## **Syntactic Carpentry An Emergenist Approach To Syntax:**

Syntactic Carpentry William O'Grady, 2005-03-23 The book presents a new theory of syntax that is efficiency and computationally oriented and is compatible with the emergentist movement within linguistics

**Current Approaches to Syntax** András Kertész, Edith Moravcsik, Csilla Rákosi, 2019-05-06 Even though the range of phenomena syntactic theories intend to account for is basically the same the large number of current approaches to syntax shows how differently these phenomena can be interpreted described and explained The goal of the volume is to probe into the question of how exactly these frameworks differ and what if anything they have in common Descriptions of a sample of current approaches to syntax are presented by their major practitioners Part I followed by their metatheoretical underpinnings Part II Given that the goal is to facilitate a systematic comparison among the approaches a checklist of issues was given to the contributors to address The main headings are Data Goals Descriptive Tools and Criteria for Evaluation The chapters are structured uniformly allowing an item by item survey across the frameworks The introduction lays out the parameters along which syntactic frameworks must be the same and how they may differ and a final paper draws some conclusions about similarities and differences The volume is of interest to descriptive linguists theoreticians of grammar philosophers of science and studies of the cognitive science of science

**Syntactic Processing** Carlos Acuña-Fariña, 2023-07-31 This book provides an overview of the structures topics and main theories of syntactic processing It covers the last 40 years of sentence level psycholinguistic research and debates and makes it accessible to both theoretical linguists and experimental psychologists Tying linguistically relevant issues to psycholinguistic theory this book Covers the processing of the grammatical phenomena adjunction agreement and gap filling and discusses the relationship between grammars and parsers Discusses experimental work and theories demonstrating how psychologists have made real strides in understanding language and how studying the processing of syntactic structure is the same as studying the nature of language Explores the key theories of psycholinguistics including recent developments Explains the different methodologies of sentence processing such as eye tracking and electroencephalography Bridging the gap between psycholinguistic research and the study of language this book is essential reading for advanced students and scholars of linguistics and experimental psycholinguistics as well as cognitive science and psychology

*Reflexive Pronouns: A Theoretical and Experimental Synthesis* Darcy Sperlich, 2021-01-04 This book presents a comprehensive picture of reflexive pronouns from both a theoretical and experimental perspective using the well researched languages of English German Dutch Chinese Japanese and Korean In order to understand the data from varying theoretical perspectives the book considers selected syntactic and pragmatic analyses based on their current importance in the field The volume consequently introduces the Emergentist Reflexivity Approach which is a novel theoretical synthesis incorporating a sentence and pragmatic processor that accounts for reflexive pronoun behaviour in these six languages Moreover in support of this model a vast array of experimental literature is

considered including first and second language acquisition bilingual psycholinguistic neurolinguistic and clinical studies It is through both the intuitive and experimental data linguistic theorizing relies upon that brings out the strengths of the modelling adopted here paving new avenues for future research In sum this volume unites a diverse array of the literature that currently sits largely divorced between the theoretical and experimental realms and when put together a better understanding of reflexive pronouns under the auspices of the Emergentist Reflexivity Approach is forged

**Xenolinguistics** Douglas A. Vakoch, Jeffrey Punske, 2023-09-06 Xenolinguistics brings together biologists anthropologists linguists and other experts specializing in language and communication to explore what non human non Earthbound language might look like The 18 chapters examine what is known about human language and animal communication systems to provide reasonable hypotheses about what we may find if we encounter non Earth intelligence Showcasing an interdisciplinary dialogue between a set of highly established scholars this volume Clarifies what is and is not known about human language and animal communication systems Presents speculative arguments as a philosophical exercise to help define the boundaries of what our current science can tell us about non speculative areas of investigation Provides readers with a clearer sense of how our knowledge about language is better informed through a cross disciplinary investigation Offers a better understanding of future avenues of research on language This rich interdisciplinary collection with chapter authors including Noam Chomsky Derek Ball Denise Herzing and Irene Pepperberg will be of interest to researchers and students studying non human communication astrobiology and language invention

