Syntactic Abilities In Normal And Dyslexic Children:

<u>Syntactic Abilities in Normal and Dyslexic Children</u> Susan Ann Vogel,1975 **An Investigation of Syntactic Abilities in Normal and Dyslexic Children** Susan Ann Vogel,1972 **Developmental Disabilities Abstracts** ,1977 **Handbook of Cognitive, Social, and Neuropsychological Aspects of Learning Disabilities** Stephen J. Ceci,2013-01-11 Recognized as the definitive reference in the field this book addresses a broad range of biologically based disorders that affect children s learning and development Leading authorities review the genetics of each disorder its course and outcome associated developmental cognitive and psychosocial challenges and what clinicians and educators need to know about effective approaches to assessment and intervention Coverage encompasses numerous lower incidence neurodevelopmental disabilities as well as more frequently diagnosed learning and behavior problems with a genetic component <u>Morphological Aspects of Language Processing</u> Laurie Beth Feldman,2013-05-13 It is now well established that phonological and orthographic codes play a crucial role in the recognition of isolated words and in understanding the sequences of words that comprise a sentence However words and sentences are organized with respect to morphological as well as phonological components It is thus unfortunate that the morpheme has received relatively little attention in the experimental literature either from psychologists or linguists Due to recent methodological developments however now is an opportune time to address morphological issues In the experimental literature there is a tendency to examine various psycholinguistic processes in English and then to assume that the account given applies with equal significance to English and to other languages Written languages differ however in the extent to which they capture phonological as contrasted with morphological units Moreover with respect to the morpheme languages differ in the principle by which morphemes are connected to form new words This volume focuses on morphological processes in word recognition and reading with an eye toward comparing morphological processes with orthographic and phonological processes Cross language comparisons are examined as a tool with which to probe universal linguistic processes and a variety of research methodologies are described Because it makes the experimental literature in languages other than English more accessible this book is expected to be of interest to many readers It also directs attention to the subject of language processing in general an issue which is of central interest to cognitive psychologists and linguists as well as educators and clinicians **Resources in Education** ,1976 **Research Relating to Children** ,1978 *Comprehension Processes in Reading* David A. Balota,G.B. Flores d'Arcais,Keith Rayner,2012-11-12 Comprehension Processes in Reading addresses the interrelationship among several areas relevant to understanding how people comprehend text The contributors focus on the on line processes associated with text understanding rather than simply with the product of that comprehension what people remember from reading Presenting the latest theories and research findings from a distinguished group of contributors Comprehension Processes in Reading is divided into four major sections Each section concluding with a commentary chapter discusses a different aspect of reader

understanding or dysfunction such as individual word comprehension sentence parsing text comprehension and comprehension failures and dyslexia   Phonology and Reading Disability Donald Shankweiler,Isabelle Y. Liberman,1989 Discusses the importance to the learning process of the phonological structures of words   *Cross-Language Studies of Learning to Read and Spell:* C.K. Leong,R.M. Joshi,2013-03-14 The present volume is based on the proceedings of the Advanced Study Institute AS I sponsored by the North Atlantic Treaty Organization NATO held in Alvor Algarve Portugal A number of scholars from different countries participated in the two week institute on Cognitive and linguistic aspects of reading writing and spelling The present papers are further versions with modifications and refinements from those presented at the Advanced Study Institute Several people and organizations have helped us in this endeavor and their assistance is gratefully acknowledged Our special thanks are to the Scientific Affairs division of NATO for providing the major portions of the financial support Dr L V da Cunha of NATO and Dr THo Kester and Mrs Barbara Kester of the International Transfer of Science and Technology of the various aspects of the institute and ITST for their help and support the staff of Hotel Alvor Praia for making our stay a pleasant one by helping us to run the institute smoothly   **Language Development and Learning to Read** Diane McGuinness,2006-08-11 Research on reading has tried and failed to account for wide disparities in reading skill even among children taught by the same method Why do some children learn to read easily and quickly while others in the same classroom and taught by the same teacher don t learn to read at all In Language Development and Learning to Read Diane McGuinness examines scientific research that might explain these disparities She focuses on reading predictors analyzing the effect individual differences in specific perceptual linguistic and cognitive skills may have on a child s ability to read Because of the serious methodological problems she finds in the existing research on reading many of the studies McGuinness cites come from other fields developmental psychology psycholinguistics and the speech and hearing sciences and provide a new perspective on which language functions matter most for reading and academic success McGuinness first examines the phonological development theory the theory that phonological awareness follows a developmental path from words to syllables to phonemes which has dominated reading research for thirty years and finds that research evidence from other disciplines does not support the theory McGuinness then looks at longitudinal studies on the development of general language function and finds a tantalizing connection between core language functions and reading success Finally she analyzes mainstream reading research which links reading ability to specific language skills and the often flawed methodology used in these studies McGuinness s analysis shows the urgent need for a shift in our thinking about how to achieve reading success   *Technology and learning disabilities* ,   The MIT Encyclopedia of Communication Disorders Raymond D. Kent,2004 A major new reference work with entries covering the entire field of communication and speech disorders   **Language Awareness and Learning to Read** J. Downing,R. Valtin,2012-12-06 During the 1970s there was a rapid increase in interest in metacognition and metalinguistics The impetus came from linguistics psychology and

