Excerpt from *A Synopsis of Animal Classification*

There is perhaps nothing about the science of Zoology which is so much a matter of individual opinion as the method of classification of the various animal forms and this is so in the nature of things since a classification is at best but an artificial arrangement for convenience and only in an incomplete and wholly inadequate way represents the actual relationships These difficulties have led many teachers to practically disregard classification altogether but what is thus gained in scientific accuracy is lost in clearness of arrangement and the whole study is apt to seem vague and uncertain It is to prevent this feeling of vagueness and to furnish a foundation by means of which the facts ascertained by the student may be arranged in logical sequence that I have attempted this outline and in this attempt I have sought to present a classification which is modern and rests upon a morphological basis but is at the same time one that is dependent upon obvious points of structure and is thus not too technical for the use of beginning students In the artificial key at the end there is no attempt at morphological grouping and the characters emphasized are as far as possible the most obvious ones Its main value is that of an index by means of which a student who investigates an animal for the first time may guide himself to the proper part of the synopsis without being under the necessity of applying to the instructor About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works [A Zoological Pocket-book](#) Emil Selenka, 1890 [SYNOPSIS OF ANIMAL CLASSIFICATION](#) HARRIS HAWTHORNE.