*Working Memory and Second Language Learning* Zhisheng (Edward) Wen, 2016-06-06 This book introduces an approach to understanding and measuring working memory components and functions in second language learning processing and development It presents comprehensive thorough and updated reviews of relevant literatures from cognitive sciences and applied linguistics Drawing on multidisciplinary research the book advocates a conceptual framework for integrating working memory theories with second language acquisition theories An innovative theoretical model is also presented which illuminates research studies investigating the distinctive roles of phonological and executive working memory as they relate to specific L2 learning domains skills and processes Theoretical and methodological implications of this integrative perspective are further elaborated and discussed within the specific realms of L2 task based performance and language aptitude research

**Creating Language** Morten H. Christiansen, Nick Chater, 2018-04-20 A work that reveals the profound links between the evolution acquisition and processing of language and proposes a new integrative framework for the language sciences Language is a hallmark of the human species the flexibility and unbounded expressivity of our linguistic abilities is unique in the biological world In this book Morten Christiansen and Nick Chater argue that to understand this astonishing phenomenon we must consider how language is created moment by moment in the generation and understanding of individual utterances year by year as new language learners acquire language skills and generation by generation as

languages change split and fuse through the processes of cultural evolution Christiansen and Chater propose a revolutionary new framework for understanding the evolution acquisition and processing of language offering an integrated theory of how language creation is intertwined across these multiple timescales Christiansen and Chater argue that mainstream generative approaches to language do not provide compelling accounts of language evolution acquisition and processing Their own account draws on important developments from across the language sciences including statistical natural language processing learnability theory computational modeling and psycholinguistic experiments with children and adults Christiansen and Chater also consider some of the major implications of their theoretical approach for our understanding of how language works offering alternative accounts of specific aspects of language including the structure of the vocabulary the importance of experience in language processing and the nature of recursive linguistic structure

**Evolution Of Language, The - Proceedings Of The 6th International Conference (Evolang6)** Angelo Cangelosi, Andrew D M Smith, Kenny Smith, 2006-03-02 This volume comprises refereed papers and abstracts from the 6th International Conference on the Evolution of Language EVOLANG6 The biennial EVOLANG conference focuses on the origins and evolution of human language and brings together researchers from many disciplines including anthropology archaeology artificial life biology cognitive science computer science ethology genetics linguistics neuroscience palaeontology primatology and psychology The collection presents the latest theoretical experimental and modeling research on language evolution and includes contributions from the leading scientists in the field including T Fitch V Gallese S Mithen D Parisi A Piazza L Cavali Sforza R Seyfarth D Cheney L Steels L Talmy and M Tomasello

*Language Acquisition and Development* Misha Becker, Kamil Ud Deen, 2020-03-10 An introduction to the study of children s language development that provides a uniquely accessible perspective on generative universal grammar based approaches How children acquire language so quickly easily and uniformly is one of the great mysteries of the human experience The theory of Universal Grammar suggests that one reason for the relative ease of early language acquisition is that children are born with a predisposition to create a grammar This textbook offers an introduction to the study of children s acquisition and development of language from a generative universal grammar based theoretical perspective providing comprehensive coverage of children s acquisition while presenting core concepts crucial to understanding generative linguistics more broadly After laying the theoretical groundwork including consideration of alternative frameworks the book explores the development of the sound system of language children s perception and production of speech sound examines how words are learned lexical semantics and how words are formed morphology investigates sentence structure syntax including argument structure functional structure and tense considers such nontypical circumstances as acquiring a first language past infancy and early childhood without the abilities to hear or see and with certain cognitive disorders and studies bilingual language acquisition both simultaneously and in sequence Each chapter offers a summary section suggestions for further reading and exercises designed to test

students understanding of the material and provide opportunities to practice analyzing children's language. Appendixes provide charts of the International Phonetic Alphabet with links to websites that allow students to listen to the sounds associated with these symbols and a summary of selected experimental methodologies.

