A. Cook, 2007 The international political system built on a foundation of sovereign states has not effectively addressed age old quandaries of war crime poverty oppression corruption and environmental degradation Modern social and technological trends are further stressing this system to the breaking point *Global Government under the U S Constitution* examines this failing system and proposes an entirely new approach Instead of an international system built on sovereign nation states this work argues that federal democracy provides a better proven model for global governance While such an idea may linger from time to time in the background of thought it has never moved to the forefront because of the difficulty in imagining how it could be realized Now however this book thrusts forward a concrete method arguing that the U S Constitution establishes a sound system for large scale governance This federal democracy should naturally extend globally to address current international social problems It did so first among thirteen colonies and later across a continent and beyond *Global Government under the U S Constitution* also explains specific legal means to affect such an idea making it a fascinating read for officials academics leaders and students alike Book jacket **Technological, Managerial and Organizational Core Competencies: Dynamic Innovation and Sustainable Development** Nobre, Farley Simon, 2011-09-30 Innovation involves

He has set out a new approach to literature that combines Romantic and Classical outlooks in a substantial literary oeuvre of 2 000 poems including over 300 classical odes two poetic epics five verse plays three masques two travelogues and 1 200 stories. He has created a new philosophy of Universalism that focuses on the unity of the universe and humankind and the interconnectedness of all disciplines and challenges modern philosophy. He has presented an original historical view of the rise and fall of civilisations and proposed and detailed a limited democratic World State with the power to abolish war and solve all the world's problems. **Selected Letters** draws together those of his letters written over 60 years that aid the interpretation and elucidation of his works. Many of his correspondents are well known figures within literature philosophy history and international politics and Hagger is in the footsteps of Alexander Pope in editing his own letters which are in the tradition of Pope Wordsworth Keats T E Lawrence Ezra Pound and Ted Hughes one of his correspondents. Mining Africa Warikandwa, Tapiwa V., 2017-05-01. This book is a pacesetter in matters of mining and the environment in Africa from multidisciplinary and spatio temporal perspectives. The book approaches mining from the perspectives of law politics archaeology anthropology African studies geography human ecology sociology history economics and development. It interrogates mining and environment from the perspectives of customary law as well as from the perspectives of Euro modern laws. In this sense the book straddles precolonial colonial and postcolonial mining and environmental perspectives. In all this it maintains a Pan Africanist perspective that also speaks to contemporary debates on African Renaissance and to the unity of Africa. From scrutinising the lived realities of African miners who are often insensitively and unjustly addressed as illegal miners the book also interrogates transnational mining corporations matters of corporate social responsibility as well as matters of tax evasions by transnational corporations whose commitment to accountability to African governments is questioned. With both theoretical chapters and chapter based on empirical studies

on mining and the environment across the African continent the book provides a much needed holistic one stop shop for scholars activists researchers and policy makers who need a comprehensive treatise on African mining and the environment The book comes at the right time when matters of African mining and environment are increasingly coming to the fore in the light of discourses about the new 21st century scramble for African resources in which big transnational corporations and nations are jostling to suck Africa dry in their race to control planetary resources It is a book that speaks to contemporary broader issues of de coloniality and transformation of African minds and African environmental resources
