pianos became ever more prominent completely taking over the field after 1850 For various reasons principal composers of the era under consideration including Haydn Mozart and Beethoven participated directly in the practice of arrangement Motivations to produce arrangements included learning the art of composition getting one's name known more widely financial gain and pedagogical aims