**The Routledge Handbook of Second Language Acquisition and Input Processing** Wynne Wong, Joe Barcroft, 2024-06-27 This state-of-the-science handbook offers a comprehensive discussion of input processing in second language acquisition. The volume assesses past and current research on input processing and engages the reader in critical reflection about the current state of the field and what lies ahead for future research theory building and implications for language instruction. The handbook considers multiple theoretical perspectives, pivotal research findings, issues in research methodology and instructional implications that underscore the centrality of input processing in second language acquisition. Whereas to date most research in this area has focused on input processing as it relates to the acquisition of morphosyntax and lexis, the present volume also attends to more recent theoretical advances regarding other linguistic subsystems such as phonology and pragmatics as well as processing resource allocation during multilevel input processing. Thorough and forward looking, this volume is an indispensable resource to scholars and advanced students of second language acquisition, bilingualism, applied linguistics, cognitive science, psychology and education.

*Second Language Sentence Processing* Alan Juffs, Guillermo A. Rodríguez, 2014-12-02 This addition to the Cognitive Science and Second Language Acquisition series presents a comprehensive review of the latest research findings on sentence processing in second language acquisition. The book begins with a broad overview of the core issues of second language sentence processing research and then narrows its focus by dedicating individual chapters to each of these key areas. While a number of publications have discussed research findings on knowledge of formal syntactic principles as part of theories of second language acquisition, there are fewer resources dedicated to the role of second language sentence processing in this context. This volume will act as the first full-length literature review of the field on the market.

**Chinese Language Use by School-Aged Chinese Australians** Yilu Yang, 2022-11-30 This book examines the use of Chinese by school-aged Chinese Australians from a dual-track culturalisation perspective. Drawing upon interviews, participant observations and documentary analysis, the author discusses why and how these children learn and use Chinese in multiple social settings and how they construct their understanding of language and identities in doing so. The book will appeal to students and scholars in the fields of sociolinguistics, migration studies, sociology of education, language and communication amongst other areas in the social sciences.

*Auxiliary Selection in Spanish* Malte Rosemeyer, 2014-04-15 Although usage-based linguistics emphasises the need for studies of language change to take frequency effects into account, there is a lack of research that tries to systematically model frequency effects and their relation to diffusion processes in language change. This monograph offers a diachronic study of the change in Spanish perfect auxiliary selection between Old and Early Modern Spanish that led to the gradual replacement of the auxiliary *ser* by *haber* with

the auxiliary haber have It analyses this process in terms of the interaction between gradience gradualness and the conserving effects of frequency and persistence in language change The study contributes to the theory and methodology of diachronic linguistics additionally offering insights on how to explain synchronic grammatical variation both within a language and between languages The book is of interest to the fields of Spanish and Romance linguistics syntax as well as historical and variationist linguistics      Teaching Adult Immigrants with Limited Formal Education Joy Kreeft

Peyton,Martha Young-Scholten,2020-07-07 Adult migrants who received little or no formal education in their home countries face a unique set of challenges when attempting to learn the languages of their new countries Few adult migrants with limited or no literacy in their native languages successfully attain higher levels of literacy in their additional languages even if they attain high levels of oral proficiency This book the result of a European and United States wide collaborative research project aims to assist teachers working with adult migrants to address this attainment gap and help students reach the highest possible levels of literacy in their new languages The chapters provide the latest research informed evidence on the acquisition of linguistic competence and the development of reading in a new language by adults The book concludes with a chapter that addresses the challenges and opportunities faced by this group of learners and their teachers with specific instructional strategies that can be used The book will be an invaluable resource for teachers tutors and training providers as well as volunteers who work with adult migrants      Talking About Second Language Acquisition Karim Sadeghi,2022-09-21

This book includes interviews with fourteen internationally acclaimed leading figures in Second Language Acquisition SLA who speak on seminal issues in the field as well as their own contributions to SLA scholarship As well as covering the contributors backgrounds and academic achievements the interviews also delve into their areas of expertise current theoretical and practical considerations and contemporary questions developments and challenges in SLA The author probes their views on current topics including input and interaction vocabulary acquisition teaching pronunciation writing development syntactic processing multilingualism L1 attrition complex dynamic systems processing instruction instructed second language acquisition and technology in language teaching An introduction by the author draws out the key themes and debates in the field today and highlights areas for future research and further exploration and a foreword is provided by Rod Ellis This book will be of interest to students and scholars of Applied Linguistics Teacher Education and Methodology and Second and Foreign Language Education      Language Usage and Language Structure Kasper Boye,Elisabeth