psycho linguistics But with rather unusual rapidity the work from these scientific dis ciplines was taken over in education This new direction in these various areas of academic study was taken simultaneously by several different investigators Although they had varying emphases their work sometimes appears to be over lapping despite this it has been rather difficult to find a consensus This is reflected in the varying terminology used by these independent investigators linguistic awareness metacognition metalinguistic ability task aware ness lexical awareness and so on For educators these developments presented a glittering array of new ideas that promised to throw light on children s thinking processes in learning how to read Many reading researchers and graduate students have perceived this as a new frontier for the development of theory and research However the variety of independent theoretical approaches and their accompanying terminologies has been somewhat confusing   *Reaching an Understanding* John Sabatini,Elizabeth Albro,Tenaha O'Reilly,2012-08-14 Reaching an Understanding Innovations in How We View Reading Assessment builds upon the editors previous book Measuring Up Advances in How We Assess Reading Ability by representing some early attempts to apply theory to help guide the development of new assessments and measurement models Reaching an Understanding is divided into two sections assessment learning and instruction connecting text task and reader learner and how to build for the future These sections identify ways to assess students reading comprehension through multiple text sources purpose readings and assessment while a student is reading in order to determine deficits In light of federal legislation towards common core standards and assessments as well as significant national investments in reading and literacy education it is a critical and opportune time to bring together the research and measurement community to address fundamental issues of measuring reading comprehension in theory and in practice   **Oversight, Clean Air Act Amendments of 1977** United States. Congress. House. Committee on Interstate and Foreign Commerce. Subcommittee on Health and the Environment,1980   **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office,1975   *Slow Learners: Their Psychology And Instruction* G.L. Reddy,1997 Contents Concept of Slow Learners Identifying Slow Learners Intellectual Development of Slow Learners Emotional Development of Slow Learners Educational Programmes for Slow Learners Teaching Language to Slow Learners Teaching Mathematics to Slow Learners Teaching of Vocational Education and Physical Education to Slow Learners Developing Creativity and Social Competence in Slow Learners Research on Slow Learners   **Verbal Processes in Children** Charles J. Brainerd,Michael Pressley,2012-12-06 For some time now the study of cognitive development has been far and away the most active discipline within developmental psychology Although there would be much disagreement as to the exact proportion of papers published in developmen tal journals that could be considered cognitive 50% seems like a conservative estimate Hence a series of scholarly books to be devoted to work in cognitive development is especially appropriate at this time The Springer Series in Cognitive Development contains two basic types of books namely edited collections of original chapters by several authors and original volumes written by one author or a small group of authors The

flagship for the Springer Series will be a serial publication of the advances type carrying the subtitle Progress in Cognitive Development Research Each volume in the Progress sequence will be strongly thematic in that it will be limited to some well defined domain of cognitive developmental research e g logical and mathematical de velopment semantic development All Progress volumes will be edited collec tions Editors of such collections upon consultation with the Series Editor may elect to have their books published either as contributions to the Progress sequence or as separate volumes All books written by one author or a small group of authors will be published as separate volumes within the series A fairly broad definition of cognitive development is being used in the selection of books for this series **Hearing, Speech, and Communication Disorders** Information Center for Hearing Speech and Disorders,2012-12-06 Information analysis centers were developed to help the scientist and practitioner cope with the ever increasing mass of published and unpublished information in a specific field Their establishment resulted from a further extension of those pressures that had brought about the formation of the specialized primary journal and the abstracting services at the turn of the century The information analysis center concept was greatly advanced by the 1963 report of the President s Science Advisory Committee Panel on Science Information This report stated scientific interpreters who can collect relevant data review a field and distill information in a manner that goes to the heart of a technical situation are more help to the overburdened specialist than is a mere pile of relevant docu ments Such specialized information centers are operated in closest possible contact with working scientists in the field These centers not only furnish information about ongoing research and dis seminate and retrieve information but also create new information and develop new methods of infor mation analysis synthesis and dissemination The continually expanding biomedical literature produced by scientists from the world s laboratories research centers and medical centers led the National Institute of Neurological Diseases and Stroke in 1964 to initiate a National Neurological Information Network of specialized centers for neurological information The Centers are designed to bring under control and to promote ready access to important segments of the literature