Engberg-Pedersen,2010 Addresses an issue hotly debated in the linguistic theory the relation between language usage and language structure      *Second Language Acquisition* Susan M. Gass,Jennifer Behney,Luke Plonsky,Elizabeth Huntley,2025-03-17 Now in its sixth edition this bestselling textbook remains the cornerstone for the study of second language acquisition providing a comprehensive yet accessible introduction to SLA This substantially revised and updated edition has been edited into ten chapters with a focus on the most frequently taught core themes and increased accessibility

A new introductory chapter provides a concise overview of the history of the field. Omitted chapters are available online where supplementation is desired. The text continues to provide a rich range of pedagogical tools that encourage students to reflect upon the experiences of second language learners. As with previous editions, discussion questions and problems are peppered throughout each chapter to help students apply their knowledge, and a glossary defines and reinforces must-know terminology. Additional questions and problems appear on the online companion website. This seminal text is ideal core reading for SLA courses in second language studies, applied linguistics, linguistics, TESOL, and/or language education programs. This textbook is supported with Instructor and Student Resources including PowerPoint slides, exercises, flashcards, audio, and video links. **The Acquisition of German** Anne Vainikka, Martha Young-Scholten, 2011-10-27. The Acquisition of German: Introducing Organic Grammar brings together work on the acquisition of German from over four decades of child L1 and immigrant L2 learner studies. The book's major feature is new longitudinal data from three secondary school students who began an exchange year in Germany with no German knowledge and attained fluency. Their naturalistic acquisition process, with a succession of stages described for the first time in L2 acquisition, is highly similar to that of younger learners. This has important implications for German teaching and for the theory of Universal Grammar and acquisition. Organic Grammar, a variant of generative syntax, is offered as a practical alternative to Chomsky's Minimalism. The analysis focuses on extensive monthly samples of the three students' German development in an input-rich environment. Similar to previous studies, the teenagers build syntactic structure from the bottom up. Two acquired correct word order by the end of the year; the third, who had greater conscious awareness of German grammar, had a divergent route of development, suggesting that language awareness can alter a natural developmental path. The results are addressed in light of recent debates in child/adult differences.

[The Cambridge Handbook of Child Language](#) Edith L. Bavin, Letitia R. Naigles, 2015-11-26. The most authoritative resource for students and researchers. The Cambridge Handbook of Child Language has been thoroughly updated and extended. Enhancements include new chapters on the acquisition of words, processing deficits in children with specific language impairments, and language in children with Williams syndrome; new authors for the bilingualism and autism chapters; a refocused discourse chapter on written narratives; and a new section on reading and reading disorders, cementing the handbook's position as the best study of the subject available. In a wide-ranging survey, language development is traced from prelinguistic infancy to adolescence in typical and atypical contexts. The material is intuitively grouped into six thematic sections, enabling readers to easily find specific in-depth information. With topics as varied as statistical learning, bilingualism, and the neurobiology of reading disorders, this multidisciplinary Handbook is an essential reference for students and researchers in linguistics, psychology, cognitive science, speech pathology, education, and anthropology.

**Language Proficiency in Native and Non-native Speakers** Jan H. Hulstijn, 2015-02-15. This book, written for both seasoned and novice researchers, presents a theory of what is called Basic and

Higher Language Cognition BLC and HLC a theory aimed at making some fundamental issues concerning first and second language learning and bilingualism more empirical The first part of the book provides background for and explication of the theory as well as an agenda for future research while the second part reports on selected studies of language proficiency in native speakers as well as non native speakers and studies of the relationship between literacy in a first and second language Conceptual and methodological problems in measuring language proficiency in research on second language acquisition and bilingualism are also discussed Further the notion of levels of language proficiency as rendered by the Common European Framework of Reference for Languages CEFR is critically examined suggesting ways of empirically investigating a number of questions that the CEFR raises but is not capable of answering
